

Hanks solution for tissue culture in a new, practical and convenient form

The problem of making stable, precipitate free, stock solutions of this buffer for tissue culture has been overcome. Now it is a simple matter to make up a ten times concentrate, which can be autoclaved, from Oxoid Dehydrated Hanks solution in the new twin sachet presentation.

WEIGHING ELIMINATED

One package contains two sachets, A and B. Each makes a stable stock solution which, when mixed together and diluted, will yield 10 litres of working strength buffer. This is by far the most economic way of purchasing the medium.

BUFFERED BICARBONATE SOLUTION, BR 26

Made specifically for use with Hanks solution, this sterile solution has been buffered with carbon dioxide to a pH of 6.9-7.0. It is thus ready for use. Simply pour the contents of one 25 m. bottle into each litre of Hanks solution.

For samples, information and a manual containing details of the Oxoid range, apply to:

Biochemical Studies of Antimicrobial Drugs

Society for General Microbiology Symposium 16

Edited by B. A. NEWTON and P. E. REYNOLDS

A survey of current knowledge of the action of antimicrobial drugs. The authors are concerned with all levels of investigation; the papers range from a discussion of the physiology of antibiotic production to consideration of the molecular interactions of drugs with their binding site.

Of Special Interest

CLINICAL EPIDEMIOLOGY

Second Edition

By **JOHN R. PAUL**, M.D.

Written for the doctor, medical student, biologist, or human ecologist, this book reviews the traditional history of epidemiology, its points of view and methodology, and describes diseases which illustrate these principles. This revised edition also includes discussion of poliomyelitis, cancer, and cancer, associated with smoking.

'The information and concepts outlined in this book are indispensable to the physician who must understand his patient's illness and explain it to the family, to the medical student or intern who is learning about disease, and the public health official who must have a working knowledge of etiology in order that better preventive measures may be carried out in the community.' **JAMES C. HART**, *Connecticut Medicine*.

FAMILY PLANNING AND POPULATION PROGRAMS

Edited by BERNARD BERELSON and Others

This book contains the major part of all that is known to date about organizing, conducting, and evaluating birth and population control programs throughout the world. Doctors, public health administrators, educators, and media specialists discuss population control in their respective countries. The special needs and problems of developing nations are stressed.

Based on a conference recently held in Geneva, Switzerland, under the joint sponsorship of The Population Council and The Ford Foundation, this book points the way to increasingly effective measures. Sixty-one articles are included under the following subjects: National Programs: Achievements and Problems—Organization and Administration of Programs—Contraceptive Methods: Programmatic Implications—Research and Evaluation—Summary: Implications and Major Themes of the Conference.

The Journal of Hygiene is issued in four parts to a volume.

Quotations can be given for back volumes on application.

Papers for publication should be sent to Dr R. M. Fry, Department of Pathology, Tennis Court Road, Cambridge. Other communications should be addressed to the University Printing House, Cambridge.

Papers forwarded to the Editor for publication are understood to be offered to *The Journal of Hygiene* alone, unless the contrary is stated.

Contributors receive twenty-five copies of their paper free. Additional copies, not exceeding two hundred (except in special cases), may be purchased; these should be ordered when the final proof is returned.

The subscription price is £4. 10s. per volume (post free), payable in advance; single numbers 30s. net. Subscriptions may be sent to any Bookseller, or to The Cambridge University Press, Bentley House, 200 Euston Road, London, N.W. 1.

The subscription price in the U.S.A. is \$17.50. Single parts \$5.00. Enquiries should be addressed to the American Branch of the Press at 32 East 57th Street, New York, N.Y. 10022.
