# JOURNAL of PALEONTOLOGY

VOL 98 | NO 3 | MAY 2024

## REGULAR ARTICLES

- 331 Mathias Meunier and Taniel Danelian**  
New middle Eocene radiolarian species (Rhizaria, Polycystinea) from Blake Nose, subtropical western North Atlantic Ocean
- 354 Yiling Wang, Lu Liu, Pu Huang, Min Qin and Jinzhuang Xue**  
New material of the zosterophyllopsid *Gosslingia* from the Lower Devonian of Guizhou, southwestern China
- 366 Bing Huang, Yves Candela, Kaiyan Shi and Jiayu Rong**  
A new post-LOME (Late Ordovician Mass Extinction) recovery brachiopod fauna from South China
- 378 Katie F. Welch and Stephen R. Westrop**  
The Cambrian (Paibian–Jiangshanian; Steptoean) dokimocephalid trilobite *Deckera* Frederickson, 1949 in Laurentian North America
- 395 Paul A. Selden and Jason A. Dunlop**  
A remarkable spiny arachnid from the Pennsylvanian Mazon Creek Lagerstätte, Illinois
- 402 James C. Brower, Carlton E. Brett and Howard R. Feldman**  
A crinoid fauna and a new species of *Pycnocrinus* from the Martinsburg Formation (Upper Ordovician), lower Hudson Valley, New York
- 420 John D. Orcutt, Christiana J. Schmer, Jeffrey P. Lubisich, Lacy T. Abrams and Nicholas A. Famoso**  
New occurrences of mammals from McKay Reservoir (Hemphillian, Oregon)
- 432 Pu Huang**  
*Jimaodanus*, a replacement name for the algal genus *Heterocladus* LoDuca, Kluessendorf, and Mikulic, 2003
- 434 Shiladri S. Das, Sandip Saha, Subhendu Bardhan, Subhronil Mondal, Shubhabrata Paul, Sumanta Mallick, Ranita Saha and Warren D. Allmon**  
Comment on: Fürsich et al., 2023, Miocene instead of Jurassic: the importance of sound fieldwork for paleontological data analysis
- 446 Franz T. Fürsich, Suraj Bhosale, Matthias Alberti, and Dharendra K. Pandey**  
Miocene instead of Jurassic: the importance of sound fieldwork for paleontological data analysis—a reply

Cover illustration: *Douglassarachne acanthopoda* n. gen. n. sp., holotype and only known specimen FMNH PE 91366. Photograph of part (left) and reconstruction of the possible appearance of the animal in life (right). Selden and Dunlop, Figs. 2.1 and 4.
