Journal of MATERIALS RESEARCH

JOURNAL OF MATERIALS RESEARCH (JMR) is an interdisciplinary journal serving the materials research community through publication of original research articles and invited reviews encompassing the synthesis, processing, characterization, properties, and theoretical description of materials.

JMR publishes new research that demonstrates a significant impact or advance of scientific understanding of interest to the materials research community. Engineering studies and applications to commercial products are beyond the scope of *JMR* and should be submitted elsewhere. Manuscripts that report data without giving an analysis, interpretation, or discussion are only acceptable if the data are sufficiently important that publication is expected to lead to significant new studies or advancements in science or technology.

Manuscripts must be submitted to the *Journal of Materials Research* electronically via ScholarOne manuscripts, at the following website address: <http://mc.manuscriptcentral.com/jmr>. Electronic submission expedites the review process and also allows authors to track the status of their manuscripts at any time. Complete instructions are available on the ScholarOne site and authors will be prompted to provide all necessary information.

Manuscripts must be prepared in English, using a word processing program, formatted to fit 8½ x11 in. paper, and saved as .doc or .pdf files. Separate graphics files (.eps and .tif) must be uploaded for each figure. Authors may also upload .xls or .ppt supplemental files as part of the manuscript submission process. All of these files will be converted to .pdf format. Detailed instructions are available on the submission web site. During submission, authors must enter all coauthor names and e-mail addresses. Manuscripts will not be considered for peer review until this information is provided. Authors must also enter manuscript keywords using the *JMR* keyword list (located on the submission web site). Authors who are not fluent in English must have their manuscript edited for correct English grammar and sentence structure before submission.

Authors are expected to follow the conventional writing, notation, and illustration style prescribed in *Scientific Style and Format: the CSE Manual for Authors, Editors and Publishers, 7th edition, 2006*. Authors should also study the form and style of printed material in this journal. SI units should be used. Authors should use an identical format for their names in all publications to facilitate use of citations and author indexes.

Manuscripts are accepted with the understanding that they represent original research, except for review articles, and that they have not been copyrighted, published, or submitted for publication elsewhere. Authors submitting manuscripts to *JMR* who have related material under consideration or in press elsewhere should send a copy of the related material to *JMR* at the time of submission. While their manuscripts are under consideration at *JMR*, authors must disclose any such related material. To expedite the review process, authors may provide names and contact information for up to four possible reviewers.

Articles are original research reports that include complete, detailed, self-contained descriptions of research efforts. All articles must contain an abstract and section headings.

Commentaries and Reviews: *Journal of Materials Research* occasionally publishes commentaries on topics of current interest or reviews of the literature in a given area. If an author proposes a review, the title, abstract, and a brief outline should be submitted to the Editorial Office via e-mail for prior consultation on the appropriateness of the topic.

Color policy: It is not necessary for authors to indicate that a figure should be displayed in color online. *JMR* will assume that any author who submits figures in color wants and agrees to their being produced in color online. Figures may be printed in color at the author's request for an additional charge. Color figures must be submitted before the paper is accepted for publication, and cannot be received later in the process. Authors cannot submit two versions of the same figure, one for color and one for black and white; only one version can be submitted. Authors need to carefully consider the following when submitting figures in color that will

be published in color online only: 1) The colors chosen must reproduce effectively and the colors should be distinguishable when printed in black and white; 2) The descriptions of figures in text and captions must be sufficiently clear for both online and print copy. When submitting figures to be in color online only, authors should include the phrase <<color online>> in the figure captions. This is the author's responsibility. Authors will see these color figures when viewing their author page proofs on screen. Authors should always print their page proofs in black and white to see how they will appear in print. Authors will NOT be allowed to submit color figures to replace black and white figures in the page proof stage. To maximize the probability that figures will be published in color online and also print as good quality black and white or grayscale graphics, authors are encouraged to follow these figure submission guidelines: 1) Submit a color graphic in Tagged Image File Format (.tif); 2) Submit color graphics with a resolution of at least 300 dpi (600 dpi if there is text or line art in the figure); 3) Submit color graphics in CMYK format; 4) Submit figures sized to fit the actual column or page width of the journal so that reduction or enlargement is not necessary; 5) Submit multipart figures in one single electronic file.

Journal of Materials Research (ISSN: 0884-2914) is published twenty-four times a year by Cambridge University Press, One Liberty Plaza, 20th Floor, New York, NY 10006 for the Materials Research Society. Periodical Postage Paid in New York, NY and additional mailing offices. **POSTMASTER:** Send address changes to *Journal of Materials Research*, c/o Journals Dept., Cambridge University Press, One Liberty Plaza, 20th Floor, New York, NY 10006, USA.

Subscriptions, renewals, address changes, and single-copy orders should be addressed to Subscription Fulfillment, *Journal of Materials Research*, Cambridge University Press, One Liberty Plaza, 20th Floor, New York, NY 10006, USA (for USA, Canada, and Mexico); or Cambridge University Press, University Printing House, Shaftesbury Road, Cambridge, CB2 8BS, England (for UK and elsewhere). Allow at least six weeks advance notice. For address changes, please send both old and new addresses and, if possible, include a mailing label from a recent issue. Requests from subscribers for missing journal issues will be honored without charge only if received within six months of the issue's actual date of publication; otherwise, the issue may be purchased at the single-copy price.

