VOLUME V - PART 2

(to be published in May, 1965)

- A note on cumulative sums of Markovian variables* R. M. PHATARFOD  
*Neo-Lorentzian relativity* . . . . . S. J. PROKHOVNIK  
*Spans of translates in  $L^p(G)$*  . . . . . R. E. EDWARDS  
*On the radical of a ring with minimum condition.* . D. W. BARNES  
*Infinite linear systems with homogeneous kernel of  
degree  $-1$*  . . . . . T. M. CHERRY  
*A characterisation of the finite Moebius and Similarity  
groups* . . . . . P. J. LORIMER  
*A theorem in asymptotic number theory.* . . . . J. P. TULL

**THE COLLECTED MATHEMATICAL WORKS OF J. H. AND A. G. M. MICHELL** / *Micell Brothers*

Edited by F. W. Niefenfuhr and J. R. M. Radok. With a foreword by Prof. T. M. Cherry / The papers of JOHN HENRY MICHELL (born Maldon, Australia, 1863-1940†) have been of great value for the development of applied mathematicians, and especially of the theory of elasticity, on which he has left an indelible mark.

ANTHONY GEORGE MALDON MICHELL (born Islington, Australia 1870-†1959), mechanical and hydraulic engineer and innovator has achieved a legendary fame through his invention of the tilting-pad thrust-bearing. 1965 - cloth bound - 340 p.p. - Dfl. 25.50 / \$ 7.10

*Available*

**TABLES FOR THE COMPUTATION OF TOROIDAL SHELLS** /

*L. N. Osipova and S. A. Tumarkin*

Translated from the Russian by Morris D. Friedman / These tables are for the solution of differential equations of toroidal shells by an asymptotic method. The tables calculated earlier, are also used herein. The computations of shells become very simple because of the existence of the tables. Meanwhile, the asymptotic method yields simple formulas for the maximum stresses, displacements and other quantities. cloth bound - 126 pp.

*Publication:*  
*June 1965*

**THEORY OF ELASTICITY** / *M. Filonenko-Borodich*

Translated from the Russian by M. Konayeva; edited by G. Ivanov-Mumjiev. 1964 - 378 pp. - cloth bound Dfl. 27.50 - \$ 7.70

*Available*

**THE STRENGTH, FRACTURE AND FATIGUE OF MATERIALS** /

*T. Yokobori*

Translated by S. Mhtsuo and M. Inoue. Edited by J. D. Crisp.

372 pp. - cloth bound approx. Dfl. 50.— - U.S. \$ 13.90

**MATRIX MECHANICS** / *H. S. Green*

With a foreword by Max Born

1965 - 118 pp. - cloth bound - Dfl. 19.75 / \$ 5.50

*Available*

**VECTOR SPACES** / *D. A. Raikov*

Translated from the Russian edition by Leo F. Boron with the assistance of H. R. Stevens and G. F. Votruba. - Approx. 200 pp. - cloth bound Dfl. 28.— - U.S. \$ 7.75

*Publication:*  
*May 1965*

**MONGE-AMPÈRE EQUATIONS OF ELLIPTIC TYPE**

Translated from the first Russian edition by Leo F. Boron, with the assistance of A. L. Rabenstein and R. C. Bollinger. 1965 - 116 pp. - cloth bound Dfl. 17.50 - U.S. \$ 4.90

*Available*

**P. NOORDHOFF LTD. / Scientific publishers**

*Order through your supplier or directly from the publisher*

*P. O. Box 39, Groningen, The Netherlands*
