"We have experimentally proved that Listerine is a powerful antiseptic, preventing the development of bacteria and decomposition of vegetable infusions."—*British Medical Journal*, May 3, 1890.

LISTERINE

*A safe, non-poisonous, unirritating
antiseptic solution*

LISTERINE is particularly useful in the treatment of abnormal conditions of the mucosa, and admirably suited for a wash, gargle, or douche, in catarrhal conditions of the nose and throat.

LISTERINE in proper dilution may be freely and continuously used without prejudicial effect, either by injection or spray, in all the natural cavities of the body.

LISTERINE embodies a two-fold antiseptic effect, in that after the evaporation of its volatile constituents—thyme, eucalyptus, mentha, gaultheria, and ethyl alcohol—a film of boracic and benzoic acids remains upon the surface to which Listerine has been applied, affording more prolonged antiseptic protection.

LISTERINE is a trustworthy surgical dressing; it has no injurious effect upon the tissues in which the healing process is going on.

LISTERINE in teaspoonful doses will often afford relief in fermentative dyspepsia, and is largely prescribed, with excellent results, in the various forms of diarrhoea, occurring in infants and adults.

LISTERINE literature, including special pamphlets upon *Respiratory Diseases*, may be had, by physicians, upon application to

The Journal of Laryngology and Otology

(Founded in 1887 by MORELL MACKENZIE and NORRIS WOLFENDEN)

EDITED BY

A. LOGAN TURNER AND J. S. FRASER

ASSISTED BY

DOUGLAS GUTHRIE AND IRWIN MOORE

1. Original Articles are accepted on the condition that they have not been published elsewhere.

2. Manuscripts should be typewritten, on one side only of the paper, and well spaced.

3. Galley proofs and engraver's proofs of illustrations are sent to the author. Corrections, which should be kept to a minimum, must be clearly marked and no additional matter should be added.

4. The order for reprints should be sent when returning galley proofs, and for this purpose special forms are supplied, on which the price of the reprints is stated.

5. Authors of Original Communications on Oto-Laryngology in other Journals are invited to send a copy, or two reprints, to the *Journal of Laryngology*. If they are willing, at the same time, to submit their own abstract (in English, French, Italian, or German) it will be welcomed.

6. Editorial Communications should be addressed to "EDITORS, *Journal of Laryngology*, c/o Messrs OLIVER AND BOYD, Tweeddale Court, Edinburgh."

7. The Annual Subscription is Forty Shillings, post free, and is payable in advance.

8. Single copies of back numbers, both of the present and the previous series, are on sale at Four Shillings each.

9. An Annual Subscription can be commenced with any number of the Journal, and the preceding numbers of the current year can be purchased at Four Shillings each.

UNITED STATES OF AMERICA

Orders for this Journal, for single parts or yearly subscriptions, can be sent either through a local bookseller, or to Messrs G. E. STECHERT & Co., 31-33 East 10th Street, New York.

**CHEVALIER JACKSON'S INSTRUMENTS FOR ŒSOPHAGOSCOPY,
LARYNGOSCOPY, AND BRONCHOSCOPY**

New Models as made for Walter G. Howarth, F.R.C.S.

Each Instrument is made in accordance with the details of Chevalier Jackson's most recent models, and each is supplied with a *spare light carrier*, i.e., 2 light carriers and 2 lamps. All the models have been redesigned with a view to rendering them more easily cleansed; all the crevices and corners for the dirt have been taken away.

To ensure better visibility the tips of the forceps are *black*.

The Howarth-Jackson's Instruments are **less expensive than other American or English models**, and a further economy has been effected by rendering the instrument tips interchangeable, thus reducing the number of forceps handles and tips required.

The lamps are 2.5 volt and more durable than the usual models.

Manufactured only by

DOWN BROS., L^{TD.}

SURGICAL INSTRUMENT MAKERS

DISEASES OF THE NOSE, THROAT, AND EAR

For Practitioners and Students

Edited by **A. LOGAN TURNER, M.D., F.R.C.S.(Ed.)**

Senior Lecturer on Diseases of the Ear, Nose, and Throat, University of Edinburgh

With the collaboration of

J. S. FRASER, M.B., F.R.C.S. (Ed.)

J. D. LITHGOW, M.B., F.R.C.S. (Ed.)

W. T. GARDINER, M.C., M.B., F.R.C.S. (Ed.)

G. EWART MARTIN, M.B., F.R.C.S. (Ed.)

and **DOUGLAS GUTHRIE, M.D., F.R.C.S. (Ed.)**

"The illustrations are many and good, the book is well balanced and clearly written and may confidently be recommended for the use of students and practitioners."—*Lancet*.

