### Special Section: Cathodoluminescence

Introduction: Cathodoluminescence

*Marion Stevens-Kalceff, Colin McRae, and Scott Wight*

High-Resolution Cathodoluminescence Hyperspectral Imaging of Nitride Nanostructures

*Paul R. Edwards, Lethy Krishnan Jagadamma, Jochen Bruckbauer, Chaowang Liu, Philip Shields, Duncan Allsopp, Tao Wang, and Robert W. Martin*

Three-Dimensional Electron Energy Deposition Modeling of Cathodoluminescence Emission near Threading Dislocations in GaN and Electron-Beam Lithography Exposure Parameters for a PMMA Resist

*Hendrix Demers, Nicolas Poirier-Demers, Matthew R. Phillips, Niels de Jonge, and Dominique Drouin*

Cathodoluminescence Microanalysis of Irradiated Microcrystalline and Nanocrystalline Samarium Doped BaFCl

*Marion A. Stevens-Kalceff, Zhiqiang Liu, and Hans Riesen*

Hyperspectral Cathodoluminescence Imaging and Analysis Extending from Ultraviolet to Near Infrared

*C.M. MacRae, N.C. Wilson, A. Torpy, and C.J. Davidson*

Shedding New Light on Cathodoluminescence—A Low Voltage Perspective

*Natasha Erdman, Charles Nielsen, and Vernon E. Robertson*

Ionoluminescence in the Helium Ion Microscope

*Stuart A. Boden, Thomas M.W. Franklin, Larry Scipioni, Darren M. Bagnall, and Harvey N. Rutt*

High Resolution Confocal Microscopy with Simultaneous Electron and Laser Beam Irradiation

*Jonathan Poplawsky and Volkmar Dierolf*

Application of Cathodoluminescence Microscopy and Spectroscopy in Geosciences

*Jens Gätze*

Cathodoluminescence Microscopy and Spectroscopy of Micro- and Nanodiamonds: An Implication for Laboratory Astrophysics

*Arnold Gucsik, Hirotsugu Nishido, Kiyotaka Ninagawa, Ulrich Ott, Akira Tsuchiyama,*

*Masahiro Kayama, Irakli Simonia, and Jean-Paul Boudou*

Cathodoluminescence of Natural, Plastically Deformed Pink Diamonds

*E. Gaillou, J.E. Post, T. Rose, and J.E. Butler*

Hyperspectral Cathodoluminescence Examination of Defects in a Carbonado Diamond

*N.C. Wilson, C.M. MacRae, A. Torpy, C.J. Davidson, and E.P. Vicenzi*

Using Cathodoluminescence Spectroscopy of Cretaceous Calcareous Microfossils to Distinguish Biogenic from Early-Diagenetic Calcite

*J.E. Wendler, J. Wendler, T. Rose, and B.T. Huber*

A Study of Cathodoluminescence and Trace Element Compositional Zoning in Natural Quartz from Volcanic Rocks: Mapping Titanium Content in Quartz

*William P. Leeman, Colin M. MacRae, Nick C. Wilson, Aaron Torpy, Cin-Ty A. Lee,*

*James J. Student, Jay B. Thomas, and Edward P. Vicenzi*

### Materials Applications

Single Atom Microscopy

*Wu Zhou, Mark P. Oxley, Andrew R. Lupini, Ondrej L. Krivanek, Stephen J. Pennycook,*

*and Juan-Carlos Idrobo*

Mean Atomic Number Quantitative Assessment in Backscattered Electron Imaging

*E. Sánchez, M. Torres Deluigi, and G. Castellano*

Three-Dimensional Characterization of Iron Oxide ( $\alpha$ -Fe<sub>2</sub>O<sub>3</sub>) Nanoparticles: Application of a Compressed Sensing Inspired Reconstruction Algorithm to Electron Tomography

*Niven Monsegue, Xin Jin, Takuya Echigo, Ge Wang, and Mitsuhiko Murayama*

Three-Dimensional Structural Characterization of Nonwoven Fabrics

*Lalith B. Suragani Venu, Eunkyong Shim, Nagendra Anantharamaiah, and*

*Behnam Pourdeyhimi*

Nanomorphology of P3HT:PCBM-Based Absorber Layers of Organic Solar Cells after Different Processing Conditions Analyzed by Low-Energy Scanning Transmission Electron Microscopy

*Marina Pfaff, Michael F.G. Klein, Erich Müller, Philipp Müller, Alexander Colsmann,*

*Uli Lemmer, and Dagmar Gerthsen*

Correlation between the Grain Orientation Dependence of Color Etching and Chemical Etching

*Attila Bonyár and Peter J. Szabó*

Contribution of a New Generation FE-SEM in the Understanding of a 2099 Al-Li Alloy

