Techni-CareTM Surgical Scrub

99.99% Bacterial Reduction
in only 30 seconds

Techni-Care...A new technology in a surgical scrub exhibits outstanding antimicrobial efficacy *without* dermal irritation.

Fully substantiated by independent testing in vivo and in vitro, Techni-Care Surgical Scrub both disinfects and conditions in less time than any prior technology available to healthcare personnel.

Results of Time Kill tests demonstrate that Techni-Care eliminates gram negative and gram positive bacteria at 99.99% in 30 second contact.

Outstanding Bactericidal Activity without skin irritation

Techni-Care's active ingredient, chloroxylenol (PCMX) at 3%, eliminates bacteria, while a host of skin conditioning agents work synergistically to condition and soften the skin. Exceptionally mild, Techni-Care's dermal conditioning ingredients, include cocamidopropyl PG-Dimonium Chloride Phosphate, Aloe Vera Gel, Collagen and Propylene Glycol.

Techni-Care has rated a "minimal irritation" in the Draize Dermal irritation test. Specially blended formulation for dermal conditioning, as well as for bacterial reduction. Techni-Care Surgical Scrub is soothing to dermal tissue while physoaloids promote natural turnover

WE'VE MAGNIFIED THE PROBLEMS OF NEEDLESTICK INJURIES TO MAKE A POINT.

AIDS VIRUS

HEPATITIS B VIRUS

It's not a pretty picture. The risks of your healthcare workers contracting Hepatitis B or AIDS from a needlestick injury are greater than ever. And so is the cost of treatment.

Consider that in 1981, before AIDS was recognized, the cost of treating a healthcare worker exposed to a blood-borne disease averaged about \$57. Today, the cost is over \$1,500.

And that's just for the medical treatment. There are also indirect costs to consider.

The cost of lost workdays. Of reduced productivity due to psychological stress. Of recruitment. Not to mention the

possibility of OSHA fines, effects on insurance, and legal implications.

Fortunately, there is a way to virtually eliminate the risk of accidental needlesticks from I.V. catheters before they occur. With the new PROTECTIV™ I.V. Catheter Safety System.

YOUR BEST DEFENSE | THE WAR AGAINST NEEDLESTICKS.

The PROTECTIV I.V. Catheter Safety System offers needlestick protection during and after use. The catheter contains a protective guard that glides over the contaminated needle. A reassuring "click" lets the user know when the needle is locked safely inside the guard.

THE PROTECTIV™ SAFETY SYSTEM. THE POINT OF MAXIMUM PROTECTION. Protect your employees by turning your hospital into a protective environment. Encourage your Infection Control

Supervisor to call Critikon for a free cost/benefit analysis today. And make the financial risk of needlestick injuries disappear.

THE PROTECTIV™ I.V. CATHETER SAFETY SYSTEM

Call and request a free copy of the informational brochure "The Implications Of Needlesticks".

*Dollar figures taken from different studies. References available upon request.

INFECTION CONTROL AND HOSPITAL EPIDEMIOLOGY[™]

The Society for Hospital Epidemiology of America (SHEA) and SLACK Inc. Copyright and Republication Policy

The Society for Hospital Epidemiology of America (SHEA) and SLACK Inc. hold copyright on *Infection Control and Hospital Epidemiology*. We request that all authors of works transfer to SHEA and SLACK Inc. all rights, title, and interest to such works, including copyright. In accord with the Copyright Act of 1976, we must acquire every author's signature to effect the transfer. A written work cannot be considered for publication until the 'Assignment of Copyright' form is signed by the author or authors and is on file at the editorial offices. Please submit this signed form with your manuscript. In the event that a manuscript is not accepted for publication, this agreement will be returned to the authors.

Signed 'Assignment of Copyright' forms confirm that a work submitted has not previously been published, is not subject to copyright or other rights except those of the author to be transferred to SHEA and SLACK Inc., and is not under consideration for publication elsewhere, except under circumstances communicated to us in writing at the time the work is submitted.

Permission to reproduce any part of the works published by SHEA and SLACK Inc. in *Infection Control and Hospital Epidemiology* in any form or by any means, electronic or mechanical, is not permitted without written permission from SLACK Inc.

Assignment of Copyright

In consideration of SLACK Incorporated and The Society for Hospital Epidemiology of America (collectively called the 'Publisher') in publishing my (our) submitted manuscript, the undersigned hereby transfer(s), assign(s), and otherwise convey(s) all copyright in the manuscript to the Publisher. The undersigned declares that the manuscript is original and, to the best of the undersigned's knowledge, contains no matter that is libelous or unlawful or that infringed upon anyone else's rights of copyright.

In addition, we affirm that the work is the work of every author listed, and is not under consideration for publication elsewhere, except under circumstances communicated to us in writing at the time the work is submitted.
