The Neuropsychology of Anxiety

An Inquiry into the Functions of the Septohippocampal System

J. A. Gray

This is the first volume to be published in the *Oxford Psychology Series* which will provide accounts of areas in which important developments are taking place. The emphasis will be on both the experimental and theoretical aspects of psychology.

In *The Neuropsychology of Anxiety* the author postulates a behavioural inhibition system, the activity of which constitutes anxiety. He goes on to consider in detail the structure of this system and its mode of operation, with special reference to the septohippocampal system. This leads to a discussion of the effects of long-term stress, the role of the behavioural inhibition system in depressive illness, phobias, and obsessive-compulsive behaviour, and the modes of action of drugs, surgery, and behaviour therapy. £27.50 *Oxford Psychology Series*

Brain and Intelligence in Vertebrates

Euan M. MacPhail

The author provides a comprehensive survey of comparative studies of brain organization, brain size, and intellectual capacity on vertebrates. Chapters concerned with the various vertebrate classes, whose relationships are discussed, develop the theme that there is no conclusive evidence for differences in intellectual capacity among vertebrates (excluding man) and that, among mammals, man's superior general problem-solving ability may be due solely to his possession of language. £20 paperback £10.95

Depression: The Facts

George Winokur

The author deals with all aspects of depression in this simple yet comprehensive book. Specifically aimed at sufferers and their families, the book will also find a market among nurses, social workers, general practitioners—in fact, anyone who has to cope with the problem. £5.95

NOTES FOR CONTRIBUTORS

PAPERS Papers for publication should be addressed to the Editor, Professor Michael Shepherd, Institute of Psychiatry, De Crespigny Park, Denmark Hill, London SE5 8AF. Contributors should send at least three copies of the text, tables, and figures. Copies other than the first may be xeroxed. The S.I. system should be adopted for text and figures. A short synopsis of about 50 words should be provided at the beginning of each article. Foreign quotations and phrases should be followed by a translation. Submission of a paper will be held to imply that it contains original work that has not been previously published and that it is not being submitted for publication elsewhere.

In addition to longer articles, the Editor is prepared to accept preliminary and brief communications of between 1500 and 2500 words.

Manuscripts must be typewritten on one side of the paper in double-spacing with wide margins. The following information must be given on a single separate sheet: (1) title and short title for running head (not more than 100 characters); (2) authors' names, and (3) department in which work was done. Footnotes on the same sheet should list: (i) the authors' present addresses if different from departments in which work was done; (ii) name and address of the author to whom correspondence should be addressed; (iii) receipt of grants. Authors who would like a reprint address to be printed should include this on their manuscript.

REFERENCES (1) In the text these should follow the Harvard system – that is, name followed by date: Brown (1970). If there are more than two authors the first author's name followed by *et al.* should be used, even the first time that the reference appears. (2) The list of references should be typed in alphabetical order on a separate sheet and should appear as follows: Brown, J., Williams, E. & Wright, H. (1970). Treatment of heroin addiction. *Psychological Medicine* 1, 134–136. Journal titles should be given in full.

Books should be cited as follows: Brown, J. (1970). *Psychiatric Research*. Smith: Glasgow.

ILLUSTRATIONS Only essential figures and tables should be included. *Photographs* Unmounted photographs on glossy paper should be provided. Magnification scales, if necessary, should be lettered on these. Where possible, prints should be trimmed to column width (i.e. 70 mm). *Diagrams* These will usually be reduced to 70 mm wide. Lettering should be in either Letraset or stencil, and care should be taken that lettering and symbols are of comparable size. Illustrations should not be inserted in the text, they should be marked on the back with figure numbers, title of paper, and name of author. All photographs, graphs, and diagrams should be referred to as figures and should be numbered consecutively in the text in Arabic numerals. The legends for illustrations should be typed on a separate sheet. *Tables* Tables should be numbered consecutively in the text in Arabic numerals and each typed on a separate sheet.

PROOFS AND OFFPRINTS Page proofs will be sent to the senior author. Corrections other than printer's errors may be charged to the author. Fifty offprints of each paper are supplied free; additional offprints are available according to a scale of charges if they are ordered when the proof is returned.
