The Jewish Presence in Latin America

Judith Laikin Elkin and Gilbert Merks, editors

An assumed adherence to Catholic norms has long eclipsed the Jewish presence in Latin America. In this collection, outstanding scholars in various fields examine Latin America's Jewish communities, both as fragments of the Jewish diaspora and as elements in the economic and social life of the continent. An outgrowth of the 1984 Jewish Experience in Latin America Conference, this volume is a major contribution toward developing a realistic picture of Latin American/Jewish communities today. *December 1986 256pp. HB \$23.95 0-04-497012-9 PB \$12.95 0-04-497013-7*

The Falklands/Malvinas War

A Model for North-South Crisis Prevention

Virginia Gamba

This volume views the Falklands/Malvinas war as a tragic, but logical, consequence of contemporary North-South communications problems. With this war as an example, the author highlights the necessity for improved North-South communications and outlines crisis prevention techniques. As the first Latin American civilian scholar to receive a degree in Strategic Studies in the UK, the author possesses a unique view of the Falklands/Malvinas war, and an unparalleled ability to review North-South value systems. *September 1986 298pp. HB \$29.95 0-04-497003-X PB \$14.95 0-04-497026-9*

Population Growth in Latin America and U.S. National Security

John Saunders, editor

If current growth rates of Latin American populations remain unchanged, by the year 2001 North Americans will be outnumbered by approximately 2 to 1 in the Western hemisphere. This volume analyzes the demographic dimensions of Latin America's rapid population growth, and then considers the consequences these dimensions may have for American security. The interrelations between these two issues are discussed for the first time in this comprehensive text by noted scholars in Latin American demography and national security studies. *1986 224pp. HB \$24.95 0-04-497002-1*

Firms, Farms and the State in Colombia

A Study of Rural, Urban and Regional Dimensions of Change

Burt Helmsing

This explanatory work attempts to give focus and direction to the muddled theories associated with regional development. Using Colombia as a basis of study, the author discusses theories of rural and urban change, general and spatial conceptions of rural organization, and the formation of an agro-industrial complex to reshape the rural economy. He presents three case studies, and offers a new, microeconomic approach to the understanding of rural, urban, and regional change. *September 1986 298pp. HB \$37.50 0-04-497003-X*

The Dominican Republic **Politics and Development in an Unsovereign State**

Jan Knippers Black

This timely work offers a general introduction to the Dominican Republic, and places the nation's current economic and political crises in perspective. The text begins with a comprehensive overview of the nation's history, social and economic structures, political institutions, and international ties. It then addresses the political tension generated by the contradictory demands of the Dominican Republic's impoverished population and the representatives of U.S. political, military, and economic interests. 1986 160pp. HB \$22.95

The Political Economy of Revolutionary **Nicaragua**

Rose J. Spaulding, editor

Much that has been written about the Sandinista revolution fails to capture the concrete dynamics of change in Nicaragua. Neither the Reagan Administration nor laudatory statements derived from a sympathetic reading of the Sandinista revolution offer much insight into the actual transition process. This volume attempts to move the debate about Nicaragua beyond this war of rhetoric. It offers solid, analytical exploration of the complex dynamics of revolutionary economic transformation in Nicaragua between 1979 and early 1986. The collection draws on the work of eleven scholars who have been conducting research in Nicaragua since 1980. November 1986 256pp. HB \$23.95 0-04-497014-5

Welfare Politics in Mexico

Papering Over the Cracks

Peter M. Ward

This is the first book to deal simultaneously with several aspects of social welfare provision in a developing country. Ward traces three administrations since 1970, and sets the analysis in the wider context of Latin American affairs. This book's unique contribution is based on the analysis of three substantive welfare areas: land for self-help housing, urban infrastructure, and health. Each area is examined in terms of the nature, motivation, and effectiveness of government intervention. 1986 192pp. HB \$24.95 0-04-361058-7

