

CDC/SHEA Outbreak Response Training Program (ORTP)

Concise, evidence-based and expert-led guidance and implementation strategies for incident management of facility and emerging pathogen outbreaks.

Guidance will be derived from CDC and public health prevention guidelines and tool kits, implementation tools, expert consensus, and best practice recommendations that address preparedness and response to infectious diseases outbreaks.

Medicine

Books and Journals from
Cambridge University Press

The Cambridge Medicine programme focuses its book publishing in a defined set of core clinical areas with our great strength in the clinical brain sciences. Other specialties of significant focus include reproductive medicine/obstetrics and gynaecology, anaesthesia and critical care, emergency medicine and pathology.

Our journals programme covers a broad spectrum of medical disciplines including emergency and disaster medicine, epidemiology and infectious diseases, biomedical science, genetics, nutrition, mental health and psychiatry, and neuroscience.

We partner with many learned societies including The Society for Healthcare Epidemiology of America, the Neuroscience Education Institute, and the Royal College of Obstetricians and Gynaecologists.
