

The following papers have been accepted for publication and will appear shortly:

PETERSEN, G. M. Norms of summation methods.

MILLER, J. B. Series expansions and general transforms.

HAYES, CHARLES A., JR. A sufficient condition for the differentiation of certain classes of set functions.

CATTON, DIANA and MILLIS, B. G. Numerical evaluation of the integral

$$(2\pi)^{-1} \int_{-i\infty}^{i\infty} (\lambda\alpha^3 + \alpha^2 - 1)^{-\frac{1}{2}} e^{-\alpha\omega} d\alpha.$$

ZEEMAN, E. C. A note on a theorem of Armand Borel.

PATTERSON, E. M. On certain types of derivations.

AKUTOWICZ, E. J. The spectral resolution of Watson transforms.

PAPERT, S. Which distributive lattices are lattices of closed sets?

PETERSEN, G. M. Summability and bounded sequences.

BLACKBURN, N. On prime-power groups with two generators.

GARSTANG, R. H. Further computations of quadrupole line strengths.

MACBEATH, A. M. and ROGERS, C. A. A modified form of Siegel's mean value theorem. II.

TAYLOR, J. G. A theorem of continuation for functions of several complex variables.

HELLIWELL, J. B. An application of the Weber-Orr transform to the problem of transonic flow past a finite wedge in a channel.

CONTENTS OF BIOLOGICAL REVIEWS

Vol. 33, No. 2. May 1958

A. J. SOUTHWARD. The zonation of plants and animals on rocky sea shores.

R. DENNELL. The hardening of insect cuticles.

AUDREY U. SMITH. The resistance of animals to cooling and freezing.

CONTENTS

	PAGE
BIRCH, B. J. and DAVENPORT, H. Quadratic equations in several variables	135
MACBEATH, A. M. and ROGERS, C. A. Siegel's mean value theorem in the geometry of numbers	139
HILTON, P. J. and LEDERMANN, W. Homology and ringoids. I	152
BESICOVITCH, A. S. On homoeomorphism of perfect plane sets	168
EGGLESTON, H. G. Tangential properties of Fréchet surfaces	187
ALTMANN, S. L. Equivalent functions: hybrids and Wannier functions	197
HARTREE, D. R. A method for the numerical integration of the linear diffusion equation	207
DOUGLAS, A. S. On the numerical solution of a class of partial differential equations .	214
TAKÁCS, LAJOS. On a general probability theorem and its applications in the theory of the stochastic processes	219
WALKER, A. M. The existence of Bartlett-Rajalakshman goodness of fit G -tests for multivariate autoregressive processes with finitely dependent residuals	225
HAJNAL, J. Weak ergodicity in non-homogeneous Markov chains	233
ELIEZER, C. JAYARATNAM. A consistency condition for electron wave functions	247
BROWN, W. BYERS. Adiabatic second-order energy derivatives in quantum mechanics .	251
TAYLOR, J. G. Classical electrodynamics as a distribution theory. II	258
BASSALI, W. A. Problems concerning the bending of isotropic thin elastic plates subject to various distributions of normal pressures	265
BASSALI, W. A. and NASSIF, M. Transverse bending of infinite and semi-infinite thin elastic plates. III	288
RESEARCH NOTES:	
HANDSCOMB, D. C. Proof of the antithetic variates theorem for $n > 2$	300
KILMISTER, C. W. A note on summation over Feynman histories	302
ADDENDUM:	
SMITH, W. L. On renewal theory, counter problems, and quasi-Poisson processes .	305
