CAMBRIDGE JOURNALS

European Journal of Applied Mathematics

Co-Editors-in-Chief
S. D. Howison, *University of Oxford, UK*
A. A. Lacey, *DPMMS, Heriot-Watt University, UK*
M. J. Ward, *University of British Columbia, Canada*

Since 2008 *EJAM* surveys have been expanded to cover Applied and Industrial Mathematics. Coverage of the journal has been strengthened in probabilistic applications, while still focusing on those areas of applied mathematics inspired by real-world applications, and at the same time fostering the development of theoretical methods with a broad range of applicability. Survey papers contain reviews of emerging areas of mathematics, either in core areas or with relevance to users in industry and other disciplines. Research papers may be in any area of applied mathematics, with special emphasis on new mathematical ideas, relevant to modelling and analysis in modern science and technology, and the development of interesting mathematical methods of wide applicability.

JFM Rapids (online only)

R1 Stabilization of a swept-wing boundary layer by distributed roughness elements
S. M. Hosseini, D. Tempelmann, A. Hanifi, & D. S. Henningson

R2 Stratified precessional flow in spherical geometry
X. Wei & A. Tilgner

S indicates supplementary data or movies available online.

718 ISSN 0022-1120
Journal of Fluid Mechanics 10 March 2013

1 Natural logarithms
B. J. McKeon

5 Control of stationary cross-flow modes in a Mach 3.5 boundary layer using patterned passive and active roughness
C. Y. Schuele, T. C. Corke & E. Matlis

39 Self-limiting and regenerative dynamics of perturbation growth on a vortex column
F. Hussain & E. Stout

S 89 The role of large-scale vortical structures in transient convective heat transfer augmentation
D. O. Hubble, P. P. Vlachos & T. E. Diller

116 Initial growth of a disturbance in a boundary layer influenced by a circular cylinder wake
G. He, J. Wang & C. Pan

131 Nonlinear vorticity-banding instability in granular plane Couette flow: higher-order Landau coefficients, bistability and the bifurcation scenario
P. Shukla & M. Alam

181 Libration-induced mean flow in a spherical shell
A. Sauret & S. Le Dizès

210 The role of wake stiffness on the wake-induced vibration of the downstream cylinder of a tandem pair
G. R. S. Assi, P. W. Bearman, B. S. Carmo, J. R. Meneghini, S. J. Sherwin & R. H. J. Willden

246 Stability of a liquid ring on a substrate
A. G. González, J. A. Diez & L. Kondic

280 Phase-averaged equation for water waves
O. Gramstad & M. Stiassnie

304 Experimental evidence for a short-wave global mode in film flow along periodic corrugations
Z. Cao, M. Vlachogiannis & V. Bontozoglou

321 Skin friction on a moving wall and its implications for swimming animals
U. Ehrenstein & C. Eloy

347 Lattice ellipsoidal statistical BGK model for thermal non-equilibrium flows
J. Meng, Y. Zhang, N. G. Hadjiconstantinou, G. A. Radtke & X. Shan

371 Nonlinear long waves over a muddy beach
E.-I. Garnier, Z. Huang & C. C. Mei

S 398 Direct numerical simulations of local and global torque in Taylor–Couette flow up to $Re = 30\,000$
H. J. Brauckmann & B. Eckhardt

428 Longwave Marangoni convection in a surfactant solution between poorly conducting boundaries
S. Shklyaev & A. A. Nepomnyashchy

457 Stability of a Gaussian pancake vortex in a stratified fluid
M. E. Negretti & P. Billant

481 Contact lines with a 180° contact angle
E. S. Benilov & M. Vynnycky

507 A simple constitutive model for predicting the pressure histories developed behind rigid porous media impinged by shock waves
O. Ram & O. Sadot

524 Dispersive shock waves in viscously deformable media
N. K. Lowman & M. A. Hoefer

558 Fluid drainage from the edge of a porous reservoir
Z. Zheng, B. Soh, H. E. Huppert & H. A. Stone

S 569 Influence of membrane viscosity on capsule dynamics in shear flow
A. Yazdani & P. Bagchi

596 Self-similar mean dynamics in turbulent wall flows
J. C. Klewicki