Nicaragua: Revolution and Democracy

Jose Luis Coraggio

Written from a Central American point of view, this book breaks the barrier of disinformation surrounding the Nicaraguan revolution. It is both an overview of the events that have shaped Nicaragua during the past decade, and a discussion of all pertinent events leading to, and following, the revolution. Also included in this volume are two short treatises on the Nicaraguan government. January 1987 160pp. PB \$9.95 0-04-497019-6

Trail of Miracles

Stories from a Pilgrimage
in Northeast Brazil

CANDACE SLATER

A rich oral literature has developed from the stories of miracles attributed to Padre Cícero Romão Batista who died in 1934. Slater analyzes the best-known tales from Padre Cícero's home town in the backlands of Brazil and provides an illustration of the emergence of an unofficial saint's life with all the force of a communal myth.

Bankers, Generals, and the Struggle for Social Justice

James F. Petras, Haverford College and State University of New York at Binghamton, with Howard Brill, Dennis Engbarth, Edward S. Herman, and Morris H. Morley

In this vigorous analysis of contemporary power relations, Professor Petras and a group of distinguished associates provide a disciplined investigation of the recurring conflicts and economic crises that have made Latin America one of the world's most troubled regions. Petras defines the major conflict as one that pits the majority of the population, who strive for democracy, a higher standard of living, and social justice, against the ruling elites, who are supported by the international banks, local military forces and the United States.

"[The authors] have asked some tough questions about issues that matter profoundly to third world development and come up with provocative, probing, and heterodox arguments that deserve our careful attention." — *Maurice Zeitlin, University of California, Los Angeles*

The Southern Cone

Realities of the Authoritarian State

César Caviedes, University of Florida, Gainesville

Brazil, Argentina, Chile, and Uruguay constitute the "Southern Cone" — a distinct geographic and ideological entity lying within the temperate zone of Latin America. Why has this region, so well endowed by the social and economic standards of the Western world, failed to fulfill the promise of democracy for its people? In this interdisciplinary study, the author explores how these populations have provided fertile ground for leaders who manipulate the middle class, the proletariat, and the Church into accepting authoritarianism, military adventurism, and regional favoritism.

"Highly readable and very informative. Professor Caviedes has a thorough understanding of the Cone countries of South America." — *John P. Augelli, University of Kansas*

INDUSTRY, THE STATE, AND PUBLIC POLICY IN MEXICO

By DALE STORY

A significant analysis of the political and economic roles of the industrial entrepreneurs in postwar Mexico. Story looks at production data and political attitudes of key industrial leaders to explore the meaning of late and dependent development and the nature of the authoritarian state. Story accepts the general relevance of these themes to Mexico but asserts that the country is an important variant of both.

MARY, MICHAEL, AND LUCIFER

Folk Catholicism in Central Mexico

By JOHN M. INGHAM

"In *Mary, Michael, and Lucifer*, there is a wonderful blending of the religious with other cultural domains. . . . contains the best discussion of Mexican peasant ideas about biological conception that I know [and] outstanding analyses of folk medicine, male drinking patterns, and the moral qualities of the landscape in and around Tlayacapan." —STANLEY BRANDES

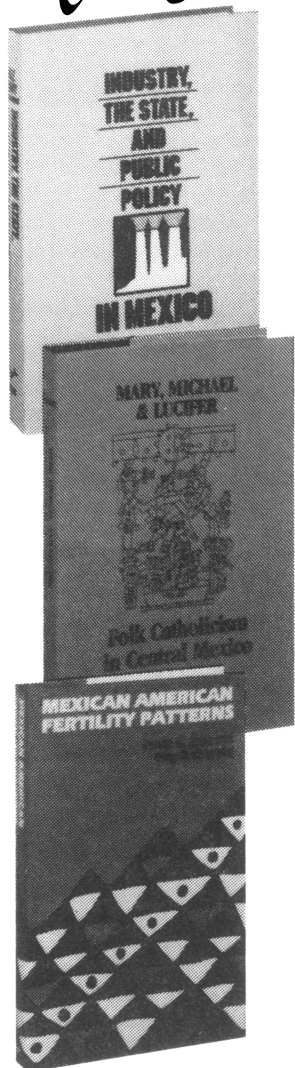

Ingham develops a modern semiotic and structuralist interpretation of traditional Mexican culture, an interpretation that accounts for the culture's apparent heterodoxy. \$25.00 hardcover.

