

Glasgow Mathematical Journal

CONTENTS

N. J. Kalton , Quotients of F -spaces	103
J. M. Howie , Idempotents in completely 0-simple semigroups	109
M. Burmester, R. Forcade and E. Jacobs , Circles of numbers	115
Robert DeVos , Category of sequences of zeros and ones in some FK spaces	121
R. F. Lax , On images and inverse images of Weierstrass points	125
J. Kyle , Ranges of Lyapunov transformations for operator algebras	129
R. D. Byrd, J. T. Lloyd and J. W. Stepp , Groups of complexes of a representable lattice-ordered group	135
I. D. Macdonald , Groups of breadth four have class five	141
Hans Opolka , Projective representations of extra-special p -groups	149
John C. Lennox , Lower central depth in finitely generated soluble-by-finite groups	153
Koo-Guan Choo , Whitehead groups of semidirect products of free groups	155
Robert M. Guralnick , On groups with decomposable commutator subgroups	159
Michael O. Albertson and David M. Berman , An acyclic analogue to Heawood's theorem	163
H. H. Brungs , Unique factorization in rings with right ACC_1	167
Karl-Bernhard Gundlach , On the representation of a number as a sum of squares	173
D. D. Anderson , π -domains, overrings and divisorial ideals	199
D. C. Stocks , Corrigendum	205

GLASGOW MATHEMATICAL JOURNAL

The *Glasgow Mathematical Journal* is a continuation of the *Proceedings of the Glasgow Mathematical Association*, founded in 1952 by the late Professor T. M. MacRobert. It is published with the support of the University Court of the University of Glasgow. The *Glasgow Mathematical Journal* is published in Parts twice yearly, in January and July; two Parts complete a Volume of approximately 200 pages.

The prepaid subscription for each Volume is £10.00 in U.K., \$20.00 in U.S.A., post free. Single parts may be supplied at a cost of £5.00 in U.K., \$10.00 in U.S.A., net.

Copies may be ordered direct from the publisher or from any bookseller.

Information for Contributors

While the *Glasgow Mathematical Journal* is intended primarily for Pure Mathematics, papers on Applied Mathematics will also be accepted. Manuscripts from all parts of the world will be welcomed and given careful consideration.

Manuscripts, preferably typed, should be prepared so as to conform with the practice in current numbers of the *Journal*, especially with regard to line illustrations, references, tables and summaries. The name of the author and the date of the receipt of the manuscript will be printed under the title. Text figures must be suitable for line block reproduction, lettered in pencil, numbered, and separated from the text but allocated clearly to sections of the text.

References should be placed at the end of the paper, arranged and numbered in alphabetical order. In the text, reference numbers should be enclosed in square brackets and underlined, to distinguish them from formula numbers, which should be quoted in round brackets. The following particulars should be given, in the order indicated:

for references to books—*author, title, edition, place of publication, year of publication, page reference*;

for references to articles in periodicals—*author, title of article, short title of periodical, series no. (if any), volume no., year, pagination*.

A proof is supplied once in galley form, together with an Order Form for offprints. Offprints are supplied free to the number of twenty-five; additional copies, if ordered prior to publication, will be supplied, at cost, at the request of the contributor. Excessive corrections may be charged to the author.

Manuscripts should be sent to:
