

## Keyword index

- abdominal fat 43  
ADP 123  
affected relative pair 277  
aggression 266  
algorithm based selection 277  
Alzheimer's disease 159  
anemia 113  
anxiety 299, 316  
anxiety disorders 28  
anxious depressed 323  
Apo(a) 152  
ApoA4 152  
ApoE 152  
attachment security 242
- Bayley Infant Mental Development 165  
breast cancer 33
- cancer 33  
cervical length 213  
childhood 134, 259  
CIDI 323  
co-twin control 159  
cognition 165  
cognitive development 234  
colloid osmotic pressure 113  
competition for twins 202  
concordance 33  
congenital dysplasia of hip 7  
conjoined twins 185  
consensus development 205  
consensus measurement 205  
conservative management 71  
contrast effects 251  
CPRS-48 251  
cross-cultural comparisons 142  
CTRS-28 251  
cystic fibrosis disease severity 277  
cytochrome c oxidase 123
- delayed delivery 71  
dementia 159  
depression 299, 316  
development 165  
diabetes mellitus 148  
discordancy 123  
discordant 28  
discriminant analysis 134  
DNA 129  
ductus venosus blood flow 65  
dynamical models 165
- EDAC 299  
environment 92  
environmental 23  
environmental stress 99  
enzyme-histochemistry 123  
epidemiology 33  
ethnographic materials 142  
extreme phenotypes 277
- familial resemblance 152  
familiarity 33  
family history 88  
fertility rates 12  
frailty models 51
- genes 165  
genetic 23  
genetic epidemiology 159  
genetic factor scores 99, 323  
genetics 17, 80, 88, 92, 224, 259, 294, 310, 316  
growth curves 165
- heart rate 259  
heritability 152, 242, 266, 323  
history of medicine 185  
hostility 266  
humour 17  
hypoproteinemia 113
- ICSI 76  
incomplete penetrance 294  
infancy 129  
infanticide 142  
insulin resistance 43, 148  
insulin secretion 148  
intelligence 83
- kinship models 142
- lagged twinning rate 189  
lipoprotein(a) [Lp(a)] concentrations 152  
longitudinal 259  
longitudinal research 92  
low birth weight infant 2
- marital status 189  
maternal age 23  
maternal-infant interaction 234  
mathematical model 148  
metabolic syndrome 43  
methodology 165, 294  
model fitting 17, 224  
monozygotic twins 65, 113  
monozygotic 217  
mood disorders 28  
multiple birth 234  
multiple gestation 113  
multiple sclerosis 33  
multivariate 17
- national statistics 2  
neuroticism 310, 316, 323  
newspaper advertisements 202  
nominal group 205  
non-insulin-dependent 148  
non-shared environment 242  
nuchal translucency 65
- ovarian hyperstimulation syndrome 76
- parent-offspring 152  
personality 310  
placenta 123  
polyhydramnios 113  
population-study 310  
pre-term labor 213  
pre-testing 205  
prediction 99  
pregnancy complication 113  
pregnancy complications 76  
pregnancy outcome 80
- premature delivery, 76  
premature labor 2  
prematurity 234  
preterm birth 80  
probe technique 205  
problem behaviours 251
- QTL finding 323  
qualitative research 205  
quantitative genetic analysis 43  
questionnaire 134  
queuing theory 92
- random hazards 51  
rater bias 224  
reading disability 88  
review 134  
risk factors 7
- schizophrenia 28  
screening 7  
seasonality 189  
secular trends 189  
selected sample 299  
selection 323  
semi-structured interview 205  
sib pair 310  
sib pair selection for QTLs 99  
sib pairs 299  
sibships 316  
singletons 83  
Sinhala 205  
social behaviour 142  
societal strategies 142  
statistics 294  
stillbirth rate 189  
strength training 99
- teenage childbearing 23  
temperament 224  
testosterone 266  
tongue-rolling ability 294  
trends 12  
triplet pregnancy 71  
triplets 2  
twin 129  
twin and sibling study 277  
twin development 92  
twin-sibling study 323  
twin studies 88  
twin study 83, 251  
twin-to-twin transfusion syndrome 113  
twin-twin transfusion syndrome 65  
twin zygosity 134  
twinning 217  
twinning rate 189  
twins 2, 7, 12, 17, 23, 28, 51, 80, 83, 92, 99, 152, 165, 213, 224, 242, 259, 266, 299  
twinship 142
- ultrasonography 213  
ultrasound 7
- volunteer register 202  
vulnerability 316
- Weinberg differential method 202  
zygosity 129
