Animal Health Research Reviews

Published in collaboration with the Conference of Research
Workers in Animal Diseases

Editor-in-Chief

C. Gyles, *University of Guelph, Canada*

Animal Health Research Reviews provides an international forum for the publication of reviews and commentaries on all aspects of animal health. Papers include in-depth analyses and broader overviews of all facets of health and science in both domestic and wild animals. Major subject areas include physiology and pharmacology, parasitology, bacteriology, food and environmental safety, epidemiology and virology. The journal will be of interest to researchers involved in animal health, parasitologists, food safety experts and academics interested in all aspects of animal production and welfare.

Journal of Dairy Research

Published for the Institute of Food Research and the Hannah Research Institute

Executive Editors

D. G. Chamberlain, *Hannah Research Institute, UK*

E. C. Needs, *Hannah Research Institute, UK*

Journal of Dairy Research publishes original scientific research on all aspects of mammary biology and dairy science including: the physiology, biochemistry, cell biology and endocrinology of lactation; animal husbandry, milk production, composition, preservation, processing and separation; biotechnology and food science; properties of milk proteins and other components; dairy products such as cheese, fermented milks and spreads; relevant studies in bacteriology, enzymology and immunology, the use of milk products in other foods; and the development of methods relevant to these subjects.

Epidemiology and Infection

Editor-in-Chief

Norman Noah, London School of Hygiene and Tropical Medicine, UK

Epidemiology and Infection publishes original reports and reviews on all aspects of infection in humans and animals. Particular emphasis is given to the epidemiology, prevention and control of infectious diseases. The field covered is broad and includes the zoonoses, tropical infections, food hygiene, vaccine studies, statistics and the clinical, social and public health aspects of infectious disease. Papers covering microbiology and immunology, which have an epidemiological relevance, are part of this broad field. Papers come from medical and veterinary scientists worldwide. It has become the key periodical in which to find the latest reports on recently discovered infections and new technology. For those concerned with policy and planning for the control of infections, the papers on mathematical modelling of epidemics caused by historical, current and emergent infections, will be of particular value.

Journal of Helminthology

Editor

John Lewis, Royal Holloway, University of London, UK

Journal of Helminthology publishes original papers and review articles on all aspects of pure and applied helminthology, particularly those helminth parasites of environmental health, medical or veterinary importance. Research papers on helminths in wildlife hosts, including plant and insect parasites, are also published along with taxonomic papers contributing to the systematics of a group. The journal will be of interest to academics and researchers involved in the fields of human and veterinary parasitology, public health, microbiology, ecology, epidemiology and biochemistry.

The Lichenologist

Published on behalf of The British Lichen Society

Senior Editor

Peter D. Crittenden, University of Nottingham, UK

The Lichenologist is the premier scientific journal devoted exclusively to the study of lichens worldwide. As the leading forum for the dissemination of new concepts and topical reviews, *The Lichenologist* reaches more scientists concerned with the study of lichens and lichen symbionts than any other single journal. All aspects of lichenology are considered including systematics and phylogenetics; molecular biology; ultrastructure, anatomy and morphology; secondary chemistry, effects of pollutants and use as bioindicators; biogeography.

Microscopy and Microanalysis

Published for the Microscopy Society of America

Editor

Robert L. Price, *University of South Carolina, USA*

Microscopy and Microanalysis, a peer-reviewed bi-monthly, publishes original research papers in the fields of microscopy, imaging, and compositional analysis. This distinguished international forum is intended for microscopists in both biology and materials science. The journal provides significant articles that describe new and existing techniques and instrumentation, as well as the applications of these to the imaging and analysis of microstructure. *Microscopy and Microanalysis* also includes review articles, short communications, letters to the editor, and book reviews.

Parasitology

Back volumes. Vols. 1–71: Inquiries should be addressed to Wm. Dawson & Sons Ltd, Cannon House, Folkestone, Kent. Vols. 72 onwards: quotations for parts still in print may be obtained from Cambridge or the American Branch of Cambridge University Press.

Copying. This journal is registered with the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923, USA. Organizations in the USA who are also registered with C.C.C. may therefore copy material (beyond the limits permitted by sections 107 and 108 of US copyright law) subject to payment to C.C.C. of the per-copy fee of \$16.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0031–1820/2012 \$16.00.

Organizations authorized by the Copyright Licensing Agency may also copy material subject to the usual conditions.

ISI Tear Sheet Service. 3501 Market Street, Philadelphia, Pennsylvania 19104, USA, is authorized to supply single copies of separate articles for private use only.

For all other use, permission should be sought from Cambridge or the American Branch of Cambridge University Press.

Claims for missing issues can only be considered if made immediately after receipt of the subsequent issue.

Advertising. Details of advertising in Parasitology may be obtained from the publisher.

Online submission. Authors are encouraged to submit their manuscripts online. Go to <http://mc.manuscriptcentral.com/par/> to open an author's account for Parasitology. Manuscript Central is helping to improve the speed of the publication process for the journal.

PARASITOLOGY

CONTENTS

- PREFACE: Parasites: where, why and whence?**
Sarah E. Randolph 1813
- Air travel and vector-borne disease movement**
A. J. Tatem, Z. Huang, A. Das, Q. Qi, J. Roth and Y. Qiu 1816
- e-Surveillance in animal health: use and evaluation of mobile tools**
M. Madder, J. G. Walker, J. van Rooyen, D. Knobel, E. Vandamme, D. Berkvens, S. O. Vanwambeke and E. M. De Clercq 1831
- New technologies for reporting real-time emergent infections**
Rumi Chunara, Clark C. Freifeld and John S. Brownstein 1843
- Statistical models for spatially explicit biological data**
David J. Rogers and Luigi Sedda 1852
- Spatial parasite ecology and epidemiology: a review of methods and applications**
Rachel L. Pullan, Hugh J. W. Sturrock, Ricardo J. Soares Magalhães, Archie C. A. Clements and Simon J. Brooker 1870
- The population ecology of infectious diseases: pertussis in Thailand as a case study**
J. C. Blackwood, D. A. T. Cummings, H. Broutin, S. Iamsirithaworn and P. Rohani 1888
- Integrating the landscape epidemiology and genetics of RNA viruses: rabies in domestic dogs as a model.**
K. Brunker, K. Hampson, D. L. Horton and R. Biek 1899
- The ecology and age structure of a highly pathogenic avian influenza virus outbreak in wild mute swans**
O. G. Pybus, C. M. Perrins, B. Choudhury, R. J. Manvell, A. Nunez, B. Schulenburg, B. C. Sheldon and I. H. Brown 1914
- Parasite epidemiology in a changing world: can molecular phylogeography help us tell the wood from the trees?**
E. R. Morgan, E. L. Clare, R. Jefferies and J. R. Stevens 1924
- Integrative molecular phylogeography in the context of infectious diseases on the human-animal interface**
Rebecca R. Gray and Marco Salemi 1939
- Phylogeography of Lyme borreliosis-group spirochetes and methicillin-resistant *Staphylococcus aureus***
Gabriele Margos, Santiago Castillo-Ramírez and Anne Gatewood Hoen 1952
- Phylogeography helps with investigating the building of human parasite communities**
Serge Morand 1966
