Society and Animals publishes studies which describe and analyse our experience of nonhuman animals. The goal of the journal is to stimulate and support an emerging content area within the social sciences consisting of studies of the ways in which nonhuman animals figure in our lives. Findings regarding nonhuman animal experience and behaviour are included only secondarily to that end. **Society and Animals** encourages data-based discussion bearing on ethical policy considerations in the current debate over the place of nonhuman animals in an increasingly human-centred world.

Contents of Volume 3 (1995) include:

- Lynda Birke and Jane Smith – Animals in Experimental Reports
- Janis Driscoll – Attitudes toward Animals: Species Ratings
- Robert Garner – The Politics of Animal Protection
- Elizabeth Paul – Us and Them: Scientists' and Animal Rights Campaigners' Views
- Constance Russell – The Social Construction of Orangutans
