Leading medical journals...

For well over a hundred years Cambridge University Press has been publishing internationally renowned research periodicals in the field of medicine and healthcare which have established themselves at the cutting edge of scientific research.

Coverage

They have a wide subject area coverage, from the long established and internationally respected *Journal of Physiology* and *Journal of Anatomy* to the newly developing areas of ethics, health economics and technology assessment covered by *Cambridge Quarterly of Healthcare Ethics* and *International Journal of Technology Assessment in Healthcare*.

Features

- Fast publication times
- Extensive book review sections
- Occasional special issues and supplements in topical areas
- No page charges for authors
- Very high quality scientific papers
- Peer-review
- Highest editorial and production standards
- Outstanding indexing services
- Abstracted and indexed by leading bodies
- colour illustration where required
- high impact factors and cited half-lives
