

## LIST OF CONTRIBUTED (POSTER) PAPERS

### Observational Programs for Solar and Stellar Irradiance Variability

Cryogenic Absolute Radiometer – CSAR

*J. E. Martin and N. P. Fox*

A Review of the Nimbus-7 ERB Solar Dataset

*H. L. Kyle, D. V. Hoyt, and J. R. Hickey*

Variability of the Solar Constant Measured at Earth's Surface and by Artificial Satellite Nimbus-7

*M. A. M. Shaltout*

Solar Total Irradiance Variations Observed during Minimum through Maximum of Solar Activity Cycle

*A. Mecherikunnel*

Long-Term Variations in Total Solar Irradiance

*J. M. Pap, R. C. Willson, C. Fröhlich, R. F. Donnelly, and L. Puga*

Observations of the Solar Constant with SOLCON (ATLAS 1 & 2) and SOVA 1 (EURECA)

*D. Crommelynck, A. Fichot, B. Penelle, J. Romero, C. H. Wehrli, C. Fröhlich, and V. Domingo*

Solar Total Irradiance Variability from SOVA 2 on Board EURECA

*J. Romero, C. H. Wehrli, and C. Fröhlich*

Fraunhofer Line Variability in the Solar Irradiance Spectrum

*W. C. Livingston*

Long-Term Changes of some Fraunhofer Lines

*I. Vince, J. Skuljan, L. Popovia, and M. Karabin*

Imaging Solar Spectral Irradiance Variations

*J. Harvey, D. Koolbeck, T. Duvall Jr., and S. Jefferies*

Active Region Effects on Solar Irradiance at Na I D Lines

*C. Marmolino, V. Andretta, M. T. Gomez, M. Oliviero, and G. Severino*

Photometer for the Study of Solar Brightness Variations

*E. A. Gurtovenko, I. G. Kesel'man, R. I. Kostyk, S. N. Osipov, Yu. D. Zhugzhda, and N. I. Lebedev*

Absolute Measurements of the Solar Spectrum in the Wavelength Range 310 – 680 nm

*K. A. Burlov-Vasiljev, E. A. Gurtovenko, and Yu. B. Matvejev*

The Brightness on the Solar Disk in the Continuum for the Spectral Range 1.0 – 2.4  $\mu\text{m}$

*E. A. Makarova, E. M. Roshchina, and A. P. Sarychev*

- Solar Spectral Irradiance at 335, 500 & 862 nm from SOVA 2 on Board EURECA  
*C. H. Wehrli, J. Romero, and C. Fröhlich*
- Comparisons of the Mg II Index Products from the NOAA-9 and NOAA-11 SBUV/2 Instruments  
*R. Cebula and M. T. Deland*
- The NOAA/SEL Modified Mg II Center-to-Wing Ratio, 1978 – 1992  
*L. C. Puga and S. D. Bouwer*
- The Solar Ca II K Index and the Mg II Core-to-Wing ratio  
*R. F. Donnelly, O. R. White, and W.C. Livingston*
- The Solar Irradiance between 110 nm and 410 nm Measured by the SUSIM Space Shuttle Instrument  
*M. E. VanHoosier, G. E. Brueckner, D. K. Prinz, and J. Lean*
- An Ultraviolet Spectral Atlas of the Sun between 1190 – 1730 Å  
*P. Brekke*
- Solar Spectral Irradiance Measurements from the HIRES Sounding Rocket Payload  
*J. G. Timothy, P. Bergamini, T. E. Berger, and D. C. Slater*
- Using the Voyager Spacecraft for Solar EUV Spectral Radiometry  
*P. L. Smith, W.H. Parkinson, B.R. Sandel, and J.B. Holberg*
- Analysis of Voyager EUV (500 – 1700 Å) Solar Spectra during the period 1981 – 1992  
*G. de Toma, R. Vervack, B.R. Sandel, and R. Stalio*
- Solar cycle Variations in the Extreme Ultraviolet  
*W.D. Pesnell and W. R. Hoegy*
- Solar Cycle 21 and 22 Observed by Pioneer Venus Orbiter  
*W. R. Hoegy and W. D. Pesnell*
- The Observations of Solar EUV Variations near Activity Maxima  
*T. V. Kazachvskaya, A. I. Lomovsky, and A. Nusinov*
- Observed Variability of the Solar EUV Irradiance  
*T. N. Woods, J. Worden, G. J. Rottman, S. C. Solomon, and G. Schmidtke*
- Solar EUV Variability Measurements from Lunar Observations with EUVE  
*P. Judge*
- X-ray Irradiance Variability Observed by the GOES Satellite  
*M. J. Aschwanden*
- Variations in Photometric and Spectrophotometric Parameters of Solar Type Stars: Comparison with the Sun  
*I. N. Glushneva and A. V. Kharitonov*
- The List of Stars Recommended as Spectrophotometric Standards  
*E. I. Terez*
- Variable Stars with Hipparcos  
*L. Eyer, M. Grenon, J-L Falin, M. Froeschle, and F. Mignard*

