

**Announcing an important new journal...**

# **Environment and Development Economics**

*Published in association with the Beijer Institute, Royal Swedish Academy of Sciences*

Editor: Charles Perrings, *University of York*

## **Aims and Scope**

The aim of *Environment and Development Economics* is to provide a forum for the results of the growing body of research into the linkages between economic development and environmental change. It publishes papers addressed equally to the research and policy communities and is designed to be accessible to a broad readership. The journal will publish not only scientific papers in a section on theory and applications but also environmental policy discussion papers published in a regular Policy Options section. Each issue will include non-technical summaries of all papers in these two sections, and regular book reviews and review essays.

## **Forthcoming contents**

Environmental and trade policies: some methodological lessons

V. KERRY SMITH AND J. ANDRESS ESPINOSA

Macroeconomic policies, second best theory and the environment

M. MUNASINGHE AND K. G. MÄLER

Natural resource degradation effects of poverty and the population growth are largely policy-induced: the case of Colombia

J. HEATH & H. BINSWANGER

Measuring sustainable development: progress on indicators

D. PEARCE, K. HAMILTON AND G. ATKINSON

## **Coverage includes:**

- optimal environmental regulation and incentives in a development context
- the valuation of environmental resources in developing countries and incentives in environmental policy
- environmental effects of institutional change
- modelling interdependent economic and environmental processes

## **Subscription Information**

*Published quarterly in February, May, July and October. Volume 1: 1996: £81/\$121 institutions; £42/\$62 individuals. Airmail £18 extra. Special arrangements exist for subscribers in most low-income countries. ISSN 1355-770X.*

## **Further Information** 54333

**"All researchers working in the tropics or who attempt to follow tropical literature will find it essential reading."**

*GH Orians, Nature*

# Journal of Tropical Ecology

Editor: David M. Newbery, *University of Stirling*

**Journal of Tropical Ecology**, first published in 1985, has now become a major international ecological journal. Attractively printed with excellent quality illustrations and tables, it examines the special problems of tropical environments and their proper management. The breadth and quality of papers, the format and price, are also aimed to stimulate the research activities of young ecologists in tropical nations.

Published quarterly by Cambridge University Press, the journal is for all those interested in the biology of the tropics – agriculturalists, foresters, developmental planners, conservationists, and wildlife biologists.

## Subscription Information

**Journal of Tropical Ecology** is published six times a year in January, March, May, July, September and November. Volume 12 in 1996: £118 for institutions; £48 for individuals; £30 for individuals from less developed countries (except Mexico); delivery by airmail £27 per year extra. ISSN 0266-4674.

# Environmental Conservation – Instructions for Authors

*Environmental Conservation* is an international quarterly journal which welcomes

- subject reviews (normally <12 000 words),
- research papers (up to 10 000 words; <4000 for rapid processing),
- guest editorials/comments (<1000 words),
- meeting reports (<1000 words), and
- book reviews (<1000 words),

relevant to scientifically-based conservation of the Earth's environment. The main criteria for acceptance of subject reviews and research papers are originality, scientific rigour, comprehensiveness, appeal to a wide readership, and acceptability of style. Research papers may be in the form of experimental, monitoring or other quantitative studies; case histories are also acceptable. Submission of material implies that it is original, has not been published in more than abstract form, is not being considered for publication elsewhere and that, if published in *Environmental Conservation*, copyright will be vested in the Foundation for Environmental Conservation. It is further understood that any regulations or obligations pertaining to acquisition and dissemination of the data have been complied with, and that the underlying work has been conducted in an environmentally and socially responsible manner. Research papers and subject reviews will be stringently refereed, and actively edited where necessary.

## Initial presentation of typescripts

Typescripts (no diskette version at this stage) must be double-spaced with wide margins, in English (spelling to follow *The Concise Oxford Dictionary*, 9th Edition, 1995, ISBN 0 19 861319 9) and submitted in triplicate together with one set of originals of any illustrations. Submissions are to be sent directly to the Editor, who will normally acknowledge receipt, but cannot be held responsible for safety in transit. The Editor will upon request provide a cost estimate for improving the English of a text and restyling it as necessary. A case for rapid processing of a paper should be made at submission and assumes appropriate length and style. The first page must include in the following order the title, name(s) of author(s), address(es), six keyword entries, a suggested running head, contact information for quick communication with the corresponding author (telephone, facsimile, and email if used) and a word count. It is assumed that contact details are publishable, unless the author at submission expressly asks that they are not to be. The second page must bear a Summary  $\leq 5\%$  of the paper's word count which, independently of the main text, succinctly expresses the purpose, methods, results and implications of the study. A research paper will normally have such sections as: Introduction, Methods (details of study area, analyses, sources of data), Results, Discussion, Acknowledgements and References. The sections should accordingly be so ordered. A subject review should have sections appropriate to the topic addressed, but any methods and sources should preferably be detailed in a separate section.

## Text styles

A recent issue of the journal from Volume 23 onwards should be consulted for style. Units, symbols and related matters are based on the CBE Manual *Scientific Style and Format* (6th Edition, 1994, ISBN 0 521 47154 0). Uncommon currencies should at first mention have a US\$ exchange rate (e.g. '£1=US\$1.55, December 1995'). Authors presenting equations are advised to use software available for the purpose. Common names of organisms should at first mention be accompanied by their full scientific names based on authoritative texts. Scientific names of genera, species and subspecies, but not of higher groups, words foreign to the English language and others suitable for italicization should be underlined, even if typed

in actual italics. Points listed for emphasis should be given as 'bullet' points (as exemplified above), unless specific numbering or lettering is essential. Footnotes will not normally be used.

