Technology, Growth, and Economic Development  
since the Industrial Revolution

*Edited by Patrice Higonnet,  
David S. Landes, Henry Rosovsky*

In *Favorites of Fortune* a galaxy of distinguished international economists and historians pit economic history against the shaky assumptions of the classical economic theory of natural growth. Their explanations consider the factors of technology, entrepreneurialism, and paths to economic growth, but each reflects an ideological wave of explanation that has marked the last 200 years. No economic historian will be able to ignore these writings.
