JOURNAL POLICY

The *Journal of Paleontology* publishes original articles and notes on the systematics of fossil organisms and the implications of systematics to all aspects of paleobiology and stratigraphic paleontology. It emphasizes specimen-based research and features high quality illustrations. Comments on articles and replies are considered for publication. Manuscripts should be submitted to the office of the Editors, which handles the review process. The Associate Editors work with authors to produce final copy, and they return manuscripts to the Editors for final processing. Manuscripts submitted elsewhere should not be submitted to the Journal.

Contributors should read the "Preparation of Manuscripts," below; more detailed "Instructions for Authors" were published in the November, 1998 issue (72:1087–1092) and are available on the World Wide Web at <http://www.journalofpaleontology.org>. Manuscripts not adhering to format will be returned to authors for correction before entering the editorial process. Cost of *Journal* publication is taken entirely from membership dues in The Paleontological Society and voluntary page contributions. Authors are charged for changes they make during the proof stage and also for their original mistakes that must be corrected during this stage. A limit of 25 published pages is placed on all papers within the Journal; limited excess pages might be accepted but their cost will be charged to the author. Longer manuscripts must be submitted to the memoir series; all publication costs for memoirs must be paid by authors.

PREPARATION OF MANUSCRIPTS

GENERAL

Important references for format preparation are: 1) The Journal of Paleontology Instructions for Authors (Volume 72, pages 1087–1092) (<http://www.journalofpaleontology.org>); 2) *Suggestions to Authors of the Reports of the United States Geological Survey* (seventh edition) 1991; and 3) *The Chicago Manual of Style* (fourteenth edition) 1993. Where there is conflict, current *Journal* style prevails; any recent issue provides a useful guide, but note changes with the 72:1087–1092 "Instructions for Authors."

Avoid small font sizes; 12-point Times or 10-point Helvetica are appropriate. Double-space throughout, including references and table and figure descriptions; provide ample margins. Use metric measurements. A 7.5–10.0 cm heading is left on the first page above the title. First-page format should follow published examples.

TEXT

ABSTRACT—An abstract of 250 or fewer words is required for articles; abstracts do not accompany notes or other comments. The heading for the abstract is not indented; it is capitalized throughout, and it is followed by two hyphens but no period.

Headings.—Two grades of headings are almost always sufficient. Primary headings are centered and typed in all capital letters. Secondary headings are indented, underlined, and followed by a period and two hyphens. The first two words of the introduction are capitalized and abut the left margin. Do not end manuscript lines with hyphens.

Systematics.—Format for arrangement of systematic paleontology can be found in current issues of the Journal. All descriptions of new taxa must be accompanied by a diagnosis, an indication of type specimens and repository, stratigraphic and geographic data, and specific reference to illustrations of the taxon. Particularly note the format, punctuation, and capitalization conventions used in the synonymy.

REFERENCES

Particular care should be given to reference format. The "Instructions for Authors" provides many examples.

ILLUSTRATIONS

Figures.—All illustrations, including maps and geologic sections, must be numbered in the sequence of their first appearance in the text. "Figure" is used rather than "Plate," and therefore line drawing and photographic figures are numbered in sequence. All illustrations must be submitted at publication size. These sizes are: full page, 18.3 × 23.3 cm; double-column, 18.3 cm; single column, 9.0 cm. Photographic subjects must be illuminated from the upper left, or evenly illuminated. A photograph of a montage is not acceptable. Each illustration must be identified by a numeral.

Digital photographs are encouraged. Figures may be submitted in JPEG only during online submission (highly recommended if the manuscript includes a large number of figures); however, authors will need to use other formats later on to secure acceptance for publication, primarily TIFF and EPS formats—which may also be used during online submission. Line art should be submitted in bitmap mode, with an ideal resolution of 1,200 ppi and a minimum resolution of 600 ppi; use Illustrator, CoreIDRAW, or Canvas. For color photos, use CMYK mode, ideal resolution 350 ppi, minimum 200 ppi; for B/W halftone (black and white photo, or vector art not limited to black and white), grayscale mode, ideal 350 ppi, minimum 200 ppi; for line/halftone combination, grayscale mode, ideal 600 ppi, minimum 200 ppi.
