## BRITISH JOURNAL OF ADDICTION

Editor: Griffith Edwards, Deputy Editor: Martin Raw, 4 Windsor Walk,  
National Addiction Centre, London SE5 8AF, UK

Founded in 1884 the *British Journal of Addiction* is the longest established journal in its field. The emphasis of the journal is international (with a special interest in developing world problems), and multidisciplinary. As well as carrying important research reports, it publishes many review articles and provides a forum for special features, including a series of 'Journal Interviews', a series of 'Data Notes', 'News and Notes', Letters and a Book Review Section. The main focus of the journal is on the broad area of drug, alcohol and nicotine studies with occasional papers on other 'compulsive behaviours' such as gambling. *British Journal of Addiction* is the official journal of the Society for the Study of Addiction to Alcohol and Other Drugs.

This journal is covered by: *Index Medicus*; *Current Contents*; *Psychological Abstracts*; *Science Citation Index*; *Social Sciences Citation Index*; and *ISI/BioMed*.

### Recent and forthcoming articles include:

Meta-analysis in aid of alcohol studies. Griffith Edwards

Tobacco and the European common agricultural policy. Luk Joossens & Martin Raw

Coherence of the dependence syndrome in cocaine users. Kendall J. Bryant *et al.*

Estimating drug consumption in opioid users: reliability and validity of a 'recent use' episodes method. Shane Darke *et al.*

A scale for estimating the health status of opioid users. Shane Darke *et al.*

Public support for warning labels on alcoholic beverage containers. Michael E. Hilton & Lee Kaskutas

Problem drinking and family history. Keron D. Fletcher *et al.*

Tobacco advertising restrictions, price, income and tobacco consumption in OECD countries, 1960–1986. Murray Laugesen & Chris Meads

Regulation and abuse liability testing of medicines in Europe beyond 1992. Fernando García Alonso

Utility of subjective-effects measurements in assessing abuse liability of drugs in humans. Marian W. Fischman & Richard W. Foltin

1992 – Volume 87 (12 issues). ISSN 0952-0481.

## Annals of CLINICAL PSYCHIATRY

### Official Journal of the American Academy of Clinical Psychiatrists

*Editor-in-Chief, Charles L. Rich, MD*, Department of Psychiatry and Behavioral Sciences, Health Sciences Center, State University of New York, Stony Brook, New York, USA

This journal is designed to provide an audience of practicing clinical psychiatrists with up-to-date information regarding the phenomenology and/or treatment of persons with psychiatric disorders. Although the emphasis is on results of controlled clinical studies, review articles that present new appraisals of pertinent clinical topics are also included. **Annals of Clinical Psychiatry** also publishes reviews of books that are relevant to the provision of psychiatric patient care. Letters about published original articles, either in support or offering meaningful debate, are reviewed and accepted if they suggest important insights.

**Annals of Clinical Psychiatry** is abstracted/indexed in: *Current Awareness in Biological Sciences*; *Excerpta Medica (EMBASE)*; *Psychological Abstracts (PsycINFO)*; *Reference Update*; and *Referativnyi Zhurnal*.

Submissions from Eastern Europe should, for the time being, be sent to the Deputy Editors.

Submissions from non European countries can be sent to any of the preceding editors.

Papers that do not conform to the general criteria for publication in *European Psychiatry* will be returned immediately to authors to avoid unnecessary delay in submission elsewhere.

**Organisation of the manuscript.** Manuscripts should be typewritten/printed double-spaced with wide margins throughout. Title page, abstracts, tables, legends to figures and reference list should each be provided on separate sheets of paper. The title page should include: the title, the name(s) and affiliation(s) of the author(s), an address for correspondence, and telephone/fax numbers for editorial queries. All original and review articles should include an abstract (a single paragraph of no more than 150 words) and 3-6 key words for abstracting and indexing purposes. For original and review articles, the text should be ordered under the following headings: Introduction, Subjects and methods/Materials and methods, Results, Discussion (may be combined with Results), Conclusion, Acknowledgments (when appropriate), References.

• **Short communications** should not exceed 1500 words or the equivalent space including figures and tables, with abstracts of no more than 50 words.

• **Rapid communications** should not exceed 1000 words or the equivalent space. The summary should consist of no more than 50 words. Only one table and one figure are accepted. Figures (glossy) should be submitted in a form suitable for direct reproduction. References should be limited to a maximum of 10 and are in addition to the 1000 words. To ensure rapid publication, articles must meet a high standard, both in terms of scientific content and presentation. Following acceptance of an article in this category, no further modifications by the author will be allowed. Rapid communications are considered to be articles comprising preliminary but consistent results and will be published within three months following acceptance.

• **Letters to the Editor** (maximum of 500 words) will be processed rapidly and therefore should be sent to the Deputy Editors. To ensure speedy publication, please adhere strictly to the general instructions on style and arrangement; provide only figures and tables suitable for direct reproduction.

• **Illustrations.** Photographs should be presented as glossy prints with high contrast. Figures should be completely and consistently lettered, the size of the lettering being appropriate to that of the illustration, taking into account the necessary reduction in size. Illustrations should be designed to fit either a single column or the full text width. Each illustration should be clearly marked on the reverse side with the name of the author(s), the number of the illustration and its orientation (top).

Colour figures will be included subject to the author's agreement to defray part of the cost.

• **Tables.** All tables must be cited in the text, have titles and be numbered consecutively with roman numerals. Only horizontal lines should be included, and kept to a minimum.

• **References** (Harvard System) Authors are responsible for the accuracy of the references. Only published articles and those in press (the journal should be stated) may be included; unpublished results and personal communications should be cited as such in the text. In the text, a reference should be cited by author and date; when there are more than two authors, state the first author's name followed by 'et al.'. References should be arranged alphabetically at the end of the paper and include, in the following order: all authors (surnames followed by initials), year in parentheses, journal title (abbreviated according to the Serial Sources for the Biosis Data Base), volume number, and inclusive page numbers.

For a book, the editors' names, book title, publisher and publisher's location should appear before volume and page numbers.

Examples:

### Journal article

Lêo H, Rein W, Souche A, Dufour H, Guelfi JD, Malka R, Olié JP (1990) Psychopathological and sociodemographic characteristics of 1231 depressed patients with and without co-existing alcoholism. *Psychiatr & Psychobiol* 5, 249-256

### Book

Takahashi R, R Flor-Henry P, Gruzelier J, Niwa SI (1987) *Dynamics, Laterality and Psychopathology*. Elsevier, Amsterdam

### Chapter in a book

Pinard G, Tetreault L (1974) Concerning semantic problems in psychological evaluation. In: *Psychological Measurements in Psychopharmacology*. Modern Problems in Pharmacopsychiatry, Vol 7 (Pichot P, ed) Karger, Basel, 8-22

• **Nomenclature.** Metric units must be used throughout, laboratory units must be followed by SI units. The generic name of a drug should be used unless the specific trade name of the drug is directly relevant to the discussion.

• **Proofs and reprints.** Proofs will be sent to the author indicated on the title page; no changes to the original manuscript will be allowed at this stage. They should be carefully corrected and returned (preferably by fax) to the publisher within 48 hours after reception. If this period is exceeded, the galleys will be proofread by the editorial staff of the publishing house only and printed without the author's corrections.

• **25 free reprints** are supplied per contribution. Additional reprints may be ordered at the prices quoted on the order form sent to the corresponding author.

• **Copyright.** As soon as the article is published, the author is considered to have transferred his rights to the publisher. Requests for reproduction should be sent to the latter.
