EDITOR

Professor PADMA KANT SHUKLA, *Institut für Theoretische Physik IV, Fakultät für Physik und Astronomie, Ruhr-Universität Bochum, D-44780 Bochum, Germany, ps@tp4.rub.de*

ASSOCIATE EDITORS

Professor ROBERT BINGHAM, *Space Science & Technology Department, Rutherford Appleton Laboratory, Chilton, Didcot, Oxfordshire, OX11 0QX, United Kingdom, r.bingham@rl.ac.uk*

Professor GERT BRODIN, *Department of Physics, Umeå University, S-90187 Umeå, Sweden, Gert.Brodin@physics.umu.se*

Professor NATHANIEL J FISCH, *Department of Astrophysical Sciences, Princeton Plasma Physics Laboratory, James Forrestal Campus, Princeton University, Princeton, NJ 08543, USA, fisch@princeton.edu*

Professor OSAMU ISHIHARA, *Faculty of Engineering, Yokohama National University, 79-5 Tokiwada, Yokohama 240-8501, Japan, oishihara@ynu.ac.jp*

Professor JOSE TITO MENDONÇA, *GoLP/Instituto Superior Tecnico, Department of Physics, University of Lisbon, 1049-001 Lisboa, Portugal, titomend@ist.utl.pt*

Professor RAM PAL SHARMA, *Centre of Energy Studies, Indian Institute of Technology Delhi, Hauz Khas, New Delhi 110 016, India, rpsharma@ces.iitd.ernet.in*

Dr John P Dougherty, Founding Editor, 1967–1994

Journal of Plasma Physics (ISSN 0022-3778) is published six times a year in February, April, June, August, October and December, by Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 8RU, UK and Cambridge University Press, 32 Avenue of the Americas, New York, N.Y. 10013-2473, USA.

Six parts form a volume. The subscription price (excluding VAT, but including postage) of Volume 75 (2009) is £935.00 (US $1850.00 in the USA, Canada and Mexico) for institutions print and electronic, institutions electronic only £880.00/$1580.00; £281.00 (US $516.00) print only for individuals. All orders must be accompanied by payment.

EU subscribers (outside the UK) who are not registered for VAT should add VAT at their country's rate. VAT registered subscribers should provide their VAT registration number.

Japanese prices for institutions are available from Kinokuniya Company Ltd, P.O. Box 55, Chitose, Tokyo 156, Japan. Prices include delivery by air.

Copies of the journal for subscribers in the USA, Canada and Mexico are sent by air to New York to arrive with minimum delay. Periodicals postage paid at New York, NY, and at additional mailing offices. *POSTMASTER*: send address changes in USA, Canada and Mexico to *Journal of Plasma Physics*, Cambridge University Press, 100 Brook Drive, West Nyack, New York 10994–2133.

Internet access This journal is included in the Cambridge Journals Online service, which can be found at journals.cambridge.org For further information on other Press titles, access http://www.cambridge.org

CONTENTS TO VOLUME 75

Part 1 February 2009

Erratum 1

Photon equivalent charge in a two-electron temperature Fermi plasma
L. A. RIOS, P. K. SHUKLA and A. SERBETO 3

On the parametric decay of waves in magnetized plasmas
G. BRODIN and L. STENFLO 9

Excitation of ion wakefields by electromagnetic pulses in dense plasmas
P. K. SHUKLA 15

A comparative study of the filamentation and Weibel instabilities and their cumulative effect. I. Non-relativistic theory
M. LAZAR, A. SMOLYAKOV, R. SCHLICKEISER and P. K. SHUKLA 19

The dependence of open cylindrical magnetoactive *p*-Ge and *p*-Si plasma waveguide mode cutoff frequencies on hole concentrations
L. NICKELSON, S. ASMONTAS, V. MALISAUSKAS and R. MARTAVICIUS 35

Numerical prediction of the saturation limit of atmospheric pressure AC dielectric barrier discharges
KHALIL ARSHAK, IVOR GUINEY and EDWARD FORDE 53

Dynamic behaviour of an oxygen dc discharge
A. RICHTER, H. TESTRICH, H.-E. WAGNER, D. LOFFHAGEN and C. WILKE 71

Generalization of the two-dimensional Child–Langmuir law for non-zero injection velocities in a planar diode
YA-MIN QUAN and YAO-GEN DING 85

