

Volume I
Mechanism of Action

Editor: D. Gottlieb, P. D. Shaw
 Out of print

Volume II
Biosynthesis

Editors: D. Gottlieb, P. D. Shaw
 1967. 115 figures. XII, 466 pages
 Cloth DM 168,-; approx. US \$ 72.50. ISBN 3-50-03725-X

Volume III
**Mechanism of Action
 of Antimicrobial
 and Antitumor Agents**

Editors: J. W. Corcoran, F. E. Hahn
 Assisted by J. E. Snell, K. L. Arora
 1975. 193 figures. XII, 742 pages
 Cloth DM 198,-; approx. US \$ 85.40. ISBN 3-540-06653-5

Volume IV
Biosynthesis

Editor: J. W. Corcoran
 1981. 164 figures. XII, 380 pages
 Cloth DM 198,-; approx. US \$ 85.40. ISBN 3-540-10186-1

"... This book can be recommended to all individuals involved in structural elucidation and synthesis of natural compounds, in the study and production of antibiotics and related bioactive compounds from biological or chemical backgrounds. It is the only available text on biosynthesis of the broad spectrum of antibiotic structures." *FEBS Letters*

"... The elucidation of the pathways that lead to the production of these antibiotics is a fascinating and important story that still has many new twists to it. This volume gives an excellent summary of the skill of Nature as a synthetic organic chemist." *Int. J. of Biochemistry*

"... This latest volume on biosynthesis of antibiotics is part of a series of excellent books published on antibiotics. This volume should be useful to research workers interested in antibiotics and the subject matter of their biosynthesis. It is particularly useful to students of the present and future..." *Chemotherapy*

Volume V (in 2 parts)
 Part 1

**Mechanism of Action of
 Antibacterial Agents**

Editor: F. E. Hahn
 1979. 80 figures, 38 tables. XII, 376 pages
 Cloth DM 176,-; approx. US \$ 75.90. ISBN 3-540-09342-7

Now complete

Part 2
**Mechanism of Action of
 Antieukaryotic and Antiviral
 Compounds**

Editor: F. E. Hahn
 1979. 138 figures, 53 tables. XIII, 470 pages
 Cloth DM 198,-; approx. US \$ 85.40. ISBN 3-540-09396-6

Special price for part 1 and 2 as a set:
 Cloth DM 324,-; approx. US \$ 139.70
 ISBN 3-540-09615-9

"... The well-chosen contributors are each outstanding authorities in their own fields in this rapidly growing area of research... The work contains a wealth of information, much of it recently acquired and elegantly organized. It gives the reader a clear view of the state of the art in this important field..." *ASM News*

Volume VI
**Modes and Mechanisms of
 Microbial Growth Inhibitors**

Editor: F. E. Hahn
 1983. 127 figures. Approx. 370 pages
 Cloth DM 268,-; approx. US \$ 115.50. ISBN 3-540-12169-2

New

Contents: Alafosfalin (R₀ 03-7008, Alaphosphin). – Arabinosylcytosine. – Chloramphenicol. – Emetine, Cryptopleurine, Tylocrebrine, and Other Functionally Related Alkaloids. – Kirromycin and Related Antibiotics. – Anti-β-Lactamase Agents. – Mefloquine. – Metronidazole. – Neothramycin. – Pyrazofurin. – Ribavirin. – Rubradirin. – Silver Sulfadiazine. – Sporamycin. – Streptothricin F. – Novel Inhibitors of Translation in Eukaryotic Systems. – Tunicamycin and Related Antibiotics. – Viral Translation Inhibitors. – Properties of Virginiamycin-like Antibiotics (Synergimycins), Inhibitors Containing Synergistic Components. – Subject Index.

The concluding volume in this series **Antibiotics VI** presents extensive contributions on mechanisms or modes of action of antibiotics, drugs of higher plant origin, and synthetic chemotherapeutics. All articles are written by recognized experts from their own experimental studies. The format of the preceding volumes has been faithfully maintained. The study of **Antibiotics VI** will bring the professional reader up-to-date on the molecular basis of action of clinical, agricultural, and theoretically interesting growth inhibitors.

CAMBRIDGE UNIVERSITY PRESS

Papers for publication should be sent to Professor J. R. Pattison, Department of Medical Microbiology, King's College Hospital Medical School, Denmark Hill, London SE5 8RX. The typescript and two copies should be sent with 3 copies of all tables and illustrations. Papers forwarded to the Editor for publication are understood to be offered to the *Journal of Hygiene* alone, unless the contrary is stated.

General

Careful preparation of manuscripts will promote rapid publication. Authors are advised to refer to a recent issue of the journal in addition to the notes below, paying particular attention to the form of references, tables and figures and the use of symbols and abbreviations. Papers should be in double-spaced typescript throughout (including reference lists, footnotes and legends) on A4 paper with a left hand margin of at least 4 cm.

Format

Papers must commence with a separate title page indicating the full title, initial(s) surname(s), address(es) of the authors and a short title not exceeding 45 characters. Papers should usually be divided into SUMMARY, INTRODUCTION, MATERIALS AND METHODS, RESULTS, DISCUSSION and REFERENCES. Some observations are best described in the form of a continuous narrative with the only subsection being a Summary at the beginning. Such papers will also be considered.

Acknowledgements are put at the end of the discussion after a space of one line.

Tables

Tables should be numbered separately with arabic numerals and each table typed on a separate sheet of paper. Whenever possible they should be so designed that they can be printed across the width of a page. Note that columns and lines are not separated by vertical or horizontal lines but are grouped by the use of braces of varying lengths.

Illustrations

Line drawings, diagrams and charts should be accurately drawn on plain white board or paper or faintly blue-lined graph paper and should not be more than twice publication size. Points should be indicated by the following symbols: ○, △, □, ●, ▲, ■. Lettering and numbering will not be directly reproduced but should be clearly shown either in pencil on the drawing or on overlaid transparent paper.

Illustrations for plates should be sent as unmounted glossy prints with good contrast. If more than one photograph is to be included in a single plate, a rough sketch of the suggested lay-out should be sent.

Legends for figures and descriptions of plates should be typed on separate sheets of paper. Each illustration should bear on the back the author's name and illustration number.

References

In the text references by up to three authors are cited in the form Jones, Smith & Brown (1950) and those by four or more authors in the form Jones *et al.* (1950).

The reference list should be arranged alphabetically and should include authors' names, initials, year of publication in parentheses, title of the paper, name of the journal *in full*, the volume number and first and last page numbers. References to books and monographs should be in the form: authors' names, initials, year of publication in parentheses, title, edition editors (if appropriate), page number(s), place of publication and publisher.
