We have experimentally proved that Listerine is a powerful antiseptic, preventing the development of bacteria and decomposition of vegetable infusions.—*British Medical Journal*, May 3, 1890.

LISTERINE is an efficient, non-toxic ANTISEPTIC of known and definite power, prepared in a form convenient for immediate use.

It is a saturated solution of boric acid, reinforced by the antiseptic properties of ozoniferous oils.

It is unirritating, even when applied to the most delicate tissue.

It does not coagulate serous albumen.

It is quite generally accepted as the standard antiseptic preparation for use where a poisonous or corrosive disinfectant can not be safely used.

It is particularly useful in the treatment of abnormal conditions of the mucosa, and admirably suited for a wash, gargle or douche in catarrhal conditions of the nose and throat.

In proper dilution, it may be freely and continuously used without prejudicial effect, either by injection or spray, in all the natural cavities of the body.

There is no possibility of poisonous effect through the absorption of Listerine

A pamphlet descriptive of the antiseptic, and indicating its utility in medical, surgical and dental practice, may be had upon application to the manufacturers, Lambert Pharmacal Co., Locust and Twenty-first Streets, St. Louis, Missouri, U.S.A., or to their British Agents, Messrs. S. Maw, Son & Sons, 7-12, Aldersgate Street, London, Eng., but the best advertisement of Listerine is

THE CLINICAL JOURNAL

— A WEEKLY RECORD OF —
CLINICAL MEDICINE & SURGERY

With their Special Branches.

THE CLINICAL JOURNAL was founded in 1892 with the object of **SPECIALLY REPORTING** and publishing **CLINICAL LECTURES** given by the leading Physicians and Surgeons of the day—Lectures for the most part delivered at the Hospitals to a few score of Students and quite lost to the General Practitioner who, however much he may desire to keep himself in touch with the progress of the times, is usually unable to attend.

Appreciation of this enterprise is shown by the present position of the Journal, its increasing circulation throughout the world, and the numerous letters received from subscribers.

New subscribers are strongly recommended to secure the **BACK VOLUMES**. It may be confidently asserted that no collection of Lectures more reliable and interesting, nor material of greater practical value, is available to the General Practitioner.

Subscribers write:—

"I consider of all the Medical Journals the 'Clinical Journal' is of the greatest use to the busy general practitioner."

"The fact is the Journal contains the very sort of article the country practitioner wants."

" . . . the Journal has been useful to me in deciding points, many of which are not in text-books."

Ordinary Subscription Terms, payable in advance	{	52 weeks	-	15/6
		26 "	-	8/-
		13 "	-	4/-

3d.	<p>* A SPECIAL REDUCTION OF TWENTY PER CENT. is allowed on the above ordinary subscription terms to those subscribers signifying their intention of taking the Journal for not less than two years.</p>	3d.

'SOLOID' BRAND PRODUCTS

(Trade Mark)

For Medication of the Naso-Pharynx

- ☞ Effective formulæ.
- ☞ Antiseptics, astringents, local anæsthetics, stimulants, etc.
- ☞ Pure active medicaments.
- ☞ Accurately compounded.
- ☞ Yield ideal solutions for douche, spray or gargle.
- ☞ Easy for patients to use.

EXAMPLE—

'SOLOID' Naso-Pharyngeal Compound

℞	Sodii Chloridi	gr. 7
	Boracis	gr. 2½
	Acidi Borici	gr. ¾
	Sodii Benzoatis	gr. ½
	Menthol	gr. 1/50
	Thymol	gr. 1/100
	Cocainæ Hydrochl.	gr. ⅙
	Ol. Gaultheriæ	min. 1/20

Bottles of 25 and 100

BURROUGHS WELLCOME & CO., LONDON

Boundary Stone or Kudurru, recording the sale of certain corn-lands in Babylonia. The inscription begins: "The name of this memorial stone is 'Establisher of the Boundary for ever.'" The purchase-price was reckoned in shekels of silver, actual payment, however, being by barter to the agreed value. The sculpture represents a Babylonian King wearing a richly embroidered robe, from a portion of which is copied the design here shown. Date, circa 1117-1105 B.C.