A mechanism for self-generated magnetic fields in the interaction of ultra-intense laser pulses with thin plasma targets
A. ABUDUREXITI, T. OKADA and S. ISHIKAWA 91

Adiabatic effects of electrons and ions on electro-acoustic solitary waves in an adiabatic dusty plasma
FATEMA TANJIA and A. A. MAMUN 99

Reflection of an electromagnetic pulse from a relativistically moving plasma
MILOŠ M. ŠKORIĆ, BOŽIDAR B. STANIĆ, LJUPČO HADŽIEVSKI and LJUBOMIR NIKOLIĆ 111

Theory and simulations of whistler wave propagation
DASTGEER SHAIKH 117

Simulations of two-dimensional magnetic electron drift vortex mode turbulence in plasmas
DASTGEER SHAIKH and P. K. SHUKLA 133

https://doi.org/10.1017/S0022377809990341 Published online by Cambridge University Press

Part 2 April 2009

Linear superposition of nonlinear waves
SWADESH MAHAJAN and HIDEAKI MIURA 145

Drift wave excitation in a collisional dusty magnetoplasma with multi-ion species
P. K. SHUKLA and M. ROSENBERG 153

The effect of magnetic topology on particle acceleration in a three-dimensional reconnecting current sheet: a test-particle approach
V. V. ZHARKOVA and O. V. AGAPITOV 159

Detailed analytical investigation of magnetic field line random walk in turbulent plasmas: II. Isotropic turbulence
I. KOURAKIS, R. C. TAUTZ and A. SHALCHI 183

Coupled Langmuir and nonlinear ion acoustic waves in the presence of non-thermal electrons
H. ALINEJAD, P. A. ROBINSON, O. SKJAERAASEN and I. H. CAIRNS 193

Alfvén eigenmodes in magnetic X-point configurations with strong longitudinal fields
N. BEN AYED, K. G. MCCLEMENTS and A. THYAGARAJA 203

Linear and nonlinear properties of an obliquely propagating dust magneto-sonic wave
W. MASOOD, H. A. SHAH, A. MUSHTAQ and M. SALIMULLAH 217

Laser-to-proton energy transfer efficiency in laser–plasma interactions
E. FOURKAL, I. VELTCHEV and C.-M. MA 235

Nonlinear saturation of the Weibel instability in a dense Fermi plasma
F. HAAS, P. K. SHUKLA and B. ELIASSON 251

Large-amplitude electrostatic solitary structures in dusty plasmas with vortex-like variable charge dust distribution and non-isothermal trapped electrons
MOULOUD TRIBECHE 259

Minimum dissipative relaxed states applied to laboratory and space plasmas
B. DASGUPTA, DASTGEER SHAIKH, Q. HU and G. P. ZANK 273

Part 3 June 2009

Inverse bremsstrahlung cross section estimated within evolving plasmas using effective ion potentials
F. WANG, E. WECKERT and B. ZIAJA 289

Stochastic layer scaling in the two-wire model for divertor tokamaks
HALIMA ALI, ALKESH PUNJABI and ALLEN BOOZER 303

Nonlinear interaction between a resonance-mode ($k_{\|} = 0$) wave and energetic plasma particles
DAVID R. SHKLYAR 319

https://doi.org/10.1017/S0022377809990341 Published online by Cambridge University Press

Equilibrium properties on the EAST superconducting tokamak
J. P. QIAN, B. N. WAN, L. L. LAO, B. SHEN, S. A. SABBAGH, J. MENARD, Y. W. SUN, Y. M. DUAN, J. H. LI, B. J. XIAO, X. Z. GONG and EAST RESEARCH TEAM 337

Influence of non-monochromaticity on zonal-flow generation by magnetized Rossby waves in the ionospheric E-layer
T. D. KALADZE, H. A. SHAH, G. MURTAZA, L. V. TSAMALASHVILI, M. SHAD and G. V. JANDIERI 345

Magnetic detachment and plume control in escaping magnetized plasma
P. F. SCHMIT and N. J. FISCH 359

Self-similar solutions for imploding z-pinch shells in magnetized plasmas
Y. M. SHTEMLER and M. MOND 373

A new electrostatic mode in a dusty plasma due to dust charge fluctuation
A. A. MAMUN 389

Collisional instability in a rare magnetized plasma: an experimental model for magnetospheric and space plasma study
CONSTANTINE L. XAPLANTERIS 395

