New U.K. Dialing Codes: Starting April 16, 1995, North American callers to England, Northern Ireland, Scotland, and Wales will need to insert an additional "1" directly after "44," the U.K. Country Code. For example, North Americans calling London will dial "44-1-71" prior to the local number. The new dialing system has already begun operating and runs parallel with the current one. Calls will go through whether the extra "1" is included or not. After April 16, 1995, the new system must be used.