## Variations during Stellar Cycles

*D. V. Gray*

## Spectroscopic and Photometric Variability in T Tauri Stars: Space and Ground-Based Observations

*M. T. V. T. Lago, C. Castro, and J. F. Gameiro*

## Search for Rapid, Small Scale Variability in Optical Emission of Late-Type Flare Stars

*R. Ventura, I. Pagano, G. Peres, and M. Rodono*

## A Stellar Photometer for Doppler Shift Measurements on Oscillating Stars

*P. Costa, S. Catalano, M. Rodono, R. Ventura, and A. Cacciani*

## Variation of the Solar Diameter from Solar Eclipse Observations, 1715 – 1991

*A. D. Fiala, D. W. Dunhan, and S. Sofia*

## Latitudinal Variation of the Solar Limb-Darkening Function

*R. J. Kroll***Variability of Solar and Stellar Irradiance Related to the Network, Active Regions (Sunspots and Plages), and Large-Scale Magnetic Structures**

## Improvement of the Photometric Sunspot Index and Changes of the Sunspot Contrast within the Solar Cycle

*C. Fröhlich, J. M. Pap, and H. S. Hudson*

## Modelling Solar Irradiance Variations with Area Dependent Photometric Sunspot Index

*P. N. Brandt, M. Stix, and H. Weinhardt*

## Facular Excess Radiation and the Energy Balance of Solar Active Regions

*M. Steinegger, P. N. Brandt, H. Haupt, and W. Schmidt*

## On the Cause of Total Irradiance Variations Observed by the CCD Solar Surface Photometer

*J. Nishikawa*

## Contrast Functions of Active Region versus Quiet-Sun Faculae

*J. K. Lawrence and K. Topka*

## Cycle and Latitude Variation of the Number of Network Bright Points

*R. Muller and Th. Roudier*

## Measures of the Solar Magnetic Field

*A. Ruzmaikin, J. Lawrence, and C. Cadavid*

## Ca II K Line Variations in the Sun as a Star during Solar Cycles 21 and 22

*K. R. Sivaraman, S. S. Gupta, R. Kariyappa, P. S. M. Aleem, and K. Sundararaman*

## Variability of the Solar Chromospheric Network over a Solar Cycle

*R. Kariyappa and K.R. Sivaraman*

## Ca II K Line Profile of the Truly Quiet-Sun

*K. R. Sivaraman, S. S. Gupta, and R. Kariyappa*

Long-Term Magnetic Activity in the Sun and Solar-Type Stars

*W. H. Soon, S. L. Baliunas, and Q. Zhang*

Stellar Irradiance Variations due to Surface Temperature Inhomogeneities

*K. G. Strassmeier*

A Diagnostics of Solar Atmospheric Models: Search for "Black Flares"

*L. van Driel-Gesztelyi, H. S. Hudson, B. Anwar, E. Hiei, and S. Tsuneta*

Cyclic Variations of Solar Prominences Magnetic Fields

*I. S. Kim*

Oscillating Loops in Dwarf *M* Stars: A Pointer to a Coronal Heating Mechanism?

