Experimental Agriculture publishes the results of experimental work in animal and crop husbandry, with an emphasis on research carried out in the warmer climates of the world. It also includes accounts of new experimental techniques, discussions of specific problems met in countries when agricultural production is developing rapidly, review articles on new developments in scientific agriculture, and occasional papers on technical, economic and sociological aspects of farming systems. The journal is the successor to *The Empire Journal of Experimental Agriculture*.

Each annual volume comprises four parts (published in January, April, July and October) plus an index.

Subscriptions may be sent to any bookseller or subscription agent or direct to the Cambridge University Press, Bentley House, 200 Euston Road, London, N.W. 1. Subscriptions in the U.S.A. and Canada should be sent to the American branch of the Press, 32 East 57th Street, New York, N.Y. 10022. The subscription price is 75s. net (including postage) for an annual volume (\$13.50 in the U.S.A.), payable in advance; separate parts cost 25s. net or \$4.50 each (plus postage).

Back Volumes. Inquiries for Vols. 1-32 of *The Empire Journal of Experimental Agriculture* should be addressed to Wm Dawson & Sons Ltd, 16 West Street, Farnham, Surrey. Previously published parts of *Experimental Agriculture* are available from the London or New York offices of the Cambridge University Press.

NOTES FOR CONTRIBUTORS

Contributions will be welcomed from scientists of all nationalities, particularly those working in tropical and sub-tropical countries where up-to-date techniques of agricultural experimentation are helping in the rapid development of more modern methods of farm production. Contributions, which must be written in English, should be sent to the Editor, Professor J. P. Hudson, University of Nottingham School of Agriculture, Sutton Bonington, Loughborough, England.

Conditions of acceptance. Submission of a paper will be taken to imply that the material has not previously been published, and is not being considered for publication elsewhere. Papers published in *Experimental Agriculture* may not be reprinted or published in translation without permission from the Editor, given on behalf of the Editorial Board.

General lay-out. Before having their manuscripts typed contributors are asked to look carefully at the lay-out of

AGRONOMY JOURNAL

This bimonthly publication, the official organ of the American Society of Agronomy, is respected throughout the world for its technical reports on basic and applied research in crop and soil science. Articles in past issues contributed information on the importance of soil aeration, moisture content, and root-zone temperature to the growth, development, and survival of forage crops; improved methods for determining seeding rates; techniques for estimating sugar quantities in plant extracts; a computer program for estimating parameters; and the effects of fertilizers and irrigation on crop yield, composition and quality. *Publication is open to Society members.*

The Journal of AGRICULTURAL SCIENCE

(Established 1905)

Edited by G. D. H. Bell, K. L. Blaxter, G. W. Cooke, R. E. Evans, John Hammond, Jr.,
Prof. Sir J. B. Hutchinson, Sir Bernard Keen, H. L. Penman,
H. H. Rogers, E. W. Russell and F. Yates

Contents of Volume 65, No. 2, October 1965

- WARING, J. J. and BROWN, W. O. A respiration chamber for the study of energy utilization for maintenance and production in the laying hen.
- KHANDEKAR, V. N., GOLDSTONE, C. L. and McMANUS, W. R. Some indices of the carcass composition of Dorset Horn Top Cross lambs. I. Measurements on the live body and carcass, the composition of sample joints and their relationship to carcass composition.
- KHANDEKAR, V. N., McMANUS, W. R. and GOLDSTONE, C. L. Some indices of the carcass composition of Dorset Horn Top Cross lambs. II. Specific gravity as an index of the fat content of the carcass and of various joints.
- HANLEY, F., JARVIS, R. H. and RIDGMAN, W. J. The effects of fertilizers on the bulking of Majestic potatoes.
- PATTERSON, H. D. The factorial combination of treatments in rotation experiments.
- DOGGETT, H. *Striga hermonthica* on sorghum in East Africa.
- WIDDOWSON, F. V. and PENNY, A. Experiments measuring the residual effects of nitrogen fertilizers.
- BINGHAM, J. and JENKINS, G. Techniques for assessing the cold resistance of cereals in the selection of hybrid material.
- TINKER, P. B. H. The effects of nitrogen, potassium and sodium fertilizers on sugar beet.
- DAVIES, ALISON. Carbohydrate levels and regrowth in perennial rye-grass.
- SHARAFELDIN, M. A. Wool characteristics of Iraqi Awassi sheep.
- BROSTER, W. H., SUTTON, J. D., TUCK, VALERIE J. and BALCH, C. C. The effect of the addition of large amounts of cod-liver oil to the rations of yearling heifers on their rate of liveweight gain.
- BUTTERWORTH, M. H. Some aspects of the utilization of tropical forages. I. Green elephant grass at various stages of growth.
- DAVIES, B. E. and DAVIES, R. I. Changes in exchangeable cations and exchange capacity of soil consequent on oxidation of its organic matter.
- HAWKINS, R. P. Factors affecting the yield of seed produced by different varieties of red clover.
- BUTTLE, H. R. L. and HANCOCK, J. L. Sterile boars with 'knobbed' spermatozoa.
- LEDGER, H. P. The body and carcass composition of East African ruminants. I. The composition of 'Improved Boran' *Bos indicus* steer carcasses.

