

DISCUSSIONS

EDITORS' NOTE

N. Scott Arnold's essay, "Marx and Disequilibrium in Market Socialist Relations of Production" appeared in the April 1987 issue of *Economics and Philosophy*. David Schweickart contributed a comment on this essay and that comment elicited a response from Arnold and a further exchange between Schweickart and Arnold. We are pleased to publish this discussion, which, in our view, addresses the issues in the debate over market socialism in an illuminating way.