*J. G. Doyle and A. D. Andrews*

On Correlation between the Total Solar Irradiance and CI

*P. Gašpar, V. Rušin, and M. Rybanský*

Rotational Characteristics of the Solar Corona: Emission Line Fe XIV 5303 Å Observations 1964 – 1991

*J. Rybák and V. Rušin*

Solar Cycle Variation of the Microwave Spectrum and Total Irradiance

*E. J. Schmahl and M. R. Kundu*

Total Flux at 115 cm and 10.7 cm during Solar Cycle 22

*A. Tlamicha*

Solar Brightness Distribution and its Variability at 3 Millimeter Wavelength

*V. G. Nagnibeda and V. V. Piotrovitch*

Latitudinal Variability of Large-Scale Coronal Temperature and Density Distributions, 1984 – 1992

*M. Guhathakurta and R. R. Fischer*

Variability of Solar Irradiance Related to the Large-Scale Convective Patterns

*P. Ambrož*

New Observations of Solar Cycle Variability

*P. S. McIntosh*

Are Sunspot Magnetic Field Strengths Increasing?

*J. A. McKinnon, J. H. Allen, and C. C. Abston*

## **Empirical Models of Solar Total and Spectral Irradiance Variability**

Long-Term Irradiance Variations of the Sun: What do Solar-Type Stars Tell Us?

*Q. Zhang, W. H. Soon, S. L. Baliunas, G. W. Lockwood, B. A. Skiff, and R. R. Radick*

Modeling the Solar Atmosphere and Irradiance Spectrum

*E. H. Avrett*

Active Region Evolution and Solar Flux Variations

*T. P. Hartsell*

## Chromospheric UV Radiation, the Modeling of Observed Spectral Variability

*J. M. Fontenla*

## On Variability of some Characteristics of Solar Flux

*E. A. Makarova, T. V. Kazachevskaya, and A. V. Kharitonov*

## Lyman-alpha Line Intensity as a Solar Activity Index in the Far Ultraviolet Range

*A. A. Nusinov and V. V. Katyushina*

## SERF3 Model of EUV and UV Temporal Variations

*R. F. Donnelly, D. F. Heath, and B. M. Schlesinger*

## Indices for Estimating Long-Term Coronal Flux Variations

*R. F. Donnelly*

## A Method to Improve Estimates of Solar EUV Flux

*S. D. Bower and W. K. Tobiska*

## Interplanetary Hydrogen and the Variable Sun

*E. Kyrölä, T. Summanen, and P. R. Raback*

## Cosmic Rays – an Indicator of Solar Activity

*V. Rušin and M. Rybanský*

## Meridional Motions of Sunspot Groups Depending on Different Activity Cycles Determined from Two Independent Sets of Data

*G. Lustig and H. Wöhl*

## A New Method of Analysis of the Photometric and Spectral Data of Stars with Surface Inhomogeneities

*D. P. Kjurkchieva*

## Spot Parameters of CC ERI during 1956/57

*D. P. Kjurkchieva and V. G. Shodrov*

## Active Region Area Coverages on Solar-Type Stars

*A. Giampapa and V. Andretta*

## The Morphology and Evolution of Stellar Dynamo Variations

*S. Saar, A. Brandenburg, S. Baliunas, and R. Donahue*

## Eclipse Imaging and Spot Models of YY Geminorum

*C. J. Butler, E. Budding, J. G. Doyle, B. J. Kellett, G. E. Bromage, T. Simon, and B. Foing*

## Periodicities in Solar Luminosity Data

*T. Bai*

## 152-Day Periodicity during Solar Cycle 22

*A. Özgüz and Atac*

## The Periodicity of Solar Activity Cycle

*Y. V. S. Romanon and N. S. Zgonyaiko*

## Solar and Stellar Oscillations, Irradiance Variations and their Interpretation

Sunspot Umbral Oscillations

*J. Staude*

Radiation-Hydrodynamic Waves and Global Solar Oscillations

*N. S. Dzhililov, Y. D. Zhugzhda, and J. Staude*

Excitation of Solar Gravity Waves

*B. N. Andersen*

Solar Noise Simulations in Radiance and Irradiance

*B. N. Andersen*

Secular Variations in the Spectrum of Solar P-Modes

*A. Jiménez, P. L. Pall, C. Régulo, T. Roca Cortés, and L. S. Duarte*

Phase Differences between Irradiance and Velocity Low Degree Solar Acoustic Modes Revisited

*A. Jiménez*

P-Mode Frequency Variation in Relation to Global Solar Activity

*K. T. Bachmann and T.M. Brown*

Comparison of Helioseismic Parameters of High Degree Solar P-Modes for Different Epochs during Solar Cycle 22