Issued at two-monthly intervals in parts of about 136 pages with plates and figures, three parts constituting a volume, 2 volumes yearly
Subscription price 75s. per volume. Single parts 32s. 6d. net

ANIMAL PRODUCTION

Journal of the British Society of Animal Production

Contents of Volume 8, Part 1, February 1966

SOLLER, M., BAR-ANAN, R. and PASTERNAK, H. Selection of dairy cattle for growth rate and milk production.

DE ALBA, J. and RIERA, S. Sexual maturity and spermatogenesis under heat stress in the bovine.

LODGE, G. A., ELSLEY, F. W. H. and MACPHERSON, R. M. The effects of level of feeding of sows during pregnancy.

BLAXTER, K. L., WAINMAN, F. W. and DAVIDSON, J. L. The voluntary intake of food by sheep and cattle in relation to their energy requirements for maintenance.

ADAM, J. L. and SMITH, W. C. The use of sample joints in predicting the composition of the pig carcass.

BERG, R. T. and BUTTERFIELD, R. M. Muscle bone ratio and fat percentage as measure of beef carcass composition.

ROBERTSON, ALAN. A mathematical model of the culling process in dairy cattle.

CORBETT, J. L., LANGLANDS, J. P., McDONALD, I. and PULLAR, J. D. Comparison by direct animal calorimetry of the net energy values of an early and a late season growth of herbage.

KAY, M., PRESTON, T. R., MACLEOD, N. A. and PHILIP, E. B. Nutrition of the early weaned calf. IX. Nitrogen retention from different protein sources in calves fed *ad libitum*.

HOLMES, W., JONES, J. G. W. and ADELIN, C. Feed intake of grazing cattle. IV. A study with milk cows of the influence of restriction of pasture combined with supplementary feeding on production per animal and per acre.

KIELANOWSKI, J. Conversion of energy and the chemical composition of gain in bacon pigs.

BOWMAN, J. C. and BROADBENT, J. S. Genetics parameters of growth between birth and 16 weeks in Down Cross sheep.

Proceedings of the 43rd Meeting of the British Society of Animal Production.

The Journal is published three times a year in February, June and October. The annual subscription rate is 65s (U.S.A. \$11.00) single copy 25s (U.S.A. \$4.00). Orders and subscriptions may be sent to any Bookseller or direct to:—

JOURNAL OF THE BRITISH GRASSLAND SOCIETY

This Journal is a medium for the publication of the results of research and practical experience in the realm of grassland husbandry.

EDITOR: A. G. G. HILL

Contents of Volume 20, No. 3, September 1965

- A COMPARISON OF RYEGRASS VARIETIES FOR EARLY-BITE PRODUCTION. *By H. K. Baker, J. R. A. Chard, J. Davies and D. T. Aldrich.*
- A COMPARISON OF NUTRIENT LOSSES IN BALED HAY MADE FROM FORAGE-HARVESTED, CRIMPED OR TEDDED SWARDS WITH THOSE IN BARN-DRYING. *By J. A. M. Kerr and W. O. Brown.*
- THE EFFECT OF HIGH LEVELS OF NITROGEN ON SEED YIELD OF COCKSFOOT (*Dactylis glomerata L.*) *By D. A. Lambert.*
- THE BOTANICAL AND CHEMICAL ANALYSIS OF HERBAGE SAMPLES OBTAINED FROM SHEEP FITTED WITH OESOPHAGEAL FISTULAE. *By R. C. Grimes, B. R. Watkin and P. F. May.*
- THE ENERGY VALUE OF BARN-DRIED HAY. *By D. E. Morgan and M. G. S. Jones.*
- THE RELATION BETWEEN THE CRUDE PROTEIN CONTENT AND THE DIGESTIBLE CRUDE-PROTEIN CONTENT OF TROPICAL PASTURE PLANTS. *By R. Milford, and D. J. Minson.*
- STORAGE OF CLOVER SEED. II. SECOND INTERIM REPORT, 1955-64. *By W. Ellis Davies.*
- THE OUTPUT OF SWARDS ON COMMERCIAL FARMS IN RELATION TO FERTILIZER AND OTHER MANAGEMENT FACTORS. *By R. D. Baker and H. K. Baker.*
- ADVANCE NOTE ON RESEARCH: THE EFFECT OF PARAQUAT-TREATED GRASS MULCH ON THE RATE OF EMERGENCE AND GROWTH OF BARLEY, RAPE AND PERENNIAL RYEGRASS SEEDLINGS. *By I. B. Warboys and Susan Ledson.*
- THE EFFECT OF SEED SIZE ON EARLY GROWTH OF DIPLOID AND TETRAPLOID ITALIAN RYEGRASS. *By R. D. Harkess.*
- SPRING GROWTH OF PERENNIAL RYEGRASS AND COCKSFOOT. *By D. M. Calder and Alison Davies.*
- A COMPARISON OF THE REACTION OF DIFFERENT GRASS SPECIES TO FERTILIZER NITROGEN AND TO GROWTH IN ASSOCIATION WITH WHITE CLOVER. I. YIELD OF DRY MATTER. *By D. W. Cowling and D. R. Lockyer.*

