WEEDS is a quarterly journal published by the Association of Regional Weed Control Conferences. Editorial offices are located in E. Roberts Hall, Cornell University, Ithaca, N. Y. Printing is by the W. F. Humphrey Press, Inc., Geneva, New York. Subscription price is \$4.00 yearly or four issues; single copies \$1.25. Address all communications regarding subscriptions to Dr. R. L. Lovvorn, Division of Weed Investigations, Bureau of Plant Industry, U.S.D.A., Beltsville, Maryland. For information on advertising contact Dr. H. L. Yowell, Esso Laboratories, P. O. Box 51, Linden, New Jersey. Manuscripts and inquiries on material for publication should be addressed to the Editorial offices.

Entered as second-class matter at the post office
at Ithaca, New York, and Geneva, New York.

Table of Contents

	<i>Page</i>
Editorials	XII
Papers	
Inactivation of 2,4-D by Riboflavin in Light by J. R. Hansen and K. P. Buchholtz	237
Seeds of Weedy <i>Euphorbia</i> Species and Their Identification by Arnold Krochmal	243
The Effect of Aliphatic Hydrocarbons on the Hypocotyles of Cotton and Soybeans and on the Shoots of Nut grass, Johnson grass and other Weeds by the Directional Spray Technique by O. A. Leonard and V. C. Harris	256
Studies on Spray Retention by Leaves of Different Plants by W. B. Ennis, Jr., Ralph E. Williamson, and K. P. Dorschner	274
Book Notes by Carol Woodward	287
Bibliography of Weed Investigations for October, November, and December, 1951	289

ATLACIDE: A chlorate weed killer...widely used for non-selective eradication of bindweed, Canada thistle, quack grass, Johnson grass and other tough perennials. Kills roots...destroys entire plant...discourages regrowth. Applied as spray or in original dry form. Atlacide is backed by over 25 years of successful use, plus an outstanding reputation as "the safer chlorate".

ATLACIDE WITH 2, 4-D: A combination of Atlacide and 2,4-D acid. Offers dual killing action of sodium chlorate and 2,4-D.

CHLORAX SPRAY POWDER: A non-separating composition of sodium chlorate and pentaborate. For use where long-lasting residual effect is desirable...such as along fence rows, ditch banks, around buildings and other structures. Kills practically all types of weeds and grasses. Creates no fire or poison hazard. Applied dry or as spray.

ATLAS "A": A 40% sodium arsenite solution (4 lbs. arsenic trioxide per gal.). Destroys submersed vegetation in ponds and lakes. Used for selective control of crabgrass, chickweed and clover in turf. Also used as general weed killer for annual weeds and grasses. Kills trees and shrubs. Applied on pulpwood trees as a method for loosening bark to facilitate debarking.

SODIUM ARSENITE: A powder containing 75% arsenic trioxide. Used for the same purposes as Atlas "A". Soluble in water or may be applied dry.

2, 4-D WEED KILLERS: For selective control of broad-leaf weeds in grain and grass crops. Available as 2,4-D Amine and 2,4-D Ester liquids; also 2,4-D Ester dusts.

2,4,5-T Weed Killer
Brush Killer (2,4,5-T & 2,4-D)
Chipman General (Dinitro)
Sodium Chlorate

We maintain a permanent department whose field research is ever seeking new and improved chemicals and methods for weed and brush control.

AMERICAN CHEMICAL PAINT COMPANY

Agricultural Chemicals Division

AMBLER, PA.

Originators of 2,4-D and 2,4,5-T Weedkillers

FOR WEED AND BRUSH CONTROL

Kolker Quality Chemicals

GIVE GREATER KILLABILITY

2, 4-D WEED KILLERS ...

... Esters and Amine salts.

Selected weed killers proved effective against annual and perennial weeds, many types of thistle and cress—and nettle.

2, 4, 5-T BRUSH KILLERS ...

... Isopropyl and Butyl esters.

Low volatile, high kill esters of 2, 4, 5-T recommended and approved for mesquite and other brush control on range and grassland, along railroads, pipelines and other right-of-ways.

To meet increasing demands, Kolker—one of the nation's major producers of weed and brush control chemicals—has expanded production facilities at its Newark plant. Expert technical assistance supplied. Call on Kolker—and be sure of delivery at the right time, at the right price.

Cyanamid

WEED CONTROL CHEMICALS

AERO Cyanate

TRADE MARK

WEEDKILLER

contains 91% potassium cyanate. Used for pre-emergence contact weedkilling, post-emergence selective contact weedkilling, weedkilling by directed spraying, top-killing, defoliation and post-harvest weedkilling. Relatively non-toxic to warm blooded animals. Breaks down immediately on contact with soil so residues are no problem.

AERO Cyanamid

TRADE MARK

GRANULAR

Contains 20% nitrogen and 70% lime. In granular form for easy handling and application. For pre-emergence weed control in peas, corn and other crops. For weed control in tobacco and other plant beds.