*E. J. Rhodes, Jr., S. G. Korzennik, and A. Cacciani*

Solar Cycle Variations in P-Modes and Chromospheric Magnetism

*R. Jain and B. Roberts*

Wavelet versus Fourier Analysis of Solar Radius Variability

*A. Vigouroux and P. Delache*

On P-Mode Oscillations in Stars from 1 to 2  $M_{\odot}$

*N. Audard and J. Provost*

Asteroseismology of Rapidly Oscillating Peculiar A Stars

*D. W. Kurtz*

"Star as the Sun" Observations in Seismology of Distant Stars

*D. E. Mkrtichian*

Time Correlation between Solar Structural Parameters: P-Mode Frequencies, Radius and Neutrino Flux

*Ph. Delache, V. Gavryusev, E. Gavryuseva, F. Laclare, C. Régulo, and T. Roca Cortés*

Time Variation of the Solar Neutrino Flux

*V. Gavryusev and E. Gavryuseva*

Solar Structure as Constrained by Observed Solar Oscillation Frequencies

*A. N. Cox and J. Guzik*

Using Solar Oscillations to Study the Implications of Element Diffusion for Solar Interior Structure

*J. A. Guzik and A. N. Cox*

The Solar Differential Rotation, Meridional Circulation, and Irradiance Variations

*K. L. Chan and H. G. Mayr*

Differential Rotation of Stellar Convective Zones and Magnetic Dynamo

*G. S. Bisnovaty-Kogan*

Luminosity Variations in a Mean-Field Dynamo

*A. Brandenburg, D. Moss, and I. Tuominen*

On the Magnetic Fluctuations Produced by a Large-Scale Magnetic Field

*A. Brandenburg, F. Krause, A. Nordlund, A. Ruzmaikin, R. F. Stein, and I. Tuominen*

On the Relation of X-ray and H, K Variability to Stellar Dynamo

*N. Kleeorin, I. Rogachevskii, and A. Ruzmaikin*

A Modification of the Torsional Oscillations by MHD Turbulence of the Solar Convective Zone

*N. Kleeorin, I. Rogachevskii, and A. Ruzmaikin*

A New Type of Magnetic Buoyancy as a Trigger of the Sunspot Formation and Solar Oscillations

*N. Kleeorin, M. Mond, and I. Rogachevskii*

## **The Response of the Earth's Atmosphere to Solar Irradiance Variations and Sun-Climate Connections**

Spectral Extrapolation of Solar Irradiance Variability from Nimbus Irradiance Data

*W. Mende*

Variations of the Magnetic Fields of the Sun and the Earth within 7 – 50 Days Period

*V. P. Bobova and N. N. Stepanian*

The Investigation on Factors Effecting Solar Irradiance and Climate Variability

*Chen Xie-zhen*

Ionospheric Ground Patrol of the Solar EUV Irradiance Variability

*L. A. Antonova, G. S. Ivanov-Kholodny, and V. E. Chertoprud*

Thermospheric Airglow Response to the Solar Ultraviolet Irradiance

*S. C. Solomon, S. M. Bailey, and T. N. Woods*

On the Dependence of Total Ozone on the Long-Term Period of Solar Activity

*G. A. Terez and E.I. Terez*

Parallel Solar and Terrestrial Variations: Coincidence or a New Paradigm?

*D. V. Hoyt*

Distinction between the Climatic Effects of the Solar Corpuscular and Electromagnetic Variations

*T. Baranyi and A. Ludmány*

EUDOSSO: A Space Project for Solar Oscillations and Long-Term Variability Relevant to Climatic Changes

*L. Paterno and S. Sofia*

Long-Term Persistence of the Solar Activity

*A. Ruzmaikin, J. Feynman and P. Robinson*

Solar Magnetic and Bolometric Cycles Recorded in Sea Sediments

*G. C. Castagnoli, G. Bonino, A. Provenzale, and C. Taricco*

The Solar Irradiance Variations and Excited Emission of the Organic Molecules in the Flowstones' Microzonal Structure

*V. N. Dermendijev, Y. Y. Shopov, and M.-E. S. Mihailov*

Maximum and Minimum Temperatures at Armagh

*C. J. Butler*