Published quarterly. The annual subscription is 60s. or \$8.40, post free. Back numbers are still available, at the following prices; Volume 1, 20s. or \$2.80; volumes 2-17, 40s. or \$5.60 each; volumes 18 onwards, 60s. or \$8.40.

Orders to: The Secretary, British Grassland Society, Grassland Research Institute, Hurley, Berkshire, England.

**NEW
FROM
SHELL**

**NEW SYSTEMIC BIDRIN IS PERSISTENT,
ACTIVE — CONTROLS APHIDS, MITES,
THRIPS, ON COTTON, FRUITS, VEGETABLES**

Bidrin is Shell's new organo-phosphorus insecticide. It is systemic and has particular advantages for many crops. For example, Bidrin's extremely wide spectrum of activity includes the easy control of aphids, mites and thrips on cotton, citrus fruits, vegetables and seedcrops. Bidrin is equally useful in dealing with stem borers and leaf hoppers on rice—scale insects on citrus crops—and even the elm bark beetle. Bidrin kills on contact then continues to control biting and sucking insects for up to two to three weeks. Bidrin may be used to within four weeks before harvest, by then it has completely broken down and crops are ready for consumption. Current trials are proving that Bidrin may have many other valuable uses.

For further details about Bidrin contact your Shell company.

UNIVERSITY OF EDINBURGH

Royal (Dick) School of Veterinary Studies

Diploma Course in Tropical Veterinary Medicine

The course for the post-graduate Diploma in Tropical Veterinary Medicine (D.T.V.M.) commences at the beginning of October and lasts for an academic year of 9 months.

It is open to veterinarians holding qualifications registrable with the Royal College of Veterinary Surgeons or such other veterinary qualifications as may be recognised for the purpose by the University Court.

The course is designed to cater for the needs of veterinarians in developing countries. On completion of the course diplomates may be eligible for admission as M.Sc. or Ph.D. students.

Classes are held at the Veterinary School, Veterinary Field Station and in appropriate Departments of the University. Subjects covered by the course include Animal Husbandry in the Tropics, Animal Industries, Bacteriology, Entomology, Epizootiology and Disease Control, Immunology, Nutrition, Parasitology, Pathology and Tropical Veterinary Hygiene. Written, oral and practical examinations qualifying for the diploma are held in March and in June. Re-sit examinations are held in September.

Applications for admission should be lodged with the Dean, Royal (Dick) School of Veterinary Studies, Summerhall, Edinburgh, 9, on or before 31st March of the year in which the applicant desires admission.

November, 1965

RHODESIA, ZAMBIA AND MALAWI JOURNAL OF AGRICULTURAL RESEARCH

(Formerly the *Rhodesian Journal of Agricultural Research*)

The Journal of the Agricultural Research Council of Central Africa

VOL. 4 No. 1

JANUARY 1966

CONTENTS

Early height growth of *P. taeda*.
Branching habit of *Arachis monticola*.
Fungicidal control of *Cercospora*.
Test plant age and transmission of rosette.
Behaviour of *Myzus persicae* on tobacco.
Nematode infestation of sheep.
Estimation of multiple missing values.

RESEARCH NOTES

Relation of soil temperatures to air temperatures.
Influence of potassium on boron uptake by tobacco.

Published January and July of each year
Annual Subscription 30s. Individual numbers 15s.
Back numbers available.

Specimen copies are available free of charge to libraries from:
