Volume 37 Number 1 February 1988

Integration by parts for some general integrals
U. Das and A. G. Das 1
Some representation formulae for entire functions of exponential type
Clément Frappier 17
On quadratic functionals
Peter Šemrl 27
Demicontinuity of Nemitsky operators on Orlicz-Sobolev spaces
Grahame Hardy 29
Injectivity and injective hulls of Abelian groups in a localic topos
Kiran R. Bhutani 43
Elementary equivalence and genus of finitely generated nilpotent groups
Francis Oger 61
Groups with a nilpotent triple factorisation
Bernhard Amberg, Silvana Franciosi and Francesco de Giovanni 69
Fixed point of sum for concave and convex operators, with applications
Li Bingyou 81
Continuous chaotic functions of an interval have generally small scrambled sets
Ivan Mizera 89
On Chung's strong law of large numbers in general Banach spaces
Bon Dae Choi and Soo Hak Sung 93
On single-law definitions of groups
Vladimir Tasić 101
Projective tensor products and the Dunford-Pettis property
Stephen P. Stehle 107
A dual characterisation of the existence of small combinations of slices
Robert Deville 113
A higher order approximation technique for restricted linear least-squares problems
Heinz W. Engl and C. W. Groetsch 121
Newton-like methods under mild differentiability conditions with error analysis
Ioannis K. Argyros 131
Nonexpansive projections onto two-dimensional subspaces of Banach spaces
Bruce Calvert and Simon Fitzpatrick 149

INFORMATION FOR AUTHORS

The BULLETIN of the Australian Mathematical Society aims at quick publication of original research in all branches of mathematics. Timely expository articles are also welcomed.

To ensure speedy publication, editorial decisions on acceptance or otherwise are taken quickly, normally within a month of receipt of the paper. Papers are accepted only after a careful evaluation by the Editor and an Associate Editor or other expert in the field.

As even minor revisions are generally not permitted, authors should read carefully all the details listed below and on the inside back cover.

For a paper to be acceptable for publication, not only should it contain new and interesting results but also

(i) the exposition should be clear and attractive, and
(ii) the manuscript should be in publishable form, without revision.

Nevertheless some meritorious papers will have to be rejected because speed of publication involves space limitations.

Authors should submit THREE clean, high quality copies to

The Editor, Bulletin of the Australian Mathematical Society,
Department of Mathematics, University of Queensland,
St. Lucia, Queensland, 4067, Australia.

Unless requested at the time, material submitted to the BULLETIN will usually not be returned. Note that each paper submitted must include an abstract and one or more classification numbers following the 1980 Mathematics Subject Classification. (1985 Revision).

Abstracts of PhD Theses

The BULLETIN endeavours to publish abstracts of all accepted Australasian PhD theses in mathematics. One restriction, however, is that the abstract must be received by the Editor within 6 months of the degree being approved.
