In the symptomatic treatment of the many disorders resulting from nervous stress, sub-hypnotic doses of 'AMYTAL' ease the tension. They provide a mild sustained cerebral depression without diminishing intellectual capacity. Independent of normally functioning kidneys for their elimination, sedative doses of 'AMYTAL' are entirely destroyed within the body each day. The cumulative effect of longer-acting barbiturates — giving rise to daytime drowsiness, irritability and mental confusion—is thus not experienced with 'AMYTAL.' To relieve nervous tension without jeopardising daytime alertness the physician can safely prescribe 'AMYTAL.'

# Reliability

in delicate Surgery

The THERATOR MINOR  
DIATHERMY, Type MME 3

For the most delicate electro-surgery, the Therator Minor Diathermy reliably provides two distinct cutting-currents, ideal respectively, for ophthalmic and neuro-surgery. Output is valve-generated, perfect coagulation being assured by careful selection of component values. Current intensity is regulated by a single knob and is repeatable at pre-selected control positions. A *de luxe* set of electrodes and mobile trolley complete the equipment if required. Further information is freely available.

 ethopropazine hydrochloride

a new synthetic drug, has been shown to give symptomatic improvement in the varied manifestations of the condition, and its beneficial effect is apparent in both idiopathic and post-encephalitic cases.

The benefit obtained is evidenced by decreased rigidity and increased mobility. In those cases that show improvement the main result of treatment is that posture, gait, facies, speech and everyday muscular activity tend to improve and in some cases actually return to normal. 'Lysivane' is supplied in containers of 50 and 500 x 50 mgm. tablets.
