I'm Cardiac Joe.
I'm in charge
of infection control....really?

3M™ Skin and Nasal Antiseptic
(Povidone-Iodine Solution 5% w/w [0.5% available iodine] USP)
Patient Preoperative Skin Preparation

Meet Joe. He's heading into heart surgery and he's not always good at following the doctor's orders. Joe ate a few hours ago and forgot to use the shower product his doctor provided. He's got bacteria in his nares and his noncompliance is about to wreak havoc on your infection control measures.

Some patients just don't understand the negative impact they can have on their procedural outcomes. Don't give control to Cardiac Joe when you can take charge with 3M™ Skin and Nasal Antiseptic. Administer it one hour before surgery to decrease bacteria in the nares¹. It's easy to apply and is specially formulated to be non-irritating² and drip resistant.

Your first line of defense against surgical site infections occurs in the pre-operative environment. Learn how 3M™ Skin and Nasal Antiseptic can help you reduce bacteria in the nares, which may lower your risk of SSIs. Visit www.3M.com/TakeControl for a free product sample.

Don't let Cardiac Joe, or his nose, blow your infection control program. Take back the control.
