

BIOPHYSICAL JOURNAL

Published for the Biophysical Society by
The Rockefeller University Press

Edited by the Biophysical Society in cooperation with the
Division of Biological Physics of The American Physical Society

Announcing a Special Issue dedicated to Aharon Katchalsky

Volume 15, Number 7

Structural Fluctuations in the Steady State of Muscular Contraction

Francis D. Carlson

Energetics of Active Transport Processes A. Essig

Network Thermodynamics: An Overview Alan S. Perelson

Calcium Regulation of Muscle Contraction Andrew Szent-Györgyi

Crossbridge Conformation as Revealed by X-Ray Diffraction

Studies of Insect Flight Muscles with ATP-Analogues R. S. Goody, K. C. Holmes, H. G. Mannherz, J. Barrington Leigh and G. Rosenbaum

Functional Organization of Mitotic Microtubules. Physical Chemistry of the *in vivo* Equilibrium System

Shinya Inoué, John Fuseler, Edward D. Salmon and Gordon W. Ellis

The *Biophysical Journal* publishes original articles and occasional reviews on pure and applied biophysics. The price for an annual subscription of twelve monthly issues is \$56 to Europe air only, \$50 elsewhere surface only. Remittances by draft or check on New York, or by international money order, should be made payable to *Biophysical Journal*, The Rockefeller University Press, P.O. Box 5108, Church Street Station, New York 10249.

INFORMATION FOR CONTRIBUTORS TO QUARTERLY REVIEWS OF BIOPHYSICS

1. *Quarterly Reviews of Biophysics* is the official journal of the International Union for Pure and Applied Biophysics. As such, its primary aim is to provide a forum for general and specialized communication between biophysicists working in different areas. This will normally be achieved by inviting authors who have made significant contributions to give a critical and readable account of recent progress in their special fields. Shorter and even controversial articles discussing topics of particular current interest will also be published.

2. Reviews should preferably be written in English. The style of presentation must be concise, with only key references.

3. Three copies of manuscripts are required. They should be typed in double spacing with a margin of 4 cm all round. The position of tables and illustrations should be indicated in the text. Tables and legends for illustrations should be typed on separate pages. A table of contents should be provided for printing at the head of the article.

4. In the text, the references should be to authors and year. When a paper cited has three or more authors the style Smith *et al.* (1973) should be used on all occasions. At the end of the paper, references should be listed alphabetically, with the full title of each paper, and the first and last pages. Abbreviations of journal titles should follow the latest edition of the *World List of Scientific Periodicals*. For example

BERNAL, J. D. (1967). *Origin of Life*. London: Weidenfeld and Nicolson.

EIGEN, M. (1968). New looks and outlooks on physical enzymology. *Q. Rev. Biophys.* 1, 3-33.

5. Drawings should be in Indian ink on tracing paper. They should be drawn roughly twice the size of the finished block. Explanations should as far as possible be placed in the legends. Lettering for photographs should either be on a duplicate print or on an accurately registered overlay.

6. The author will receive only one set of page proofs for correction. Fifty reprints of each review will be provided free of charge. Additional copies may be purchased.

QUARTERLY REVIEWS OF BIOPHYSICS

Reviews on the following topics will appear in forthcoming issues:

Immune responses to hapten conjugates *in vitro*

SIKRA KONTIAINEN, O. MAKELA and M. HURME

Lineages, quantal cell cycles and the generation of cell diversity

H. HOLTZER, N. RUBINSTEIN, S. FELLINI,
G. YEOH, J. CHI, J. BIRNBAUM, and M. OKAYAMA

Channel noise in nerve membranes and lipid bilayers

F. CONTI and E. WANKE