Reprints of individual articles in *Journal of Materials Research* may be ordered. For information on reprints, please contact Cambridge University Press. Reprints of complete back issues older than the prior volume year may be ordered on an individual basis via Cambridge Core. To determine availability, visit the appropriate page for the *JMR* back issue desired (cambridge.org/jmr).

Individual member subscriptions are for personal use only.

Cover: Variation of the SADPs of the Ni_{75+x}(Al_{10V})_{25-x} alloys with deviations from the just-stoichiometric composition. Upper left: 75 at% Ni, upper right: 76 at% Ni, lower left: 77 at% Ni, lower right: 78 at% Ni.

NOVEL SYNTHESIS AND PROCESSING OF METALS

ARTICLES

- | | | |
|-----------|--|---|
| 3061–3070 | Microstructures and tensile properties of off-stoichiometric Ni₃Al–Ni₃V pseudo-binary alloys | Kazushige Ioroi, Satoshi Semboshi, Yasuyuki Kaneno, Takayuki Takasugi |
| 3071–3081 | Precipitation behavior of dispersoids and elevated-temperature properties in Al–Si–Mg foundry alloy with Mo addition | S. Chen, K. Liu, X-G. Chen |
| 3082–3092 | Recrystallization behavior of a cold rolled Ti–15V–3Sn–3Cr–3Al alloy | Aman Gupta, Rajesh Kisni Khatirkar, Tushar Dandekar, Jyoti Shankar Jha, Sushil Mishra |
| 3093–3103 | Cellular automaton modeling of dynamic recrystallization of Ni–Cr–Mo-based C276 superalloy during hot compression | Chi Zhang, Xiaole Tang, Liwen Zhang, Yan Cui |
| 3104–3115 | Composition-dependent hardness and Young's modulus in fcc Ni–X (X = Rh, Ta, W, Re, Os, and Ir) alloys: Experimental measurements and CALPHAD modeling | Juan Chen, Lijun Zhang |
| 3116–3129 | Mechanical, tribological, and electrochemical behavior of hybrid aluminum matrix composite containing boron carbide (B₄C) and graphene nanoplatelets | Qaisar Abbas shafqat, Rafi-ud-din, Muhammad Shahzad, Mahmood Khan, Sultan Mehmood, Waqar Adil Syed, Abdul Basit, Nasir Mehboob, Tahir Ali |
| 3130–3140 | Microstructure and compressive properties of Mg–Zn–Gd alloys containing W-phase nanoparticles developed by the spark plasma sintering of rapid solidification ribbons | Wenbo Luo, Zhiyong Xue, Weimin Mao |
| 3141–3150 | Fabrication and characterization of textured Ni–5 at.% W/Ni–9.3 at.% W/Ni–5 at.% W composite substrates via solid-clad-by-liquid method | Jin Cui, Hongli Suo, Yaru Liang, Jean-Claude Grivel, Lin Ma, Shaheen Kausar, Chunyan Li, Yaotang Ji, Min Liu, Yi Wang |
| 3151–3162 | Investigation on microstructure and mechanical properties of Al–5.50Zn–2.35Mg–1.36Cu alloy fabricated by hot extrusion process | Liang Chen, Yuqiang Li, Jianwei Tang, Guoqun Zhao, Cunsheng Zhang |
| 3163–3172 | Hydrogen embrittlement of C40 transition-metal disilicides | Yong Pan, Delin Pu |

ENERGY CONVERSION AND STORAGE MATERIALS

ARTICLES

- | | | |
|-----------|---|--|
| 3173–3185 | Low temperature-controlled synthesis of hierarchical Cu₂O/Cu(OH)₂/CuO nanostructures for energy applications | Priyanka Marathey, Sakshum Khanna, Ranjan Pati, Indrajit Mukhopadhyay, Abhijit Ray |
| 3186–3194 | In situ hydrothermal synthesis of rGO-wrapped Fe_{1–x}S particles for lithium storage | Meng-Han Wang, Huai-Guo Xue, Sheng-Ping Guo |
| 3195–3203 | Indium tin oxide nanowires as voltage self-stabilizing supercapacitor electrodes | Qiang Li, Zuming Wang, Yuantao Zhang, Peng Hu, Tao Wang, Feng Yun |

(Continued)

3204–3211 Nitrogen-doped zinc/cobalt mixed oxide micro-/nanospheres for high-rate lithium-ion battery anode

Xiaotao Deng, Sirui Li, Jiaqi Wang, Ding Nan, Junhui Dong, Jun Liu

2D AND NANOMATERIALS

ARTICLES

3212–3219 An improved process for the graphene preparation via redox potential control

Yue Zhang, Xuanjun Wang

3220–3230 Inorganic coordination polymer quantum sheets@graphene oxide composite photocatalysts: Performance and mechanism

Shixiong Li, Qiaoling Mo, Xiaoxia Lai, Yufeng Chen, Chuansong Lin, Yan Lu, Beiling Liao

3231–3239 Nanowires assembled from iron manganite nanoparticles: Synthesis, characterization, and investigation of electrocatalytic properties for water oxidation reaction

Asude Cetin, Ahmet M. Önal, Emren Nalbant Esenturk
