

## Subscription rates

Subscription rates for volume 45 (2013) of *Advances in Applied Probability* (AAP) are as follows (post free and including online access at <http://projecteuclid.org/aap/>): US\$326.00; A\$316.00; £206.00 for libraries and institutions; or US\$109.00; A\$106.00; £69.00 for individuals belonging to a recognised scientific society. The subscription rates for volume 50 (2013) of *Journal of Applied Probability*, the companion publication, are the same; if both journals are ordered directly from the Applied Probability office at the same time, the combined price is discounted by 10%. Please send all enquiries to: Applied Probability Subscriptions, School of Mathematics and Statistics, University of Sheffield, Sheffield S3 7RH, UK (telephone +44 114 222 3922; fax +44 114 222 3926; email [s.c.boyles@sheffield.ac.uk](mailto:s.c.boyles@sheffield.ac.uk)). Cheques, money orders, etc. should be made payable to 'Applied Probability'. Payment is acceptable in US, Australian or UK currency, or by Visa or Mastercard. We can provide back issue prices on application.

## Notes for contributors

Research papers are published in both *Journal of Applied Probability* (JAP) and *Advances in Applied Probability* (AAP), with longer papers typically appearing in AAP. However, assignment of papers between the two journals is made by the Editor on an issue-by-issue basis. A submission to Applied Probability is considered as a submission to either journal. In addition, AAP publishes letters specifically related to papers that have appeared in AAP and JAP publishes short communications of a few printed pages in the nature of notes and letters specifically related to papers that have appeared in JAP. Review papers and papers in *stochastic geometry and statistical applications* are published in AAP.

Fifty offprints of each paper will be provided free, with additional offprints available at cost.

Papers submitted to the Applied Probability journals are considered on the understanding that they have not been published previously and are not under consideration by another publication. Accepted papers will not be published elsewhere without the written permission of the Trust. Submitted papers should be in English. It is the author's responsibility to ensure an acceptable standard of language, and a paper failing to meet this requirement may go back to the author for rewriting before being sent out for review.

Papers should include: (i) a **short abstract** of 4–10 lines giving a non-mathematical description of the subject matter and results; (ii) a list of **keywords** detailing the contents; and (iii) a list of **classifications**, using the 2010 Mathematics Subject Classification scheme (<http://www.ams.org/msc/>). Letters to the Editor need not include these. To assist authors in writing papers in the Applied Probability style, they may use the L<sup>A</sup>T<sub>E</sub>X class file `aptpub.cls`, available from <http://www.appliedprobability.org/>. Use of this class file is not a condition of submission, but will considerably increase the speed at which papers are processed.

Papers should be submitted as hard copy or as electronic files (with hard copy back-up). All submissions will be acknowledged on receipt and **must be accompanied by a covering letter stating the author's postal address and affiliation**. Hard copy: Send **all** submissions to the Applied Probability office in Sheffield, and not to individual editors. Two copies of the paper, at least one of which should be double spaced, should be sent to: **Executive Editor, Applied Probability, School of Mathematics and Statistics, University of Sheffield, Sheffield S3 7RH, UK**. Electronic submission: Please email a **double-spaced** PostScript™ (.ps) or portable document format (.pdf) file, not exceeding 1 Mb. **The files must be clearly identified by name in a separate covering message**. The address for email submissions is [japaap@sheffield.ac.uk](mailto:japaap@sheffield.ac.uk). Authors should also submit one hard copy to the Executive Editor, as above.

## Copyright

The copyright of all published papers is vested in the Applied Probability Trust. When a paper is accepted for publication, the Trust asks the authors to assign copyright by signing a form in which the terms of copyright are listed. Failure to do this promptly may delay or prevent publication.

Authorisation to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by the Applied Probability Trust for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the corresponding processing and royalty fees (see <http://www.copyright.com>) are paid directly to CCC, 222 Rosewood Drive, Danvers, MA 01923, USA. 0001–8678/13

*Stochastic Geometry and Statistical Applications*

- 595 MIKKO KURONEN AND LASSE LESKELÄ. Hard-core thinnings of germ–grain models with power-law grain sizes
- 626 ONDŘEJ ŠEDIVÝ, JAKUB STANĚK, BLAŽENA KRATOCHVÍLOVÁ AND VIKTOR BENEŠ. Sliced inverse regression and independence in random marked sets with covariates

*General Applied Probability*

- 645 GUODONG PANG AND DAVID D. YAO. Heavy-traffic limits for a many-server queueing network with switchover
- 673 OSMAN T. AKGUN, RHONDA RICHTER AND RONALD WOLFF. Partial flexibility in routing and scheduling
- 692 H. K. ALEXANDER. Conditional distributions and waiting times in multitype branching processes
- 719 GEROLD ALSMEYER AND SÖREN GRÖTTRUP. A host-parasite model for a two-type cell population
- 742 G. N. MILSTEIN AND M. V. TRETYAKOV. Probabilistic methods for the incompressible Navier–Stokes equations with space periodic conditions
- 773 S. JUNEJA AND M. MANDJES. Overlap problems on the circle
- 791 SOUFIANE AAZIZI. Discrete-time approximation of decoupled forward–backward stochastic differential equations driven by pure jump Lévy processes
- 822 PIERRE COLLET, SERVET MARTÍNEZ, SYLVIE MÉLÉARD AND JAIME SAN MARTÍN. Stochastic models for a chemostat and long-time behavior
- 837 FRANÇOIS DUFOUR AND A. B. PIUNOVSKIY. The expected total cost criterion for Markov decision processes under constraints
- 860 MARTIN FORDE, ANDREY POGUDIN AND HONGZHONG ZHANG. Hitting times, occupation times, trivariate laws and the forward Kolmogorov equation for a one-dimensional diffusion with memory
- 876 NATHAN ROSS. Power laws in preferential attachment graphs and Stein’s method for the negative binomial distribution