*Nicolas Brodusch, Michel Trudeau, Pierre Michaud, Lisa Rodrigue, Julien Boselli, and*

*Raynald Gauvin*

A Method for Directly Correlating Site-Specific Cross-Sectional and Plan-View Transmission Electron Microscopy of Individual Nanostructures

*Daniel K. Schreiber, Praneet Adusumilli, Eric R. Hemesath, David N. Seidman,*

*Amanda K. Petford-Long, and Lincoln J. Lauhon*

### Biological Applications

Single-Molecule Localization Super-Resolution Microscopy: Deeper and Faster

*Sébastien Herbert, Helena Soares, Christophe Zimmer, and Ricardo Henriques*

Centrosome Fine Ultrastructure of the Osteocyte Mechanosensitive Primary Cilium

*R.E. Uzbekov, D.B. Maurel, P.C. Aveline, S. Pallu, C.L. Benhamou, and G.Y. Rochefort*

The Zona Pellucida Porosity: Three-Dimensional Reconstruction of Four Types of Mouse Oocyte

*Zona Pellucida Using a Dual Beam Microscope*

*Sergi Novo, Leonardo Barrios, Elena Ibáñez, and Carme Nogués*

Morphological and Histochemical Characterization of Gill Filaments of the Brazilian Endemic

*Bivalve *Diplodon expansus* (Küster, 1856) (Mollusca, Bivalvia, Hyriidae)*

*Larissa Rosa Nogarol, Ana Luiza Brossi-Garcia, José Augusto de Oliveira David, and*

*Carmem Silvia Fontanetti*

Comparison of Anatomy and Composition Distribution between Normal and Compression Wood of

*Pinus Bungeana Zucc. Revealed by Microscopic Imaging Techniques*

*Zhiheng Zhang, Jianfeng Ma, Zhe Ji, and Feng Xu*

Effects of Natural Radiation, Photosynthetically Active Radiation, and Artificial Ultraviolet

*Radiation-B on the Chloroplast Organization and Metabolism of *Porphyra acanthophora* var.*

*brasilienis (Rhodophyta, Bangiales)*

*Zenilda L. Bouzon, Fungyi Chow, Carmen S. Zitta, Rodrigo W. dos Santos, Luciane C. Ouriques,*

*Martihellen R. de L. Felix, Luz K.P. Osorio, Claudiane Gouveia, Roberta de Paula Martins,*

*Alexandra Latini, Fernanda Ramlov, Marcelo Maraschin, and Eder C. Schmidt*

Resistance to Degradation of Resin-Dentin Bonds Produced by One-Step Self-Etch Adhesives

*Manuel Toledano, Inmaculada Cabello, Monica Yamauti, Marcelo Giannini, Fátima S. Aguilera,*

*Estrella Osorio, and Raquel Osorio*

### Book Review

*Confocal Raman Microscopy*, Edited by Thomas Dieing, Olaf Hollricher, and Jan Toporski

*Sebastian Schlücker*

## Dear Abbe

### Dear Abbe,

I am engaged to a fellow lab mate. Her lab coat flows as she walks; I am spellbound by her ability to pour gels. I find myself daydreaming of her as I pipette aliquots. Alas, I discovered that she has been dallying with a physicist in the next building! I am inclined to confront the scoundrel and my fiancée. I am not normally a violent sort, but my dander has been mightily raised. How would you deal with this situation?

### *Cuckold in Cremona*

### Dear Cuckold,

Ah, young love; and an old dilemma! Scientific affairs have always been part and parcel to high drama and technological chivalry. Violence is rarely an effective remedy. I remember once when Marie Curie, Paul Langevin, Albert Einstein, and I were in discussion at the Nassauer Hof in Wiesbaden when the paparazzi showed up wanting to catch Marie and Paul together for the local paper. Paul was already angry with an editor who had besmirched Marie's honor with lurid tales of an affair. A challenge to a duel was voiced. Meanwhile Albert and I were trying to explain the concept of "doppelte Beutelfrau" to one of the reporters when Albert (ever the celebrity) tells him in a voice much too loud, "You see, Marie has a sparkling intelligence, but despite her passionate nature, she is not attractive enough to represent a threat to anyone." Mein Godt! Now Paul was threatening Albert! At least I am discreet with my honest appraisals. I propose that you do not try and recover your unfaithful Fräulein but instead break off the engagement with a formal ritual used by that great thespian, Steve Martin. You must go to her in a public venue and say three times "I break with thee!" and then throw dog poop on her shoes. I have done this once with great success, and the handprint on my cheek only lasted a week.

*Herr Abbe is here to provide protocols for all your problems and peccadilloes! Don't let pride stop you from asking. Go ahead, take the plunge, write to his assistant at jpsshield@uga.edu and see if your life doesn't improve.*
