Dr. R. F. NAUNTON, member of scientific staff, Wernher Research Unit on Deafness, Institute of Laryngology and Otolaryngology, Royal National Throat, Nose and Ear Hospital, London.

POST-TONSILLECTOMY COMFORT

Immediate pain relief—Speedier Convalescence

The pain of traumatized tissues following tonsillectomy, demands its own relief—and points the need for analgesia that quickly reaches the irritated area.

ASPERGUM provides 'salivary analgesia' through the simple act of chewing—it brings pain-relieving acetylsalicylic acid into *intimate* and *prolonged* contact with the tonsillar

region, seldom reached even intermittently by gargling. The rhythmic stimulation of muscular action also aids in relieving local spasticity & stiffness; more rapid tissue repair is promoted. Each pleasantly flavoured chewing gum tablet provides $3\frac{1}{2}$ grains acetylsalicylic acid, permitting frequent use. Particularly suitable for children.

Aspergum

for more than two decades a dependable
and welcome aid to patient-comfort

Ethically promoted in packages of 16 tablets and moisture proof bottles of 36 and 250

WHITE LABORATORIES LTD., 428, SOUTHCROFT ROAD, LONDON, S.W.16
