

the more technical contributions on the administration and liturgy of the Sacrament. At a time when the State is assuming such ubiquitous responsibilities for the health of its citizens, the healing function of the Church grows more urgent. The Sacrament of the Sick, certainly the least known of all the sacraments in the immense richness of its forms and the profundity of the teaching it imparts, needs to be made popular, that is to say known by the people of God. To this end the Liturgical Album, *Le Sacrament des Malades* (1s. 0d.) is devoted. As usual in this superlative series, photographic illustrations supplement a vivid and practical text. Most useful is an analysis of the parts of the Sacrament (with the main parts in the vernacular), together with actual illustrations of the manual actions of the priest.

LA VIE SPIRITUELLE for December has an article by Mgr Garonne on reading the Psalms 'in the light of the Gospels', an excellent aid to mental prayer, and a study of 'the evangelical message of St Benedict Labre' by Dom Doyère. Of special interest is an account of the eremitical life in Carmelite tradition, written by a French Carmelite who is a member of the community of hermits established last year by the French and Belgian Provinces at Roquebrune.
