Aims & Scope

Founded 20 years ago, this journal covers the entire field of clinical neurophysiology and addresses all those interested in electroencephalography, electromyography, evoked potentials and other investigative approaches in neurology and psychiatry, and, in general, in the functional exploration of the nervous system and its pathophysiology. *Neurophysiologie clinique/Clinical Neurophysiology*, as the official publication of the French-speaking Société de Neurophysiologie Clinique, publishes review articles, original articles, short communications, and letters to the editor presented at the meetings of the Society, as well as articles directly submitted to the editorial

All manuscripts are reviewed by two experts, one of whom is usually non-French. The majority of articles are presented in French but the journal equally accepts papers written in English. Abstracts both in English and French.

Audience

Neurologists, neurophysiologists, clinical neurophysiologists, EEGers, EMGers, EPers

Abstracted/indexed in

Biological Abstracts, Brain Information Service, CNRS/Pascal, Excerpta Medica, Index Medicus
