

investigators would most likely yield no additional facts, for it is evidently a defect in these methods which has led to the disagreement in opinion. At the suggestion of Prof. Spathholtz, of Leipsic, in whose laboratory the research was carried out, Dr. Clark has employed a digestion method especially devised for the isolation of connective tissue, and special methods of staining which have led to conclusions which can leave little further doubt as to the origin of the corpus luteum in the higher animals and in man.

Dr. Clark's monograph is unquestionably the most complete upon the subject which has appeared for many years past, and will be read with interest by all who have worked at the minute anatomy of the ovary.

The Year-Book of Treatment for 1899. Cassell and Company, London, Paris, New York, and Melbourne. Price 7s. 6d.

This annual, now in its fifteenth year, has found a need and kept that need supplied. Not only is this year's résumé of usual excellence, but a larger amount than usual appears to us to be of use to the busy practitioner. Let us, however, at once proceed to the feature of the 1899 edition, viz., the open-air treatment of phthisis, by F. W. Barton Fanning. It is a section of great interest, and of undoubted utility, and we would strongly urge its careful perusal by all practitioners interested in the subject. Especially is it of interest to those who are or who contemplate trying the treatment on their own account. With regard to our special subjects, the names of the sectional editors are sufficient guarantee of excellent and exhaustive work. Mr. G. P. Field and Dr. StClair Thomson, the editors in question, have deserved well of the readers of the Year-Book.

NEW INSTRUMENTS.

Spirit Lamp with Draught Excluder.

THE accompanying cut depicts another of those skilful efforts at reducing the discomforts and annoyances laryngologists suffer

from to a minimum. This spirit-lamp is by Mayer and Meltzer, of 71, Great Portland Street, London, and they inform us that it is in use at Golden Square, and much appreciated there. It certainly has numerous advantages, as, besides allowing, or rather guaranteeing, a steady flame, it protects

surrounding objects from injury, etc. This invention will save much trouble, especially in draughty rooms and clinics.

NOTICE.**International Directory of Laryngologists and Otologists.**

THIS long-promised publication is now ready, and contains the names of eighteen hundred practitioners engaged in the study of Laryngology, Rhinology, and Otology. The first part consists of an alphabetical list, and the latter part of a town list, with full addresses in the greater number of instances. Its price is moderate for the labour involved—viz., three shillings and sixpence for leather and two shillings and sixpence for cloth binding—and may be obtained from The Rebman Publishing Company, 129, Shaftesbury Avenue, London, W.C., on receipt of remittance.

INTERNATIONAL CONGRESS OF OTOLOGY.**Museum Sub-Committee.****A CORRECTION.**

WE beg to call our readers' attention to a correction of the announcement we published in our last issue concerning the International Otological Congress. It is not the specimens themselves which are to be sent to the Hon. Secretary of the Museum Sub-Committee (Mr. Arthur Cheatle) by June 30, but only their descriptions. The specimens are to be deposited at the Examination Hall, Victoria Embankment, between July 26 and August 1, 1899.

THE LENVAL PRIZE.

THIS prize, which has been founded by Baron Léon de Lenval, of Nice, will be awarded at the International Otological Congress to be held in London, from August 8 to 11, 1899.

The regulations for its award which were passed at the Fifth International Otological Congress, held at Florence in 1895, are as follows, viz. :

1. In connection with the International Congresses of Otology, the sum of 3,000 francs has been given to found a prize, bearing the name of "The Lenval Prize."
2. The interest of this sum, which has accumulated between one International Otological Congress and the next, shall be awarded to the author of the most marked progress bearing on the practical treatment of affections of hearing during that time, or to the inventor of any new apparatus which is readily portable and improves considerably the hearing-power of deaf persons.

3. The sum of 3,000 francs will be deposited in a public bank in the hands of the President of the Jury.

4. The International Otolological Congress will elect a Jury each time, consisting of seven members. The Jury will pronounce its decision at the closing meeting of each Congress.

The members of the Jury as at present constituted are Prof. Politzer (Vienna), Dr. Benni (Warsaw), Dr. Gellé (Paris), Prof. Pritchard (London), Prof. St. John Roosa (New York), Prof. Kirchner (Würzburg), and Prof. Grazzi (Florence).

All persons desirous of competing for the prize are requested to communicate without delay with Mr. Cresswell Baber, Hon. Sec. Gen., 46, Brunswick Square, Brighton, England, stating the facts on which their claim is based.

BRITISH MEDICAL ASSOCIATION.

SIXTY-SEVENTH ANNUAL MEETING, PORTSMOUTH,
AUGUST 1, 2, 3 AND 4, 1899.

Section K.—Laryngology and Otology.

President - - E. CRESSWELL BABER, M.B.
Vice-Presidents - { JOSIAH GEORGE BLACKMAN, M.D.
 { PATRICK WATSON WILLIAMS, M.D.

THE meeting of the British Medical Association will be held this year in Portsmouth from August 1 to 4 inclusive.

There will be a special discussion on "The Diagnosis and Treatment of Chronic Empyema of the Frontal Sinus."

Gentlemen having any specimens of interest, Röntgen-ray photographs, etc., connected with the subjects of the section, are invited to exhibit them at the meeting, and to forward them, carriage paid, before Saturday, July 29, to Dr. Cole-Baker, Bayfield, Kent Road, Southsea.

It is particularly requested that titles of papers or communications be sent as soon as possible, and abstracts of such not later than June 15, so that they may be duly notified in the Journal of the Association.

All communications to be addressed to The Secretaries, 101, Harley Street, London, W.

DRS. H. TILLEY, L. COLE-BAKER, and Mr. MUNRO FORDE are the Hon. Secs.
