

Directions to Contributors - Concise Version

The *British Journal of Nutrition* publishes original papers, review articles, technical notes and short communications in English in all branches of nutrition. The geographical scope of the journal is international. As a contributor you should note and follow the guidelines set out below. For further information on how the technical content of your paper should be presented please see the **Directions to Contributors** as reproduced in the first issue of a recent volume of *The British Journal of Nutrition* (January or July), or contact the Editorial Office on +44 (0)171 371 6225 (telephone) or +44 (0)171 602 1756 (fax).

Papers should be accompanied by a signed statement to the effect that the author accepts the conditions laid down in the full Directions to Contributors.

Contributors of accepted articles will be asked to assign their copyright, on certain conditions, to The Nutrition Society to help protect their material.

Page format. The *British Journal of Nutrition* is printed in single-column format (column width of 135mm) with a text area of 135 x 203 mm.

Text. Papers should be typed, on one side of the paper only, with double line spacing and ample margins (at least 1.5 cm) on each side and with no underlining or bold in text except for scientific names. Draft-quality print from a word-processor is not acceptable. Standard abbreviations (e.g. Fig. and Figs) and SI units must be used. **When a paper has been accepted, word-processed text stored on floppy disk is encouraged, providing the software is IBM/DOS compatible, but floppy disks must be accompanied by a hard copy. This will enable papers to be handled rapidly, and with fewer typesetting errors.**

Abstract. Each paper must commence with a carefully prepared, accurate, informative abstract, in one paragraph, that is complete in itself and intelligible without reference to text or figures. It should not exceed 250 words. A short title of up to 45 characters should be provided as a running head.

Key Words. Authors should supply two or three key words or phrases (each containing up to three words) on the title page of the typescripts.

Tables. Tables should be reduced to the simplest form, and should not be used where text or illustrations give the same information. They should be submitted on separate sheets at the end of the article and must fit conveniently into single-column or landscape (if absolutely necessary) format. Table captions should be typed on a separate sheet.

Illustrations. Copies only of artwork should be submitted. The original illustrations should accompany the paper after acceptance and revision. Text figures, line drawings, computer-generated figures and graphs should be of sufficient size and quality to allow for reduction by half or two-thirds. Half-tone photographs are acceptable where they are a real contribution to the text. Figure captions should be typed on a separate sheet and numbered corresponding to the relevant Figures.

References. References must be based on the name and year (Harvard) system; **give full journal titles** and conform to the following styles:

Bingham, S. A. & Cummings J. H. (1985). Urine nitrogen as an independent validity measure of dietary intake: a study of nitrogen balance in individuals consuming their normal diet. *American Journal of Clinical Nutrition* 42, 1276-1289.

Haraldsdottir, J. (1989). Dietary history. In *Manual on Methodology for Food Consumption Studies*, pp. 88-92 [M. E. Cameron and W. A. van Staveren, editors]. Oxford: Oxford University Press.

Underwood, E.J. (1977). *Trace Elements in Human and Animal Nutrition*, 5th ed. New York: Academic Press.

Citation of authors in the text should appear in the form: Polaszek (1990) or (Polaszek, 1990). More than one author should be cited in chronological order as: (Holloway *et al.* 1987; Walker & Huddleston, 1988).

Proofs. Two sets of page proofs will be provided to authors for checking; one set should be returned as promptly as possible to Dr I.E. Sambrook, Executive Editor, The British Journal of Nutrition, The Nutrition Society, 10 Cambridge Court, 210 Shepherds Bush Road, London W6 7NJ, UK.

Manuscripts. Four complete copies of the manuscript and artwork should be submitted to:

Dr Keith N Frayn
Chairman of the Editorial Board
The British Journal of Nutrition
The Nutrition Society
10 Cambridge Court
210 Shepherds Bush Road
London W6 7NJ
UK

Contents

Guest Editorial

- Has the tea been ruined?
Lenore Kohlmeier 1-3

Human and Clinical Nutrition

- Dietary practices among Europeans and different South Asian groups in Coventry.
David Simmons & Rhys Williams 5-14
- Metabolic responses to isoenergetic meals containing different proportions of carbohydrate and fat.
Helena A. Whitley, Sandy M. Humphreys, Jaswinder S. Samra, Iain T. Campbell, Donald M. Maclaren, Tom Reilly & Keith N. Frayn 15-26
- Pancreatic enzyme secretion in response to test meals differing in the quality of dietary fat (olive and sunflowerseed oils) in human subjects.
M. D. Yago, M. V. Gonzalez, E. Martinez-Victoria, J. Mataix, J. Medrano, R. Calpena, M. T. Perez & M. Mañas 27-39
- Effect of black tea drinking on blood lipids, blood pressure and aspects of bowel habit.
S. A. Bingham, H. Vorster, J. C. Jerling, E. Magee, A. Mulligan, S. A. Runswick & J. H. Cummings 41-55
- Prevalence and haemopoietic effects of low serum vitamin B₁₂ levels in geriatric medical patients.
David J. Stott, Peter Langhorne, Anne Hendry, Pamela J. McKay, Tessa Holyoake, Jon MacDonald & Norman Lucie 57-63
- Current diet does not relate to bone mineral density after the menopause.
Steven A. Earnshaw, Ann Worley & David J. Hosking 65-72
- Short-term effects of dietary sodium intake on bone metabolism in postmenopausal women measured using urinary deoxypyridinoline excretion.
Georg Lietz, Alison Avenell & Simon P. Robins 73-82

Animal Nutrition

- Nitrogen balance in adult female mink (*Mustela vison*) in response to normal feeding and short-term fasting.
Anne-Helene Tauson, Jan Elnif & Søren Wamberg 83-96
- Effects of experimentally-impaired reticular contractions on digesta passage in sheep.
M. Kaske & A. Midasch 97-110
- Maintenance threonine requirement and efficiency of its use for accretion of whole-body threonine and protein in young chicks.
Hardy M. Edwards III, David H. Baker, Sergio R. Fernandez & Carl M. Parsons 111-119

General Nutrition

- Altered adipocyte properties in the offspring of protein malnourished rats.
P. R. Shepherd, N. J. Crowther, M. Desai, C. N. Hales & S. E. Ozanne 121-129
- Relationship between tissue mobilization and storage in the rat.
Christiani Jeyakumar Henry, Philip R. Payne & Amal Ghusain-Choueiir 131-141
