

Instructions for Authors

Editorial policy The journal welcomes submissions in any of the areas of plasma physics. Its scope includes experimental and theoretical work on basic plasma physics, the plasma physics of magnetic and inertial fusion, laser–plasma interactions, industrial plasmas, plasma devices and plasmas in space and astrophysics. This list is, of course, merely illustrative of the wide range of topics on which papers are invited, and is not intended to exclude any aspect of plasma physics that is not explicitly mentioned.

Authors are urged to ensure that their papers are written clearly and attractively, in order that their work will be readily accessible to readers. Manuscripts must be written in English. *Journal of Plasma Physics* employs a rigorous peer-review process whereby all submitted manuscripts are sent to recognized experts in their subjects for evaluation. The Editors' decision on the suitability of a manuscript for publication is final.

Submission of manuscripts Papers may be submitted to the Editor or any of the Associate Editors, preferably by email in pdf format. When a paper is accepted, the authors will be asked to supply source files in LaTeX or Word. Instructions for the preparation of these files and LaTeX style files are given in the Instructions for Contributors link at journals.cambridge.org/pla.

Incremental publishing and DOIs In order to make articles which have been accepted for publication in *Journal of Plasma Physics* available as quickly as possible, they are now published incrementally online (at Cambridge Journals Online; journals.cambridge.org) The online version is available as soon as author corrections have been completed and before the article appears in a printed issue. A reference is added to the first page of the article in the journal catchline. This is the DOI – Digital Object Identifier. This is a global publishers' standard. A unique DOI number is created for each published item. It can be used for citation purposes instead of volume, issue and page numbers. It therefore suits the early citation of articles which are published on the web before they have appeared in a printed issue. See journals.cambridge.org/pla.

Proof reading Only typographical or factual errors may be changed at proof stage. The publisher reserves the right to charge authors for correction of non-typographical errors.

Offprints Corresponding authors will receive a PDF of their article upon publication. Print offprints may be purchased from the publisher if ordered at first proof stage.

Copying This journal is registered with the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923. Organizations in the USA who are also registered with C.C.C. may therefore copy material (beyond the limits permitted by sections 107 and 108 of US copyright law) subject to payment to C.C.C. of the per copy fee of \$16.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0022–3778/2013 \$16.00.

ISI Tear Sheet Service, 3501 Market Street, Philadelphia, Pennsylvania 19104, USA, is authorized to supply single copies of separate articles for private use only.

Organizations authorized by the Copyright Licensing Agency may also copy material subject to the usual conditions.

For all other use, permission should be sought from Cambridge or the American Branch of Cambridge University Press.

JOURNAL OF PLASMA PHYSICS

VOLUME 79 • PART 2 • APRIL 2013

Obituary

- Padma Kant Shukla 1950–2013
Robert Bingham, Bengt Eliasson, Tito Mendonca and Lennart Stenflo 119

Research Articles

- Plasma-driven Z-pinch X-ray loading and momentum coupling in meteorite and planetary materials
John L. Remo, Michael D. Furnish and R. Jeffery Lawrence 121
- Laser wakefield compression and acceleration of externally injected electron bunches in guiding structures
N. E. Andreev, V. E. Baranov, B. Cros, G. Maynard, P. Mora and M. E. Veysman 143
- Electron heating in a multi-dipole plasma by electrostatic plugging
M. K. Mishra and A. Phukan 153
- Ion-acoustic waves in a degenerate multicomponent magnetoplasma
U. M. Abdelsalam and M. M. Selim 163
- Extended Tonks–Langmuir-type model with non-Boltzmann-distributed electrons and cold ion sources
M. Kamran, S. Kuhn, D. D. Tskhakaya Sr and M. Khan 169
- Shukla–Eliasson attractive force: Revisited
M. Akbari-Moghanjoughi 189
- Macro-quantization of the guiding centre motion of charged particles in a magnetic field
Ram K. Varma 197
- Dust-ion-acoustic shock waves in a two-electron-temperature dusty plasma
M. M. Masud, M. Asaduzzaman and A. A. Mamun 215
- Generalization of the perturbation theory by using a repeating equation: A case that reveals the plasma chaotic state
C. L. Xaplanteris, E. D. Filippaki and L. C. Xaplanteris 221
- Dust-ion-acoustic nonlinear waves in a dusty electronegative plasma with vortex-like negative ions
N. Roy, S. S. Duha and A. A. Mamun 233