Generation of magnetic macrostructures by electromagnetic drift turbulence
V. D. SHAPIRO 407

DIA and DA solitary waves in adiabatic dusty plasmas
A. A. MAMUN, N. JAHAN and P. K. SHUKLA 413

Part 4 August 2009

Excitation of electrostatic ion-cyclotron-like modes by the electron density ripple in dusty magnetoplasmas
P. K. SHUKLA 433

A length-scale formula for confined quasi-two-dimensional plasmas
TIMOTHY D. ANDERSEN and CHJAN C. LIM 437

Dust acoustic solitary waves in non-thermal plasmas consisting of negatively charged dust grains and isothermal electrons
ANIMESH DAS and ANUP BANDYOPADHYAY 455

Multi-dimensional instability of dust-ion-acoustic solitary waves in a multi-ion dusty plasma
M. G. M. ANOWAR and A. A. MAMUN 475

Instability of higher harmonic electrostatic ion cyclotron waves in a negative ion plasma
M. ROSENBERG and R. L. MERLINO 495

Study of plasma parameters in a staged pinch device using current-stepping technique
FARAH DEEBA, KAMALUDDIN AHMED, MAHNAZ QADAR HASEEB and ARSHAD M. MIRZA 509

Effect of steady flow and Newton's cooling on the propagation and damping of small-amplitude prominence plasma oscillations
K. A. P. SINGH and B. N. DWIVEDI 517

https://doi.org/10.1017/S0022377809990341 Published online by Cambridge University Press

A comparative study of the filamentation and Weibel instabilities and their cumulative effect. II. Weakly relativistic beams
A. STOCKEM, M. LAZAR, P. K. SHUKLA and A. SMOLYAKOV 529

Focusing of a ring ripple on a Gaussian electromagnetic beam in a magnetoplasma
SHIKHA MISRA and S. K. MISHRA 545

Filamentation instability in a collisional magnetoplasma with thermal conduction
MAHENDRA SINGH SODHA and MOHAMMAD FAISAL 563

Part 5 October 2009

Dark and grey electromagnetic electron-cyclotron envelope solitons in an electron-positron magnetoplasma
P. K. SHUKLA, R. BINGHAM, A. D. R. PHELPS and L. STENFLO 575

Low-frequency electrostatic wave in a metallic electron-hole-ion plasma with nanoparticles
P. K. SHUKLA and G. E. MORFILL 581

A note on the trapped electron dust grain current
ABDERREZAK BERBRI and MOULOUD TRIBECHE 587

Stability of ion–acoustic solitary waves in a multi-species magnetized plasma consisting of non-thermal and isothermal electrons
SK. ANARUL ISLAM, A. BANDYOPADHYAY and K. P. DAS 593

Experimental and computational characterization of hydrodynamic expansion of a preformed plasma from thin-foil target for laser-driven proton acceleration
AKITO SAGISAKA, HIDEO NAGATOMO, HIROYUKI DAIDO, ALEXANDER S. PIROZHKOV, KOICHI OGURA, SATOSHI ORIMO, MICHIAKI MORI, MAMIKO NISHIUCHI, AKIFUMI YOGO and MASATAKA KADO 609

Particle acceleration in a reconnecting current sheet: PIC simulation
TARAS V. SIVERSKY and VALENTINA V. ZHARKOVA 619

Magnetohydrodynamic stability of plasmas with ideal and relaxed regions
R. L. MILLS, M. J. HOLE and R. L. DEWAR 637

Characteristics of the runaway electron beam instability in the HT-7 tokamak
Z. Y. CHEN, J. X. ZHU, H. J. JU, Q. DU, Y. J. SHI, H. F. LIANG, M. LI, W. D. CAI and HT-7 TEAM 661

Resonant interaction of runaway electrons with magnetic field ripple in tokamak plasmas
Z. Y. CHEN, B. N. WAN, Y. J. SHI, H. J. JU, J. X. ZHU and H. F. LIANG 669

Guiding-center recursive Vlasov and Lie-transform methods in plasma physics
A. J. BRIZARD and A. MISHCHENKO 675

https://doi.org/10.1017/S0022377809990341 Published online by Cambridge University Press

Dust–acoustic nonlinear periodic waves in a dusty plasma with charge fluctuation
L. L. YADAV, S. V. SINGH and R. BHARUTHRAM 697

