### CORRIGENDUM

'The Association of certain types ( $\alpha$  and  $\beta$ ) of *Bact. coli* with infantile gastro-enteritis'

By J. SMITH

p. 222, column 1, five lines from the bottom of the page, should read:

'that the  $\alpha$  type should be given the antigenic formula 0 111 B4 and the  $\beta$  type 0 55 B5, since Dr Kauffmann is now satisfied that what was provisionally called 0 112 should now be termed 0 55.'
