Offices and Works : BRISTOL, ENGLAND

BUILDERS OF

The "Bristol" Aeroplanes.

The Celebrated

"BRISTOL" BIPLANES

have been selected by the

British Army and Russian Army

FOR THE USE OF THEIR AIR BATTALION

FLYING SCHOOLS : SALISBURY PLAIN AND BROOKLANDS

LONDON : PRINTED AND PUBLISHED FOR THE AËRONAUTICAL SOCIETY OF GREAT BRITAIN BY
VACHER & SONS, LTD., WESTMINSTER HOUSE, S.W.

TO AVIATORS

LUBRICATION is one of the most important factors in the safety and success of an **Aviator**, and the best obtainable quality should invariably be chosen. During the **Flying Seasons 1909, 1910**, the whole of the **World's Records** made in England, and all of the **British Records** (with two exceptions) were accomplished by users of

WAKEFIELD MOTOR OIL

ELEMENTARY AERONAUTICS

OR

The Science and Practice of Aerial Machines

By A. P. THURSTON, B.Sc., Lecturer in Aeronautics, East London College; Member of
Aeronautical Society of Great Britain

CONTENTS—Normal and Inclined Planes—Aerocurves—Automatic Longitudinal Stability and Manual and Automatic Control—Automatic Lateral Stability—Propellers—Helicopters—Calculations Relating to the Design of a Flying Machine—Laboratory Instruments and Apparatus—Types of Machines—Aeronautical Engines

“It is the clearest exposition that there has yet been in anything like equally concise form. Mr. Thurston has done a very useful work in thus making a necessarily difficult subject not only clear but actually interesting to the beginner.”—*Morning Post*.

BURBERRYS AVIATION OUTFIT.

Write for
Brochure V.
Burberry for
Aeroplaning
and patterns
of Gabardine
Post Free.

“GABARDINE” (Regd. Trade Mark) is only obtainable in Burberry Garments, all of which are labelled “BURBERRYS.”

DESIGNED under the direction of expert aviators conversant with all requirements and the most practical methods of satisfying them.

WORKMANLIKE, this Burberry outfit combines perfect protection with absolute freedom. It is proof against rain and cold winds; yet maintains the natural ventilation; remarkably lightweight, yet owing to closeness of weave so tough and durable that even broken stays cannot penetrate its dense texture.

GABARDINE—the material worn by Sir E. Shackleton during his heroic dash to the South Pole as a protection against wind and cold—is used for the outer fabric with a lining throughout of quilted Eiderdown or Camel Fleece, which maintains phenomenal warmth under the most severe conditions.

“I take this opportunity of thanking you for the suit I wore on my memorable flight, and feel I cannot recommend the material too highly where warmth and comfort are required.”

C. GRAHAME-WHITE.
