

# Electrical Probes for Plasma Diagnosis

J. D. Swift PhD, BSc, FInstP.

M. J. Schwar MSc, AInstP.

Gives the research worker a theoretical and practical background to the electrical probe method of plasma diagnostics. The aim throughout has been to survey the theory of electrical probes under as wide a range of plasma conditions as possible, and the range of probe theories and practical details is certainly much greater than in any previous publication; in fact there is no other book concerned solely with this technique of plasma study. Another outstanding feature is the most comprehensive set of graphical data on this topic in a single volume. The c.g.s. system of units is used everywhere in the book.

1970 592 05051 3 334 pages 108 illustrations 140s (£7.00)

## Scottish Universities' Summer Schools in Physics

NOW PUBLISHED

### 9. PHYSICS OF HOT PLASMAS

Edited by B. J. Rye and J. C. Taylor

This volume, ninth in the series of Scottish Universities' Summer Schools in Physics, contains the material presented to the 1968 school and is the first to be devoted to plasma physics.

The topics chosen include kinetic theory, waves and oscillations, instabilities, turbulence, collisionless shocks, computational methods, laser scattering and laser generated plasmas, plasma production and containment.

472 pages. Numerous line diagrams. Hardback. £8

ALREADY PUBLISHED

### 6. PHONONS IN PERFECT LATTICES AND IN LATTICES WITH POINT IMPERFECTIONS

Edited by R. W. H. Stevenson (1965)

Paperback. £2. 15s. (£2.75)

### 7. PARTICLE INTERACTION AT HIGH ENERGIES

Edited by T. W. Priest and L. L. J. Vick (1966)

Paperback £2. 15s. (£2.75) Hardback £6. 6s. (£6.30)

### 8. MATHEMATICAL METHODS IN SOLID STATE AND SUPERFLUID THEORY

Edited by R. C. Clark and G. M. Derrick (1967)

Paperback £3. 3s. (£3.15) Hardback £7. 7s. (£7.35)

## CONTENTS

Diatomic gas-thermal radiation interaction between parallel plates WARREN F. PHILLIPS, VEDAT S. ARPACI and POUL S. LARSEN	<i>page</i> 429
Suppression of runaway of electrons in a Lorentz plasma. II. Crossed electric and magnetic fields BARBARA ABRAHAM-SHRAUNER	441
Effect of Hall current and resistivity on the stability of a gas-liquid system G. L. KALRA, S. N. KATHURIA, R. J. HOSKING and G. G. LISTER	451
Relativistic synchrotron plasma echo E. OTT	471
Precursor ionization effects on magnetohydrodynamic switch-on shock structure MARTIN I. HOFFERT	477
Stability of relativistic anisotropic plasmas to perpendicular magnetosonic waves R. W. LANDAU and S. CUPERMAN	495
The steady-state Vlasov equations for a monotonic electric potential A. SMITH	511
The character of equilibrium of an inviscid, infinitely conducting fluid of variable density in the presence of a horizontal magnetic field with Hall-current P. D. ARIEL	523
The decomposition of a decelerating ionizing shock D. M. SLOAN	531
An exact electrostatic shock solution for a collisionless plasma A. SMITH	549
Effect of gyro-viscosity on Rayleigh-Taylor instability of a plasma N. K. NAYYAR and S. K. TREHAN	563