MEXICAN AMERICAN FERTILITY PATTERNS

By FRANK D. BEAN and GRAY SWICEGOOD

". . . this volume makes the most substantial contribution to understanding the fertility of Mexican Americans that has yet appeared in the literature. . . . *Mexican American Fertility Patterns* may well become the standard for excellence in the study of Mexican American fertility." —W. PARKER FRISBIE

Using current U.S. census data the authors evaluate various hypotheses of cultural, social, demographic, and/or economic factors as determinants of fertility differences. \$20.00 hardcover

"A fascinating study of both the Allende years in Chile and causes of revolution in Latin America."--Walter LaFeber, *Cornell University*.

Weavers of Revolution

The Yarur Workers and Chile's Road to Socialism

PETER WINN, *Tufts University*.

Skillfully integrating oral history with penetrating analysis, *Weavers of Revolution* focuses on the workers at the Yarur factory, Chile's largest cotton mill. After Allende took office in 1970, the workers seized control of the mill and proceeded to socialize its operations. They were to learn, however, that Allende's plans for transforming the country were less radical and more gradualist than theirs, and suddenly they found themselves on a collision course with the government. Winn brilliantly captures the turning point of Chile's "democratic road to socialism," showing how a revolution was forged "from below."

"One of the outstanding historical studies to appear in the great wave of new scholarship on Latin America in the last twenty years."--John Womack, Jr., *Harvard University*.

African Slavery in Latin America and the Caribbean

HERBERT S. KLEIN, *Columbia University*.

A leading authority on Latin American slavery has produced a major and original work on the subject. Covering not only Spanish but also Portuguese and French regions, and encompassing the latest research on the plantation system as well as on mining and the urban experience, the book brings together the recent findings on demography, the slave trade, the construction of the slave community and Afro-American culture. The book also sheds new light on the processes of accommodation and rebellion and the experience of emancipation.

Labor in Latin America

COMPARATIVE ESSAYS ON CHILE,
ARGENTINA, VENEZUELA, AND COLOMBIA

Charles Bergquist. Workers, especially those engaged in production for export, have played a major role in the modern history of Latin American societies. This is the bold new thesis of a study that challenges standard interpretations that have usually portrayed workers as passive, weak, or unimportant spectators in the drama of Latin American history. By focusing on the experience of workers in export production—nitrate miners in Chile, meatpackers in Argentina, coffee producers in Colombia, and petroleum workers in Venezuela—the author provides a new comparative perspective on Latin American labor formation, economic development, and political change. More broadly, the study reveals the interpretive utility and philosophical implications of placing labor at the center of modern historical analysis. Illustrated. Cloth, \$39.50; paper, \$14.95

The Catholic Church and Politics in Brazil, 1916-1985

Scott Mainwaring. Nowhere in the Roman Catholic world of the last two decades has the Church proven itself more pastorally innovative, theologically original, and politically progressive than in Brazil—the nation with the greatest number of Catholics in the world. For years the Brazilian military government condemned the Church as a subversive institution, and by 1982 it was in an ongoing battle with the Vatican and the Latin American Bishops Conference. To explain how the Church assumed such great importance, the author analyzes radical Catholicism in Brazil: its precursors, emergence, development, triumphs, dilemmas, and (since 1982) its decline. The book concludes with an analysis of why Brazil's radical Catholics faced an uphill struggle after 1982 as the country continued its transition to liberal democracy. \$36.00