"Will prove of the greatest value to students and indeed to those devoting themselves to the speciality."—*Journal of Laryngology and Otology*.

Demy 8vo, 272 pp. 15s. net, Postage 6d.

ASTHMA

By **FRANK COKE, F.R.C.S.**

With Frontispiece in colour illustrating the
Dermal Reactions, and other illustrations.

Contains a consideration of 850 cases of asthma examined and treated in the light of the new work that has been accomplished on this subject during the last few years.

"Brightly written, and shows evidence of much practical experience and a knowledge of the literature."—*British Medical Journal*.

Second Fully Revised English Edition. Demy 8vo., 362 pp. 589 Illustrations. 17s. 6d. net, Post. 6d.

OTO-RHINO-LARYNGOLOGY

For the Student and Practitioner.

By **Dr GEORGES LAURENS**

Authorised Translation of the Fourth Fully
Revised French Edition.

By **H. CLAYTON FOX, F.R.C.S., Late Aural
Surgeon, Ministry of Pensions, London Area.**

"Full of sound points and diagrammatic illustrations, many of which are of great practical value."—*Lancet*.

HOSPITAL FOR DISEASES OF THE THROAT

GOLDEN SQUARE, LONDON, W. 1

HONORARY MEDICAL STAFF

Surgeons

Mr T. JEFFERSON FAULDER
Mr GEORGE W. BADGEROW
Mr LIONEL COLLEDGE

Mr G. A. DAWSON
Mr GILBERT CHUBB
Mr THEODORE JUST

Assistant Surgeons

Mr ORMEROD
Mr BEDFORD RUSSEL

Mr DINGLEY
Mr SANDIFORD

The Hospital, which has for some considerable time been undergoing very extensive reconstruction and extension, has nearly 80 beds for In-patients and an annual Out-patient attendance of over 60,000.

CLINICAL INSTRUCTION

Clinical Instruction in the Diagnosis and Treatment of Diseases of the Ear, Nose and Throat is daily given in the Out-patient Department from 2 to 5 p.m. On Tuesdays and Fridays from 6.30 to 9 p.m. also. Major operations are performed daily, except Mondays and Saturdays, in the In-patient Operating Theatres. Minor operations are performed in the Out-patient Department by the Assistant Surgeons on four mornings a week.

Practitioners and Medical Students are admitted to the practice of the hospital and Clinical Assistants, whose duty it is to assist the staff, are appointed from time to time among them. For further information apply to the Dean, GILBERT CHUBB.

ORARGOL

(A.F.D.)

An electrically prepared suspension
of colloidal silver and gold for

RHINO-LARYNGOLOGY AND OPHTHALMOLOGY AND GENERAL ANTISEPSIS.

Indicated in the same diseases as colloidal silver,
Orargol has a superior action because of the addition
of the powerfully anti-infectious colloidal gold.

CATARRH OF MUCOUS MEMBRANE

TOPICAL MEDICATION

CHLORETONE INHALANT (P., D. & Co.) is an oily solution possessing antiseptic and soothing properties for administration by means of the "Glaseptic" Nebuliser in irritable conditions of the nose and throat, catarrh, bronchial congestion, etc. The formula is as follows:—

Chloretone.....1 gramme	Camphor.....2.5 grammes
Menthol.....2.5 grammes	Oil of Cinnamon, U.S.P.....0.25 gramme
Liquid Petrolatum.....93.75 grammes	

CHLORETONE INHALANT (P., D. & Co.) has for many years been used with excellent results in the treatment of nasal catarrh, ozæna, and the various forms of rhinitis. It is of value, also, in cases of pharyngitis, laryngitis, tonsillitis, bronchitis and pertussis.

Chloretone Inhalant (P., D. & Co.) is supplied in bottles of 1, 4, or 16 fluid ounces