AERO Cyanamid

TRADE MARK

SPECIAL GRADE

Contains 21% nitrogen and 70% lime. Used as dust for pre-emergence residual and contact weed control and defoliation of cotton, field beans, and other crops. For top-killing of tomatoes and potatoes.

**THOMPSON-
HAYWARD**

As an expert, you will be asked many times by farmers and others to recommend pesticides.

We wanted you to know about the NEW Thompson-Hayward package...and the BLACK TAG! Yes we've re-designed the label to help the farmer follow out your directions...we've taken the arithmetic out of crop-spraying.

The Black Tag states actual amount of active ingredients contained, making it simple to use.

Kill Brush

- ✓ Safely
- ✓ Effectively
- ✓ Economically

... with "Pittsburgh" BRUSH KILLER!

Pittsburgh liquid chemical brush killers now provide you with a *fast, thorough, low-cost* method of eradicating woody plants, unsightly weeds and nuisance growth from your land. These scientifically formulated, easy-to-use compounds are amazingly effective for clearing pastures and range lands, fence rows, ditches and roadsides. The cost of clearing by *Pittsburgh* Brush Killers (a "Pitt Chem" product) is about *half* the cost of laborious hand-cutting methods. They can be applied in water or oil by all types of spraying equipment. Begin improving the appearance and increasing the value of your land today with the fast, sure *Pittsburgh* brush control method!

Ask your "Pittsburgh" Dealer about these
3 Thoroughly Dependable Brush Killers

- ★ **Pittsburgh 10-20.** A general purpose brush killer for all types of woody growth, containing 2, 4-D and 2,4,5-T.
- ★ **Pittsburgh 2,4,5-T No. 43.** A highly potent brush killer especially recommended for eradicating briars, brambles, etc.
- ★ **Pittsburgh No. 22.** A powerful, heavy-duty brush killer for clearing right of ways, etc.

the precision nozzle for effective spraying

Supplied in a full range of interchangeable orifice tip and strainer sizes to meet every capacity requirement. TeeJet Spray Nozzles for Weed Control by spraying make it possible to take maximum advantage of the chemical and sprayer unit. TeeJet nozzles are precision built and provide a flat spray with uniform distribution. Atomization is properly controlled to give coverage with an absolute minimum of driftage. Patented tip design, with set-back orifice opening protects precision orifice from accidental damage. TeeJet spray nozzles are built for use on spray booms and portable sprayers.

TEEJET SPRAY NOZZLE male pipe connection

TEEJET SPRAY NOZZLE female pipe connection

INTERCHANGEABLE ORIFICE TIPS flat and cone spray types

OFF-CENTER SPRAY NOZZLES

Spraying Systems Spray Nozzles with TeeJet tips are supplied in a variety of special body types to meet any unusual spraying requirement. For example, one type of off-center spray nozzle with swivel body provides a flat spray up to 35 feet wide for spraying areas with a single nozzle, that are not accessible with a boom.

SUPPLEMENTARY EQUIPMENT

Complete accessories relating to nozzle use are supplied. These include strainers, special nozzle fittings, and hand valve equipment.

TeeJet Spray Nozzles are supplied for Weed Control... as well as all other types of agricultural spraying. For complete information and reference data write for Bulletin 58.

BRUSH KILLERS
HAVE *SELF CONTROL*, TOO!

You can count on PITTSBURGH Brush Killers to concentrate and confine their killing action to the sprayed areas only. This "self control" is the result of the low volatile Tetrahydrofurfuryl Esters (THEE)† which all PITTSBURGH Brush Killers now contain.

For ease and economy of use, plus this NEW safety to nearby valuable crops, use PITTSBURGH Brush Killers. †U. S. Patent Pending

- 10-20 BRUSH KILLER:** General farmland clearance.
- BRUSH KILLER 22:** Rangeland clearance, rights-of-way.
- LO-VOL 4:** Mesquite, briars, hard-to-kill woody growth.

WEED AND BRUSH KILLERS

Developed through research... tested and proven in the laboratory and field for effective, economical control of weeds and brush.

DU PONT AMMATE (R) WEED KILLER — One thorough spraying with "Ammate" gives practically complete kill of many kinds of brush and trees. One treatment lasts for years because "Ammate" destroys roots as well as the tops.

DU PONT 80% CMU WEED KILLER — An outstanding, new, powerful weed killer especially suitable for use wherever it is desired to keep the ground bare. Tests indicate that one application of CMU provides effective control of grass and broadleaf weeds for as long as a year or more.

OTHER DU PONT WEED AND BRUSH KILLERS INCLUDE:

2,4-D - 2,4,5-T Ester (low volatile)
2,4,5-T Ester (low volatile)
2,4-D - 2,4,5-T Amine
2,4,5-T 57% Amine
90% Sodium TCA
2,4-D Amine
2,4-D Ester
