Cambridge **Core**

CAMBRIDGE
UNIVERSITY PRESS

Physics

Books and Journals from
Cambridge University Press

Cambridge University Press is a leading publisher of textbooks, handbooks and monographs that span all areas of physics, from condensed matter physics, to theoretical and mathematical physics.

We also publish a key cluster of journals including the *Journal of Plasma Physics*, *Journal of Fluid Mechanics*, and *High Power Laser Science and Engineering*.

Core

CAMBRIDGE
UNIVERSITY PRESS

- 601 Streamwise streaks induced by bedload diffusion
A. Abramian, O. Devauchelle & E. Lajeunesse
- 620 Compressible mixing layer in shock-induced separation
P. Dupont, S. Piponnier & J. P. Dussauge
- S 644 Hyperbolicity, shadowing directions and sensitivity analysis of a turbulent three-dimensional flow
A. Ni
- 670 Three-dimensional capillary waves due to a submerged source with small surface tension
C. J. Lustri, R. Pethiyagoda & S. J. Chapman
- 702 Three-dimensional small-scale instabilities of plane internal gravity waves
S. J. Ghaemsaïdi & M. Mathur
- 730 Shock formation in two-layer equal-density viscous gravity currents
T.-F. Dauck, F. Box, L. Gell, J. A. Neufeld & J. R. Lister
- S 757 Water entry of rounded cylindrical bodies with different aspect ratios and surface conditions
N. Kim & H. Park
- 789 Characteristic path analysis of confinement influence on steady two-dimensional detonation propagation
C. Chiquete & M. Short
- 817 Puffing in planar buoyant plumes: BiGlobal instability analysis and experiments
K. K. Bharadwaj & D. Das
- 850 Stabilisation and drag reduction of pipe flows by flattening the base profile
E. Marensi, A. P. Willis & R. R. Kerswell
- 876 Explosive ripple instability due to incipient wave breaking
A. A. Mailybaev & A. Nachbin
- 893 Theoretical impulse threshold for particle dislodgement
S. Maldonado & G. A. M. de Almeida
- 904 Oscillatory and steady streaming flow in the anterior chamber of the moving eye
M. Dvoriashyna, R. Repetto & J. H. Tweedy
- 927 Local and global pairing instabilities of two interlaced helical vortices
H. U. Quaranta, M. Brynjell-Rahkola, T. Leweke & D. S. Henningson
- S 956 The water entry of a sphere in a jet
N. B. Speirs, J. Belden, Z. Pan, S. Holekamp, G. Badlissi, M. Jones & T. T. Truscott
- 969 Impact of coherence decay on wavepacket models for broadband shock-associated noise in supersonic jets
M. H. Wong, P. Jordan, D. R. Honnery & D. Edgington-Mitchell
- 994 On the unsteady characteristics of turbulent separations over a forward-backward-facing step
X. Fang & M. F. Tachie
- S 1031 Pump or coast: the role of resonance and passive energy recapture in medusan swimming performance
A. P. Hoover, A. J. Porras & L. A. Miller
- 1062 Electrokinetic energy conversion of two-layer fluids through nanofluidic channels
Z. Ding, Y. Jian & W. Tan
- S 1091 Amplification and structure of streamwise-velocity fluctuations in compression-corner shock-wave/turbulent boundary-layer interactions
M. A. Mustafa, N. J. Parziale, M. S. Smith & E. C. Marineau
- 1123 A freely yawing axisymmetric bluff body controlled by near-wake flow coupling
T. J. Lambert, B. Vukasinovic & A. Glezer
- 1157 Asymptotic theory for a Leidenfrost drop on a liquid pool
M. A. J. van Limbeek, B. Sobac, A. Rednikov, P. Colinet & J. H. Snoeijer
- 1190 Coherent structures in the linearized impulse response of turbulent channel flow
S. B. Vadarevu, S. Symon, S. J. Illingworth & I. Marusic

JFM Rapids (online only)

- R1 Turbulent drag reduction by compliant lubricating layer
A. Roccon, F. Zonta & A. Soldati
- R2 Scale-invariant singularity of the surface quasigeostrophic patch
R. K. Scott & D. G. Dritschel

S indicates supplementary data or movies available online.

- 1 The singularity method in unsteady Stokes flow: hydrodynamic force and torque around a sphere in time-dependent flows
C. H. Hsiao & D. L. Young
- 32 Three-dimensional quasi-geostrophic vortex equilibria with m -fold symmetry
J. N. Reinaud
- 60 The stability and nonlinear evolution of quasi-geostrophic toroidal vortices
J. N. Reinaud & D. G. Dritschel
- 79 Large-eddy simulation of temporally developing double helical vortices
J.-B. Chapelier, B. Wasistho & C. Scalò
- S 114 Weakly nonlinear transient waves on a shear current: ring waves and skewed Langmuir rolls
A. H. Akselsen & S. Å. Ellingsen
- 150 Surfactant- and gravity-dependent instability of two-layer channel flows: linear theory covering all wavelengths. Part 1. 'Long-wave' regimes
A. L. Frenkel, D. Halpern & A. J. Schweiger
- 185 Surfactant- and gravity-dependent instability of two-layer channel flows: linear theory covering all wavelengths. Part 2. Mid-wave regimes
A. L. Frenkel, D. Halpern & A. J. Schweiger
- S 215 The interaction between a spatially oscillating jet emitted by a fluidic oscillator and a cross-flow
F. Ostermann, R. Wosidlo, C. N. Nayeri & C. O. Paschereit
- 242 An analytical model for asymmetric Mach reflection configuration in steady flows
S. Roy & R. Gopalpillai
- 269 Filtered lifting line theory and application to the actuator line model
L. A. Martínez-Tossas & C. Meneveau
- 293 The influence of the chemical composition representation according to the number of species during mixing in high-pressure turbulent flows
L. Sciacovelli & J. Bellan
- 341 Direct numerical simulation of backward-facing step flow at $Re_\tau = 395$ and expansion ratio 2
A. Pont-Vilchez, F. X. Trias, A. Gorobets & A. Oliva
- 364 Equilibrium configurations of drops or bubbles in an eccentric annulus
N. Beheshti Pour & D. B. Thiessen
- 386 Experiments on a jet in a crossflow in the low-velocity-ratio regime
L. Klotz, K. Gumowski & J. E. Wesfreid
- 407 Modelling smooth- and transitionally rough-wall turbulent channel flow by leveraging inner–outer interactions and principal component analysis
S. Wu, K. T. Christensen & C. Pantano
- 454 The amplification of large-scale motion in a supersonic concave turbulent boundary layer and its impact on the mean and statistical properties
Q.-C. Wang, Z.-G. Wang, M.-B. Sun, R. Yang, Y.-X. Zhao & Z. Hu
- 494 Drag forces on a bed particle in open-channel flow: effects of pressure spatial fluctuations and very-large-scale motions
S. M. Cameron, V. I. Nikora & I. Marusic
- S 513 Tracking vortex surfaces frozen in the virtual velocity in non-ideal flows
J. Hao, S. Xiong & Y. Yang
- 545 Ablation of sloping ice faces into polar seawater
M. Mondal, B. Gayen, R. W. Griffiths & R. C. Kerr
- S 572 Direct numerical simulations of ripples in an oscillatory flow
M. Mazzuoli, A. G. Kidanemariam & M. Uhlmann