## References

A recent issue of *Environmental Conservation* from Volume 23 onwards will give examples of most items of stylization. All References must be cited in the text, with three or more authors being represented as '*et al.*'. Where a Reference is not to a recognized periodical or substantive book, but rather to, e.g., an official document, internal technical or consultancy report, greater flexibility may be exercised. Submitted and otherwise unpublished papers should be mentioned in the text only (e.g. 'Harrison & Polunin, unpublished data 1996', or 'Harrison, personal communication 1996'). The chief criterion for correct referencing is that a reader be provided with the information necessary to find the item cited. References which are not strictly necessary for an argument should be omitted.

## Figures and Tables

There should be no duplication of data amongst text, Figures and Tables. All Figures and Tables must be referred to in the text using Arabic numerals in order of use. Figures must be identified on the back with the first author's name and Figure number. Figures must be succinct but clear, necessary and ready for reproduction; photographs must be especially so. Maps must bear scales and photographs should include some indication of scale. Colour illustrations are acceptable if they significantly enhance the text, but authors will be charged for their publication. Figure legends ('captions') should be listed separately from the Figures, while Tables should be presented one per page complete with headings. Figure legends and Table headings should be comprehensive and incorporate any statistical, scale, key, symbol and other reference details necessary for understanding the information involved (see CBE Manual cited above).

## Resubmission of revised typescripts

Authors can expect normally to have their paper returned to them, with comments of both referees and the Editor. Resubmitted typescripts should be in duplicate with one set of originals of any new or revised illustrations. These should be accompanied by a letter detailing how substantive points raised have now been addressed and by IBM-compatible file(s) on a diskette labelled with details of machine, operating system and word-processing software used. Acceptance of a paper for publication in *Environmental Conservation* will normally be confirmed when any outstanding points have been clarified with the Editor, and a copyright transfer form will then be issued for the author(s) to sign.

## Proofs and offprints

Corresponding authors of subject reviews and research papers will receive 25 free offprints (5 for comments). Proofs and offprint order forms will be sent to corresponding authors of subject reviews, research papers and guest editorials/comments. Only typographical errors should normally be corrected at proof stage. Any substantial alterations of content for other reasons must be referred to the Editor.

Dr N.V.C. Polunin, Editor, & Ms H. Harrison, Editorial Assistant, *Environmental Conservation*, Department of Marine Sciences & Coastal Management, University of Newcastle, Newcastle upon Tyne NE1 7RU, UK.

# ENVIRONMENTAL CONSERVATION

An International Journal of Environmental Science

VOLUME 23 No. 1 MARCH 1996

## CONTENTS

### EDITORIAL

A new generation of *Environmental Conservation*. By *Nicholas V.C. Polunin* 1

### COMMENT

Are hydroelectric dams in the Brazilian Amazon significant sources of 'greenhouse' gases? By *Luiz Pinguelli Rosa, Roberto Schaeffer and Marco Aurélio dos Santos* 2

### PAPERS

Threats to biological diversity caused by *coca/cocaine* deforestation in Peru. By *Kenneth R. Young* 7

Natural and human-induced disturbance of seagrasses. By *Frederick T. Short and Sandy Wyllie-Echeverria* 17

Conflicting international policies in tropical timber trade. By *Caroline Amilien* 29

The effect of the reunification of Germany on the water chemistry and ecology of selected rivers. By *Michael S. Adams, Hartmut Kausch, Thomas Gaumert and Karl-Ernst Krüger* 35

Processes of wetland loss in India. By *A. Lee Foote, Sanjeeva Pandey and Naomi T. Krogman* 45

Protecting Hong Kong's marine biodiversity: present proposals, future challenges. By *Brian Morton* 55

Constraints on socio-buffering around the Mantadia National Park in Madagascar. By *Priya Shyamsundar* 67

Conservation and utilization of medicinal plants in high hills of the central Himalayas. By *Nehal A. Farooquee and Krishna G. Saxena* 75

Environmental refugees: a review. By *Rajendra Ramlogan* 81

### MEETING REPORTS

*Ethics and Spiritual Values and the Promotion of Environmentally Sustainable Development* (Arthur H. Westing); *GEF Training and Scoping Workshop* (G. Robin South); *Tropical Forest Remnants: Ecology, Management and Conservation of Fragmented Communities* (William F. Laurance); *Ecological Aspects of Green Areas in Urban Environments, IFPRA World Congress* (Jos De Wael); *Water Quality: Defining the indefinable?* (Ian D. Hogg); *Ecology and Environmental Management on the European Scene* (Sue Everett); *The Biodiversity, Environmental Importance and Sustainability of Tropical Peat and Peatlands* (Jack Rieley and Susan Page); *The Role of Genetics in Conserving Small Populations* (John Warren and David P. Stevens); *International Union of Forestry Research Organizations (IUFRO) XX World Congress* (Kirsi Norros) 89

### BOOK REVIEWS

*Folk Management in the World's Fisheries: Lessons for Modern Fisheries Management*, edited by Christopher L. Dyer and James R. McGoodwin (Simon Jennings); *Restoration of Endangered Species: Conceptual Issues, Planning and Implementation*, edited by Marlin L. Bowles and Christopher J. Whelan (A. John Richards); *Global Change – LOICZ-IGBP-Implementation Plan, Report No. 33*, edited by J.C. Pernetta and J.B. Milliman (Roger H. Charlier); *Environmental Science: Earth As a Living Planet*, by Daniel B. Botkin and Edward A. Keller (Philip B. Thresher); *Water in Italy: Technical, Legal and Administrative Aspects – National Contribution to II Mediterranean Water Conference Promoted by the Commission of the European Communities*, by a team of 40 editors and authors (Roger A. Charlier) 99
