

**JOURNAL OF  
PLASMA PHYSICS**

JOURNAL OF PLASMA PHYSICS exists for the publication of experimental and theoretical research papers on plasma physics and its applications.

EDITOR

DR J. P. DOUGHERTY

*Department of Applied Mathematics and Theoretical Physics, University of Cambridge,  
Silver Street, Cambridge, England*

ASSOCIATE EDITORS

PROF. D. BERSHADER

*Department of Aeronautics and Astronautics,  
Stanford University, Stanford, California 94305, U.S.A.*

PROF. F. D. KAHN

*Department of Astronomy,  
University of Manchester, Manchester 13, England*

PROF. W. B. THOMPSON

*Department of Physics,  
University of California, La Jolla, California 92038, U.S.A.*

Authors wishing to have papers published in the JOURNAL should communicate them to any one of the persons named above, choosing one in their own country where possible.

Authors are urged to ensure that their papers are written clearly and attractively, in order that their work will be readily accessible to readers.

Manuscripts should be typed in double spacing on one side of the paper only with references listed at the end in alphabetical order of authors. Drawings should be done in Indian ink on plain white or transparent paper, and should not be larger than 15 in. by 24 in. Lettering should be shown clearly in pencil for reproduction by the printer, and as far as possible information relating to a figure should be placed in the caption rather than on the figure. A typed list of captions should be provided at the end of the manuscript. Proofs of papers from overseas will usually be despatched to authors by airmail. There is no charge for publication. Authors are entitled to receive 50 offprints of a paper in the JOURNAL free of charge, and additional offprints can be purchased if ordered in advance.

For permission to reproduce material from *Journal of Plasma Physics*, please apply to the London or New York office of the Cambridge University Press.

ISI Tear Service, 325 Chestnut Street, Philadelphia, Pennsylvania 19106, U.S.A. is authorized to supply single copies of separate articles for private use only.

JOURNAL OF PLASMA PHYSICS is published once every two months in January, March, May, July, September and November, by Cambridge University Press P.O. Box 92, London NW1 2DB and 32 East 57th Street, New York, N.Y. 10022.

Three parts form a volume. The subscription price of a volume (which includes postage) is £12 net (\$37.50 in the U.S.A.). Single parts cost £5 net (\$15.50 in the U.S.A.) plus postage.

Copies of the journal for subscribers in the United States of America are sent by air to New York to arrive with minimum delay.

Second class postage paid at New York, N.Y.

# CONTENTS TO VOLUME 8

## PART 1 AUGUST 1972

Reformulation of quasi-linear theory. A. N. KAUFMAN	page 1
X-ray fine structure of dense plasma in a co-axial accelerator. W. H. BOSTICK, V. NARDI and W. PRIOR	7
Current sheath studies in a co-axial plasma focus gun. S. P. CHOW, S. LEE and B. C. TAN	21
The velocity of a wave packet in an anisotropic absorbing medium. K. SUCHY	33
Ray tracing in an anisotropic absorbing medium. K. SUCHY	53
Diffusion controlled breakdown of gases in a rectangular microwave cavity. D. C. MALDONADO and I. L. AYALA	67
Hydromagnetic flow about a curved neutral sheet. M. TESKE and S. H. LAM	77
Ergodic behaviour of nonlinear hydromagnetic waves in a cold collisionless plasma. Y. INOUE and N. KIMURA	97
On the stability of nonlinear cold plasma waves. E. INFELD	105
REVIEW	
<i>Shock waves in collisionless plasmas by D. A. Tidman and N. A. Krall</i>	111

## PART 2 OCTOBER 1972

Nonlinear radio-frequency response of a non-uniform plasma slab-condenser system with realistic density and velocity profiles. R. BAILLIEU, A. M. MESSIAEN and P. E. VANDENPLAS	113
Comparison of wave propagation in the stationary and moving plasma: motion and wave propagation along the magnetic field. D. N. SRIVASTAVA	127
The thickness of perpendicular collisionless shocks in a hot plasma. R. A. CAIRNS	137
Turbulence in weakly ionized plasma. D. S. BUGNOLO	143
Nonlinear stabilization of cold beam-plasma instability. M. R. GUPTA	159
Instability of a large-amplitude plasma wave due to inverted trapped particle population. C. S. LIU	169
On the nonlinear damping of a plasma mode. R. NANDAN and G. POCOBELLI	175

Short life mode of electrostatic cyclotron waves. H. OYA	<i>page</i> 183
Plasma heating and acceleration due to Landau damping of hydromagnetic waves. A. BARNES and R. J. HUNG	197
Total reflection of a plane wave by a semi-infinite random medium. P. L. SULEM and U. FRISCH	217
Electron density and temperature measurements in the lower ionosphere as deduced from the warm plasma theory of the h.f. quadrupole probe. J. M. CHASSERIAUX, R. DEBRIE and C. RENARD	231
Cyclotron resonance in an inhomogeneous plasma. M. J. LAIRD	255

### PART 3 DECEMBER 1972

Energy absorption in cold inhomogeneous plasmas: the Herlofson paradox. F. W. CRAWFORD and K. J. HARKER	261
Characteristics of the electric field far from and close to a radiating antenna around the low hybrid resonance in the ionospheric plasma. C. BEGHIN and R. DEBRIE	287
Propagation of electronic longitudinal modes in a non-Maxwellian plasma. D. HENRY and J. P. TREGUIER	311
Measurement of ion-rich sheath thickness by ion acoustic wave. S. WATANABE, O. ISHIHARA and H. TANACA	321
Cylindrically symmetric waves in the magnetohydrodynamic approximation. M. L. WOOLLEY	331
Effect of the plasma inhomogeneity on the nonlinear damping of monochromatic waves. E. ASSEO, G. LAVAL, R. PELLAT, R. WELTI and A. ROUX	341
Kinetic theory of a two-dimensional magnetized plasma. Part 2. Balescu-Lenard limit. G. VAHALA	357
Kinetic theory of a two-dimensional magnetized plasma. Part 3. Limit of very large magnetic field. G. VAHALA	375
Ion cyclotron instability in current-carrying plasmas with anisotropic temperatures. K. F. LEE	379
The instability of hydrodynamic longitudinal oscillations in a non-uniform magnetoactive plasma. V. V. DEMCHENKO and I. A. EL-NAGGAR	387
Effects of collisions and gyroviscosity on gravitational instability in a two-component plasma. F. HERRNEGGER	393
INDEX TO VOLUME 8	401