BOOK REVIEW 709

Part 6 December 2009

Waves in Rydberg plasmas
J. T. MENDONÇA, J. LOUREIRO and H. TERÇAS 713

Poloidal eigenmode of the geodesic acoustic mode in the limit of high safety factor
M. SASAKI, K. ITOH, A. EJIRI and Y. TAKASE 721

Focusing of a dark hollow Gaussian electromagnetic beam in a magneto-plasma
MAHENDRA SINGH SODHA, S. K. MISHRA and SHIKHA MISRA 731

High yield fusion in a staged Z-pinch
H. U. RAHMAN, F. J. WESSEL, N. ROSTOKER and P. H. NEY 749

Ring formation in electromagnetic beams propagating in a magnetoplasma
SHIKHA MISRA and S. K. MISHRA 769

Effects of diode current on high power microwave generation in a vircator
GUOZHI LIU, WENHUA HUANG, HAO SHAO, SHI QIU, HONGJUN WANG, JINGYUE LIU, FENG WANG, ZHANFENG YANG and YONGZHI QIAO 787

Ultra-cold plasmas: a paradigm for strongly coupled and classical electron fluids
CLAUDE DEUTSCH, GUENTER ZWICKNAGEL and ANTOINE BRET 799

Nonlinear waves in twirling plasmas
A. R. KARIMOV 817

Analytical method for determining at equilibrium the envelope and emittance of initially mismatched beams
R. P. NUNES and F. B. RIZZATO 829

Nonlinear acoustic–gravity waves
L. STENFLO and P. K. SHUKLA 841

https://doi.org/10.1017/S0022377809990341 Published online by Cambridge University Press

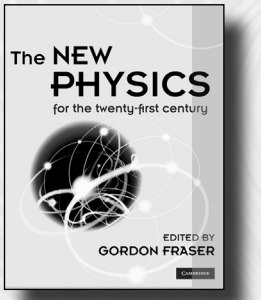
CAMBRIDGE

Fantastic New Titles in Plasma Physics From Cambridge!

Now in Paperback!

The New Physics
For the Twenty-First Century

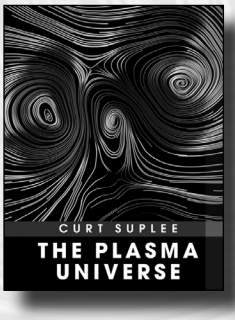
Gordon Fraser



"… accessible to a general readership … presents topics that can be usefully pondered by those with little background in physics … written at a level that can be digested by eager undergraduates but will also be instructive to experienced physicists … several physicist colleagues have passed on unsolicited praise of the level of presentation."

–Physics World

$34.99: Pb: 978-0-521-14002-7: 556 pp.



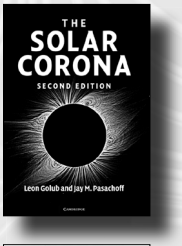
The Plasma Universe

Curt Suplee

"The Plasma Universe is a lively, compact, beautifully illustrated and eminently readable exposition of the amazing scope of modern plasma physics. The common phenomena underlying plasma TV's sunspots and the violent death of stars are lucidly explained at level suitable for a broad audience. I particularly liked the one-page profiles of the scientists who shaped the subject, starting with Irving Langmuir, that are sprinkled throughout the text: they provide welcome historical context and human interest."

–Curtis Callen, Professor of Physics, Princeton University, and President-Elect, American Physical Society

$20.99: Pb: 978-0-521-51927-4: 88 pp.



Power Exhaust in Fusion Plasmas

Wojciech Fundamenski

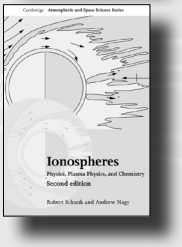
$125.00: Hb: 978-0-521-85171-8: 500 pp.

The Solar Corona

2nd Edition

Leon Golub and Jay M. Pasachoff

$80.00: Hb: 978-0-521-88201-9: 408 pp.



Ionospheres
Physics, Plasma Physics, and Chemistry

2nd Edition

Robert Schunk and Andrew Nagy

Cambridge Atmospheric and Space Science Series

$150.00: Hb: 978-0-521-87706-0: 608 pp.

Prices subject to change.

425 YEARS OF CAMBRIDGE PRINTING AND PUBLISHING

https://doi.org/10.1017/S0022377809990341 Published online by Cambridge University Press

Instructions for Authors

Editorial policy The journal welcomes submissions in any of the areas of plasma physics. Its scope includes experimental and theoretical work on basic plasma physics, the plasma physics of magnetic and inertial fusion, laser–plasma interactions, industrial plasmas, plasma devices and plasmas in space and astrophysics. This list is, of course, merely illustrative of the wide range of topics on which papers are invited, and is not intended to exclude any aspect of plasma physics that is not explicitly mentioned.

Authors are urged to ensure that their papers are written clearly and attractively, in order that their work will be readily accessible to readers. Manuscripts must be written in English. *Journal of Plasma Physics* employs a rigorous peer-review process whereby all submitted manuscripts are sent to recognized experts in their subjects for evaluation. The Editors' decision on the suitability of a manuscript for publication is final.

Submission of manuscripts Papers may be submitted to the Editor or any of the Associate Editors, preferably by email in pdf format. When a paper is accepted, the authors will be asked to supply source files in LaTeX or Word. Instructions for the preparation of these files and LaTeX style files are given in the Instructions for Contributors link at journals.cambridge.org/pla.

Incremental publishing and DOIs In order to make articles which have been accepted for publication in *Journal of Plasma Physics* available as quickly as possible, they are now published incrementally online (at Cambridge Journals Online; journals.cambridge.org) The online version is available as soon as author corrections have been completed and before the article appears in a printed issue. A reference is added to the first page of the article in the journal catchline. This is the DOI – Digital Object Identifier. This is a global publishers' standard. A unique DOI number is created for each published item. It can be used for citation purposes instead of volume, issue and page numbers. It therefore suits the early citation of articles which are published on the web before they have appeared in a printed issue. See journals.cambridge.org/pla.

Proof reading Only typographical or factual errors may be changed at proof stage. The publisher reserves the right to charge authors for correction of non-typographical errors.

Offprints 50 offprints of each article will be supplied free to each first-named author. Extra offprints may be purchased from the publisher if ordered at proof stage. No page charge is made.

Copying This journal is registered with the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923. Organizations in the USA who are also registered with C.C.C. may therefore copy material (beyond the limits permitted by sections 107 and 108 of US copyright law) subject to payment to C.C.C. of the per copy fee of $16.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0022–3778/2009 $16.00.

ISI Tear Sheet Service, 3501 Market Street, Philadelphia, Pennsylvania 19104, USA, is authorized to supply single copies of separate articles for private use only.

Organizations authorized by the Copyright Licensing Agency may also copy material subject to the usual conditions.

For all other use, permission should be sought from Cambridge or the American Branch of Cambridge University Press.

Volume 75 Part 6 December 2009

CONTENTS

Letter to the Editor

Waves in Rydberg plasmas
J. T. MENDONÇA, J. LOUREIRO and H. TERÇAS 713

Research Articles

Poloidal eigenmode of the geodesic acoustic mode in the limit of high safety factor
M. SASAKI, K. ITOH, A. EJIRI and Y. TAKASE 721

Focusing of a dark hollow Gaussian electromagnetic beam in a magnetoplasma
MAHENDRA SINGH SODHA, S. K. MISHRA and SHIKHA MISRA 731

High yield fusion in a staged Z-pinch
H. U. RAHMAN, F. J. WESSEL, N. ROSTOKER and P. H. NEY 749

Ring formation in electromagnetic beams propagating in a magnetoplasma
SHIKHA MISRA and S. K. MISHRA 769

Effects of diode current on high power microwave generation in a vircator
GUOZHI LIU, WENHUA HUANG, HAO SHAO, SHI QIU, HONGJUN WANG, JINGYUE LIU, FENG WANG, ZHANFENG YANG and YONGZHI QIAO 787

Ultra-cold plasmas: a paradigm for strongly coupled and classical electron fluids
CLAUDE DEUTSCH, GUENTER ZWICKNAGEL and ANTOINE BRET 799

Nonlinear waves in twirling plasmas
A. R. KARIMOV 817

Analytical method for determining at equilibrium the envelope and emittance of initially mismatched beams
R. P. NUNES and F. B. RIZZATO 829

Review Article

Nonlinear acoustic–gravity waves
L. STENFLO and P. K. SHUKLA 841
