
INSTRUCTIONS TO CONTRIBUTORS

The *Journal of Helminthology* publishes papers on all aspects of animal parasitic helminths, particularly those of medical or veterinary importance, but only in exceptional circumstances will systematic or taxonomic studies be acceptable.

Manuscripts, which must be in English or French (with an English summary) should be accompanied by a letter signed by *all* the authors and should be addressed to:

The Editor, Journal of Helminthology,
CAB International Institute of Parasitology,
395A Hatfield Road,
St Albans, Herts AL4 0XQ.
England.

Three copies of a typescript, on size A4 paper with double spacing, should be submitted. Papers should be preceded by a short abstract and will normally have the following sections: brief Introduction; Materials and Methods; Results; Discussion; Acknowledgements; References. However, the form of the paper may vary, depending on its subject matter; recent past issues should be consulted for a suitable form. Research Notes should also be preceded by a brief abstract. Illustrations should be drawn in Indian ink, preferably not more than double the final size. Care should be taken that all illustrations fit into the format of the Journal. The maximum size an illustration will be printed is 12.0×20.0 cm. Where many separate drawings are made, some indication of how they may be grouped to make a corporate plate without undue wastage of space, should be indicated. Some indication of scale (preferably a scale bar) should normally be given on the figure. Photocopies of illustrations should be enclosed for refereeing purposes. Lettering and numbering, which must be of a high standard, should be added by the author, with due regard for subsequent reduction.

Photographs should be glossy prints of the same size as they are to appear in the Journal (maximum size 12.0×20.0 cm). Composite prints must be mounted and can have the separate photographs abutting; they will then have a separating line inserted by the printers. All figures and letters on photographs must be inserted by the author.

Information should not be repeated in the text and in tables or figures. The legends to tables and to figures should be sufficiently detailed for the information to be understood without reference to the text.

References should be given in alphabetical order with the full title of the journal. The following are examples:

DUKE, B. O. L. (1971) The ecology of onchocerciasis in man and animals. In: *Ecology and Physiology of parasites* (editor, A. M. Fallis) pp. 213–222. Adam Hilger Ltd.: London.

JAMES, C. & WEBBE, G. (1973) A comparison of Egyptian and East African strains of *Schistosoma haematobium*. *Journal of Helminthology*, **47**, 49–59.

25 offprints are provided free of charge; additional copies may be ordered at the proof stage.

Contents

	Pages
Comparison of the live vaccine potential of different geographic isolates of <i>Schistosoma mansoni</i> . Q. D. BICKLE and M. J. DOENHOFF	191-195
Comparative study of assays detecting circulating immune complexes and specific antibodies in patients infected with <i>Toxocara canis</i> . C. AGUILA, C. CUÉLLAR, S. FENOY and J. L. GUILLÉN	196-202
Infections of forest rat filaria, <i>Breinvia booliati</i> , in neonate and juvenile laboratory rats. B. C. HO, L. M. CHEW, E. H. YAP and M. SINGH	203-212
Shedding of gravid proglottids and destrobilation in experimental infections of foxes with <i>Mesocestoides leptothylacus</i> Loos-Frank, 1980 (Cestoda). B. LOOS-FRANK	213-218
Purification and characterization of a glycoprotein from the surface of <i>Ascaridia galli</i> . K. MASOOD, K. P. SIRKAR and V. M. L. SRIVASTAVA	219-224
Comparative study of polypeptide patterns of larvae of <i>Trichinella</i> isolates by two-dimensional electrophoresis. T. GARATE and L. RIVAS (Research Note)	225-228
Superoxide dismutase activity in nematodes. M. SANCHEZ-MORENO, P. LEON, M. A. GARCIA-RUIZ and M. MONTEOLIVA	229-232
Comparative analysis of amino acids of three species of <i>Gangesia</i> (Cestoda: Proteocephalata). S. NANDA, A. BHALYA, D. GAIROLA, S. K. MALHOTRA and V. N. CAPOOR	233-239
Observations on the transmission of <i>Angiostrongylus cantonensis</i> from snail to rodent. S. NODA, R. UCHIKAWA, S. MATAYOSHI, Y. WATANABE and A. SATO	241-246
<i>In vitro</i> effects of mebendazole on the carbohydrate metabolism of <i>Avitellina lahorea</i> (Cestoda). M. AHMAD and W. A. NIZAMI	247-252
<i>Schistosoma mansoni</i> : vitelline gland development in females from single sex infections. M. K. SHAW	253-259
Distribution of echinococcosis/hydatidosis in Italy. R. LORENZINI and A. RUGGIERI	261-267
Antifilarial effect of <i>Zingiber officinale</i> on <i>Dirofilaria immitis</i> . A. DATTA and N. C. SUKUL (Research Note)	268-270
Announcements	240, 260
