doi:10.1017/jns.2023.35

In [Table 2](#) the arrow before the letters ‘TUL’ is pointing downwards. The arrow should be pointing upwards.

The correct table is shown below.

Table 2. Percentage of population groups with mean daily Se intakes ($\mu\text{g/day}$ from all sources) below the adequate intake and lower reference nutrient intake and above the tolerable upper limit.

	Total Population* (n = 1051)	Men (n = 523)	Women (n = 528)	Men				Women			
				18–35y (n = 207)	36–50y (n = 143)	51–64y (n = 98)	$\geq 65\text{y}$ (n = 75)	18–35y (n = 170)	36–50y (n = 165)	51–64y (n = 106)	$\geq 65\text{y}$ (n = 87)
% \downarrow AI	46.81	28.68	64.77	20.77	34.27	30.61	37.33	57.06	67.27	66.98	72.41
% \downarrow LRNI	4.09	0.96	7.2	0	2.1	0	2.67	7.65	5.45	6.6	10.34
% \uparrow TUL	0	0	0	0	0	0	0	0	0	0	0

AI (adequate intake), LRNI (lower reference nutrient intake) and TUL (tolerable upper limit) are 70 $\mu\text{g/day}$, 40 $\mu\text{g/day}$ and 300 $\mu\text{g/day}$ respectively^(31,32,33). *Under reporters excluded.
